American Railroad Journal.

New York Saturday, January 1, 1870.

Peninsular Railway of Michigan.

Regular trains commenced running to Bellevue on this road on the 1st of December.

The road has been completed and equipped to this point in the most satisfactory manner, the ballasting being well and thoroughly done. The rails, of 56 pounds to the yard, laid with fish joint fastenings, and the track, as a whole, is so smooth and solid that a speed of fifty miles per hour has been attained with ease and safety.

The rolling stock is all first class. The cars are from the shops of the Michigan Car Company, and the locomotives from Messrs. M. Baird & Co., of Philadelphia.

The road was thus opened under most favorable auspices, and the result is all that was anticipated—a remunerative traffic having been realized from the very first day of its opening.

This condition, at once so gratifying and so unusual in the opening of new Railway lines, is due to the fact that this road does not traverse a region of swamps and wilderness, where the road must wait and *create* the towns and business necessary for its own support, but passes instead through the best portion of the State, a populous and thriving district, whose citizens, being destitute of other railroad facilities, have shown by the municipal aid which they have so freely voted to this enterprise, that they appreciate the necessity, and who have, in their patronage already extended, given an earnest of a large and profitable local business to the road.

On reaching Lansing, the Capital of the State, this traffic will receive very large accessions, not only from the business naturally belonging to that city and the surrounding country, but also from other railways with which it will there connect, and, as the last of the iron for this section is already on its way there, and as the track layers are constantly at work, there is no reasonable doubt that, unless prevented by *unusually* severe weather, the track will be completed, and trains regularly running to Lansing, on the 1st of February, 1870.

The projectors of this road, however, have not counted solely, nor indeed *chiefly*, on its local business, but on the contrary they believe that its largest profits will be realized from its through traffic as a portion of the *Port Huron and Chicago Line*. And it must be admitted that this view of the case is well supported, not only by the fact that it is the shortest of the through routes *via* New York and Erie or New York Central Roads, but also that, from its location, it must command the greater part of the traffic between Canada and our Western States, which is already very large, and rapidly increasing.

From these considerations, it seems to us that few roads have commenced business with prospects more flattering than those of the Peninsular Railway.

☞ The directors of the Missisquoi Junction Railway have ordered a preliminary survey to be commenced as soon as practicable. There seems to be no doubt about the construction of this road, now that work has actually commenced on the Lamoille Valley Railroad.

☞ The Selma, Rome and Dalton Railroad Co. have recently concluded the purchase of the branch road from Dalton to Cleveland, Tenn., a distance of about forty miles.

☞ George M. Barnard, Esq., has been appointed Treasurer of the Boston, Hartford and Erie Railroad Company, vice S. W. Hall, resigned.

California and Oregon Railroad.

The California and Oregon and Yuba Railroad Companies have consolidated under the name of the California and Oregon Railroad Company, with a capital of $15,000,000. The work on the road is being vigorously prosecuted. Fifty-one miles are now completed and in working order, from a junction with the Central Pacific Railroad to Roseville.

☞ The Valley *Virginian* suggests the construction of a railroad from Staunton to Culpeper Courthouse, *via* Swift Run Gap and Madison Courthouse. This road, it says, would shorten the distance between Staunton and Washington fully thirty miles, and would be of easy and cheap construction.

Railroads in the United States.

It is difficult with all our accumulated facilities to reach every part of our vast country, and ascertain the exact condition of the railroad interest in each State or section. And during the last year the development of this great interest of the nation has been so immense and so rapid, as to make it impossible to keep pace with its growth. The construction of the Pacific Railroads, indeed, has forced all parts of the country to railroad extension, and hence we find that the extent of mileage constructed, and improvement on old lines has been greater in 1869 than in any former year of our railroad history. When we state that there have been brought into use during the year no less than 6,588.37 miles of new road, this fact is fully proven. This is more than one-eighth part of the total mileage in the country, the other seven-eighths having taken 40 years of varied fortune to establish. Yet still we are progressing, and the year now commencing, promises to eclipse even the year just closed. We have now in use an estimated mileage of 48,860.55 miles, and also projected and in progress a mileage of 27,505.83 miles. Take all the world without the United States, and this is not equalled. Truly we are progressive, and see in all this development a destiny as grand as insured. With our railroads we scale mountains and span the uninhabited plains, which are still in possession of the Indian, and open up vast territories for human habitation, which without the railroad must forever have

been closed against civilization. If we are going fast, we are going in the right direction, and the day is not far off which will give us the great benefits we seek in our headlong course. The railroad will unite us, and make us the great nation of the world, free and indissoluble.

The following tabulation shows the distribution of mileage and cost to the several States and Territories:

States, &c.	Miles of Road. Total.	Open.	Cost of road and equipment.
Maine	940.79	672.07	$21,183,110
New Hampshire.	785.32	685.32	22,642,630
Vermont	653.09	613.09	28,787,926
Massachusetts	1,569.75	1,483.70	74,699,443
Rhode Island	121.47	121.47	5,132,672
Connecticut	806.94	698.57	27,359,017
New York	4,735.91	3,636.22	$209,001,671
New Jersey	1,023.65	989.65	74,602,735
Pennsylvania	6,878.36	5,014.45	300,556,508
Delaware and E. Maryland	455.50	292.50	8,773,637
Maryland, other than above	730.02	493.52	31,814,659
West Virginia	723.75	364.75	27,869,315
Virginia	2,049.11	1,482.94	$49 886,481
North Carolina	1,552.97	1,129.67	29,505,425
South Carolina	1,439.17	1,089.97	27,348,817
Georgia	2,095.41	1,694.70	36,875,552
Florida	613.20	440.20	9,883,981
Alabama	2,039.80	1,036.00	$36,421,163

Missouri	3,261.79	1,827.00	88,372,121
Kansas	1,601.50	930.50	39,623,500
Colorado	350.00	150.00	$6,000,000
Utah Ter.	365.00	365.00	18,000,000
Nevada	390.00	390.00	19,500,000
California	2,297.60	810.60	46,650,000
Oregon	2,019,50	119.50	5,700,000
Total	5,622.10	1,835.10	$95,850,000

RECAPITULATION BY SECTIONS.

North East	4,877.36	4,274,22	$179,804,798
Middle East	14,547.19	10,791.09	652,618,525
South East	7,749.86	5,837.48	154,000,257
Gulf and S. W.	10,573.93	5,294.03	180,472,084
N. Interior	33,095.94	20,828.63	949,667,055
Pacific & West.	5,522.10	1,835.10	95,850,000
Total Jan. 1, '70.	76,366.38	48,860.55	2,212,412,719

In the following statement is shown the increase in railroad development in the several sections during the year 1869:

Sections.	Miles of Road. Projected.	Opened.	Cost of road and equipment.
North East	64.37	254.11	$17,275,764
Middle East	3,538.54	1,026.59	85,129,307
South East	298.22	185.57	14,978,130
Gulf & S. West	1,527.45	223.45	22,659,653
N. Interior	8,656.60	3,976.55	189,000,824
Pacific & West.	366.10	922.10	29,664,000
Total	13,446.28	6,588.37	$358,707,678

The annual progress of railroad building since in 1827 the commencement was made in the construction of the Granite Railroad at Quincy, Mass., to the present time, is shown in the following table:

Year.	Miles.	Year.	Miles.
1828	3	1849	6,350
1829	28	1850	7,475
1830	41	1851	8,589
1831	54	1852	11,027
1832	131	1853	13,497
1833	576	1854	15,672
1834	762	1855	17,398
1835	918	1856	19,251
1836	1,102	1857	22,625
1837	1,431	1858	25,090
1838	1,843	1859	26,755
1839	1,920	1860	28,771
1840	2,197	1861	30,593
1841	3,319	1862	31,769
1842	3,877	1863	32,471
1843	4,174	1864	33,860
1844	4,311	1865	34,442
2845	4,522	1866	35,351
1846	4,870	1867	36,896
1847	5,336	1868	38,822
1848	5,682	1869	42,272
1870	48,860		

City Passenger Railroads are not included in the above summary. These are now in general use in all considerable cities and in numerous instances in places where population is less dense. Their economical bearings are fully recognized and their popularity is increasing. Boston, New York, Brooklyn and Philadelphia count their street railroad tracks by hundreds of miles. Probably the total is not less than 3,500 to 4,000 miles.

Nor have we included in our statement any account of the second tracks with which most of the leading lines are supplied, nor the sidings and turnouts on all the lines. These may be estimated at 25 per cent. of the length of road, and are being added to yearly. Adding these supplementary tracks to the tabulated mileage we find that the total length of equivalent single track in use is about 60,000 miles, and if we add to this the equivalent for the city passenger tracks to nearly 65,000 miles. It is now about forty years since we began to build railroads and in that time, as before intimated, we have built a greater length than is to be found in the whole of Europe. Progress leads but to new demands and new enterprises.

Finances of Kentucky.

The following is an abstract of the Report of the Auditor for the fiscal year ending October 10, 1869:

The public debt of the Commonwealth, on the 10th of Oct., 1868, amounted to	$3,626,220 21
Add increase of school bonds, being amount of surplus school money July 1st, 1869	8,956 61
Making	$3,635,177 52
During the fiscal year ending 10th October, 1869, there was redeemed by the Commissioners of the Sinking Fund State bonds amounting to	328,000 00
Amount of State debt 10th October, 1869	$3,307,177 52
Deduct the amount of bonds dedicated to the school fund and not redeemable	1,648,283 52
Leaving the amount of the State debt proper, upon the 10th October, 1869	$1,658,894 00

This indebtedness of the Commonwealth consists of—

6 per cent. bonds which have matured and are outstanding	$35,394 00
5 per cent. bonds due and outstanding	10,000 00
6 per cent. bonds maturing in 1870 and 1872	1,119,500 00
Military bonds maturing in 1895	316,000 00
5 per cent. bonds maturing between 1871 and 1873	160,000 00
	$1,658,894 00
The balance in the State Treasury on October 10, 1868	$587,199 68
Receipts for the fiscal year ending October 10, 1869	678,505 70
Making	$1,265,705 38
Expenditures for the fiscal year ending October 10, 1869	908,921 96
Leaving balance in Treasury on October 10, 1869	$356,783 42
Add amount belonging to Sinking Fund October 10, 1869, but not transferred	51,703 03
Add amount loaned by Commissioners of Sinking Fund to revenue proper, under legislative acts	840,849 05
Add amount loaned out by Commissioners of Sinking Fund to Kentucky River Navigation Company	10,000 00
	$1,259,335 50

If, therefore, the loan made by the Commissioners of the Sinking Fund to the revenue proper, of $840,849 05, was returned, the balance in the Treasury of cash on hand, upon 10th of October, 1869, would be $1,259,335 50; which sum, if applied to the extinguishment of the outstanding indebtedness of the Commonwealth, would reduce the State debt, exclusive of the school bonds not redeemable, to $399,558 50.

To meet this indebtedness, the Commissioners of the Sinking Fund hold 789 shares in the Bank of Kentucky, which, at par, is	$78,900 00
7,000 shares Bank of Kentucky	700,000 00
In the Bank of Louisville, 406 shares	40,600 00
In Louisville, Cincinnati and Lexington Railroad, 260 shares of preferred stock	26,000 00
In Lexington and Frankfort Railroad, 2,178 shares, at 50 cents, (which is a low estimate)	103,900 00
Bond of Louisville and Frankfort Railroad	74,519 50
Stocks in turnpike roads, at par value, $2,544,359 65, estimated at cash value	254,433 96
Annual rent of Kentucky locks and dams	1,500 00
Rent of the Kentucky Penitentiary.	8,000 00
	$1,287,853 46
Deducting State debt	399,558 50
Excess of resources of Sinking Fund over the State debt	$888,294 96

The financial condition of the Commonwealth, it will be seen from this summary, is in a most healthy and prosperous condition. If our outstanding bonds were now due, and the $840,849 55 due by the Revenue Department proper to the State, were returned, our resources are more than sufficient to pay off at once the State debt.

This item of $840,849 55 was created by loans of money at different periods to supply existing deficiencies in the annual current revenue, which was insufficient to meet the ordinary necessities of the State Government.

☞ The last rail has been laid on the section of the Adirondack Railroad under contract.

Railroads of the United States.

Southern Railway.

The *Hamilton (Ca.) Times* says the charter of the Southern Railway has been sold by Mr. W. A. Thompson to Hon. Isaac Buchanan for $100,000 and that he has gone to England to raise the money to build the road in the interest of himself and the American company. The ultimate object is to make this railway an integral and consolidated portion of a great through transit route between the East and the West with a North-Western connection by means of a bridge across the Straits of Mackinaw with the upper peninsula of Michigan, and to connect ultimately with the Northern Pacific Railway. It is proposed also to form other connections, as one on a point on Lake Michigan, opposite Racine, and further to make the E. and N. Extension Railway Company available for raising thirty millions, ten millions being for the construction of the road with a tunnel across Detroit River and a bridge across the Niagara, and the other twenty millions to be applicable in promoting the North-Western connections referred to and the bridging of the Straits of Mackinaw.

Northern Pacific Railroad.

The *Seattle Intelligencer* says it has been decided to begin the work of construction on the Pacific side at Wallula, on the Columbia River, but this terminus will be only temporary, as the original design of carrying the road to Portland and ultimately to Puget Sound will be adhered to. The eastern terminus has not yet been located, but according to the terms of the charter it must be established on the shores of Lake Superior. Several points on the lake have been considered, but we have no indication which one will be finally selected. It is stated that work upon the eastern and western divisions will be commenced simultaneously. Arrangements have been made at Stockholm for a force of 7,000 Swedish laborers, who will be employed upon the eastern end of the route, while about an equal number of Chinese will be employed on the western division.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Years ending.	Railroad: Main Line.	Branch Line.	2d Track and Sidings.	Railroad in progress.	Rolling Stock: Engines.	Cars: Pass.	Cars: B. M. E.	Cars: Freight.	Companies. RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 1, 1870.

Stock Exchange and Money Market.

Money has been in more liberal supply all the week. The offerings to the street houses have shown a decided increase, especially on private account. The demand for accommodation has been on a comparatively moderate scale. Rates have been quoted rather easier for the borrowing classes, closing at from 5@7 per cent. on call, and 8@15 per cent. per annum in the discount form. The city banks, in their last weekly return, exhibited a falling off of $3,907,869 in their deposit line, with a loss of $1,648,118 in their specie average, and $318,281 in their legal tender reserve. They reduced their loans $1,738,914; and enlarged their circulation $25,534. Within a week or two, the January interest and dividend payments will add over 50 millions to the floating supply of capital, which will tend to augment the growing ease in the loan and discount market; and to stimulate the demand for the better class of securities, as reliable and lucrative forms of investment. The U. S. Sub Treasury at this port cut down its currency balance last week about 1⅜ millions, or to $7,107,745. The currency reserve of the Treasury Department at all points, on Monday was about 10½ millions. The coin balance of the Department was about 107½ millions, of which there were over 77 millions in the New York office. The city banks close the year with about 28½ millions of specie, and 44½ millions of legal tender notes, against 20¾ millions of specie, and 48⅞ millions of legal tender notes, at the commencement of the year. Their deposit line is now 177½ millions, against 180½ millions at the beginning of 1869. Their loan average is down to 251 millions, against 259 millions at the commencement of 1869. On Wednesday of this week, the call loan market showed a little more animation, and 7 per cent. was the governing rate.

The specie reserve of the city banks according to the latest return is $28,419,977, against $17,940,865 same time last year. The city bank deposits are now $177,165,586, against $178,503,752 week ending Dec. 26, 1868. The legal tender reserve amounts to $44,493,992, against $48,706,160 same time last year. The circulation now stands at $34,127,837, against $24,387,114 same time last year. The loans are now $251,096,000, against $261,342,530 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $82,244,289 a day, against a daily average of $94,250,101 the preceding week, and $90,076,553 the week ending with Dec. 11, 1869. The current week's exchanges average about $75,527,283 a day. The city banks, last week, reported a loss of $1,648,118 of specie, $3,907,869 of deposits, and $318,281 of legal tender notes. They reduced their loans, $1,738,914; and increased their circulation, $25,534.

The city bank exchanges on Wednesday were $64,580,796.

National Bank notes to the amount of $104,500 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,702,671, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,960,879, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,741,792. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,499,050; and for the public deposits, $19,291,000—making a total of $361,790,050. The Treasury Department last week redeemed and destroyed $461,200 of worn and mutilated fractional currency, and issued $692,100 of new. The outstanding amount of fractional currency on the 1st of Dec., was $38,885,565, against $37,035,442 on the 1st of November, 1869.

The U. S. Sub-Treasury receipts, week ending with Dec. 25, (which comprised only five business days,) were $2,422,526 in coin, (including $1,173,000 from customs duties,) and $3,035,332 in currency; payments, $2,029,559 in coin, (including $291,626 of coin interest,) and $4,354,399 in currency; balance at the close of the week, $86,493,121 (including $77,028,393, of coin, and $7,107,745 of currency,) against $88,749,895 at the close of the preceding week, showing a decrease of $2,256,274. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, ——— in coin, (including

$——— from customs,) and $——— in currency; payments, $——— in coin (including $——— of coin interest,) and $——— in currency. On Tuesday, receipts, $——— in coin, (including $490,810 from customs,) and $2,240,481 in currency; and payments $876,333 in coin, (including $91,400 of coin interest,) and $204,970 in currency. The balance at the close of business on Tuesday stood at $88,802,947, (including $7,286,750 of currency, and $76,063,903 of coin,) against $85,299,996 a week previous; and $87,974,694 on Dec. 14, 1869. The aggregate receipts of the office in Nov. were $67,822,747, including $9,190,801 from customs; aggregate payments, $74,780,059, including $15,992,989 of coin interest.

The outstanding amount of coin certificates on the 1st of Dec. was $36,862,940, against $28,781,520 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,014,738 of coin certificates through the receipts for customs.

Government revenues have been yielding moderately of late. The excises yielded about 3¼ millions; customs at the port of New York, $1,086,739, and at the outports about $375,000 (in coin) more, making the grand total income for the week equal to about $5,004,100 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 87 millions.

Gold has been more abundant in the open market, and having been less confidently sought after by speculators and exporters, has been depressed in price, the range of the week having been from 119¾@120¾, and the closing quotation on Wednesday 119¾. Government marketed a million of gold on the 23d of Dec., at from 120.26@120.65, and another million on the 28th, at from 120.01@120.15. The customs revenue is now on a reduced scale. The export drain is light. Another million of Government gold was to have been disposed of on the last day of the year.

It is now intimated that Government will continue its sales of gold in January.

The customs revenue of the port on Wednesday was $246,523.

The coin balances of the Government at this port on Wednesday morning, amounted to over 79 millions.

The coin interest disbursements on Wednesday were $79,867.

The customs demand for Gold last week, averaged $254,400 a day; thus far, this week, it has averaged $245,405 a day, or equal to a weekly aggregate of $1,227,025. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $15,504, and since Jan. 1, $14,749,666, against $7,013,821 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $128,230,274, against $115,558,321 same time in 1868. At San Francisco, from Jan. 1, to Dec. 18, 1869, $8,123,941, against $8,300,781 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Dec. 11, were about 82⅝ millions.

The exports of specie, from this port, last week, were $694,097, against $608,709 same week last year; total, since Jan. 1, 1869, $31,921,287, against $70,718,781 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $291,626, and since Jan. 1, 1869, $89,898,970, against $82,417,517 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Dec. 18, 1869, were $36,864,372, against $34,216,172 same time in 1868.

Foreign exchange has been quoted firmer, on a lighter offering, though the demand has not been active. The latest dealings showed renewed weakness. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108⅝@108¾, and on Paris to 5.21¼@5.17½; sight bills on London to 109⅜@109⅝, and on Paris to 5.16¼c. @5.15. The offering of produce bills has been on a moderate scale this week. The week's exports of domestic produce have been to the currency value of $3,240,911, making the total since Jan. 1, 1869, $196,019,112, against $166,784,168 same time last year.

Government securities have been comparatively quiet, all through the week, and in sympathy with the decline in gold, prices have generally favored purchasers. The offerings of bonds, however, have been quite moderate at the going rates. Government bought in on Wednesday two millions of Five-twenties at 110.78@111.25 net, out of an aggregate offering of $2,577,250, at from 110.64@111.99 net. Another million was to have been bought in on the following day.

U. S. sixes of 1881 closed here heavily at 118⅛@118¾; U. S. Five-twenties of 1862, ex-coupon, 112⅛@112¾; U. S. Five twenties of 1864 at 111⅜@111⅞; U. S. Five-twenties of 1865 at 111⅞@112⅛; U. S. Five-twenties of 1865, consolidated, 114¼@114½; U. S. Five-twenties of 1867, 114⅜@114⅝; U. S. Five-twenties of 1868, 114⅜@114⅝; U. S. Ten-forties at 108¾@109; U. S. Six per cent. currency bonds, 108¼@108¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 15.	Dec. 22.	Dec. 29.

State and railway bonds have been in fair demand, and in most instances, quoted stronger. The Western Pacific First Mortgage Loan has been nearly all sold at 90 per cent., and accrued interest. The Central Pacific Sixes closed firmly at 92½ bid, and 95 asked; and the Union Pacifics at 84 bid, and 84⅝ asked.

Railway and miscellaneous share property has been lightly dealt in, at easier and irregular figures.

Christmas Day was observed as a close holiday by business people, and Monday, Dec. 27th, as a partial holiday, by U. S. Government officials, in honor of the memory of Secretary Stanton, whose funeral took place at Washington on that day.

A defalcation has been discovered in the cashier's department of a city bank, exceeding it is said, $150,000 in amount.

General business has been quoted, and prices of produce have been unsettled. Middling upland cotton closed tamely on Wednesday at 25@25⅛ cts. per lb. The stock of cotton now here is given at about 30,000 bales. The receipts at the port this week, have averaged about 5,100 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,204,174 bales, against 951,668 bales in 1868-'9; exports, same time 644,667 bales, against 479,034 bales same time in 1868-'9; stock on hand at latest dates, 345,500 bales, against 294,000 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 20,650 pkgs., against 25,920 pkgs., same time last year. From Boston, 7,106 pkgs., against 8,213 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 10@20c., per lb.; week's receipts, 4,998. Milch cows inactive, at $40@$110 each, receipts, 70. Veal calves in moderate request at from 8@12c. per lb.; receipts, 809. Sheep and lambs in good demand at from 4@9½c., and 7½@9½c. per lb.; receipts, 24,131. Swine in slack request at 10@10¾c. per lb., all live weight; receipts, 12,037. The year's receipts have been 320,363 Beeves, 4,596 Cows, 101,677 Calves, 1,455,677 Sheep and Lambs, and 881,544 Swine.

Foreign goods have been dull and weak in price. The week's imports reached a specie value of $4,010,781.

Ocean freights have been inactive, but quoted rather firmer. For Liverpool we quote flour at 1s. 6d. by sail, and 1s. 6d. by steamer, per bbl.; grain at 4d.@4½d. by sail, and 4¾d.@5d. by steamer, per bushel; cotton at 3/16d.@¼d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@22s. 6d. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 487.

The balance in the Sub-Treasury on Wednesday was $87,384,528 83.

The New York exports, exclusive of specie, for the week ending Dec. 28, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,023,509	$3,240,911
Prev. reported	163,760,659	192,778,201
Since January 1	$166,784,168	$196,019,112

The imports for the week ending December 24, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$935,210	$1,034,343
Gen. merchandise	2,940,595	2,976,438
Total for the week	$3,875,805	$4,010,781
Previously reported	237,801,099	282,553,189
Since January 1	$241,676,904	$286,563,970

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Union Pacific 1st mort., 84¼; Central Pacific gold bonds, 92¼; Toledo, Wabash and Western consol. bonds, 79; Lackawanna and Western 1st mort., 100; Cleveland and Pittsburg consol. bonds, 84; Pacific R. R 7s, guar. by Mo., 93½; N. Y. and N. Haven 6s, 96; Toledo, Peoria and Warsaw 1st mort., W. D., 78; Ohio and Mississippi consol. bonds, 81; St. Louis and Iron Mt. 1st mort., 81¼; South Carolina 6s, new, 83; New York 7s, Bounty Loan, coupon, 110; Louisiana 6s, 71; do., 6s, Levee bonds, 64; do., 8s, Levee bonds, 84½; Alabama 8s, 95¾; Georgia 7s, 92; do., 6s, 81; Brooklyn 6s, W. ☞ FIRST CLASS SECURITIES. TANNER & CO., BANKERS, No. 49 Wall st., New York, have for sale a line of investment securities of the highest order.. Among them,

6 Per Cent. First Mortgage Gold Bonds St. Louis and St. Joseph R. R. Co., May and November.

8 Per Cent. First Mortgage Gold Bonds St. Joseph and Denver City R. R. Co., February and August.

10 Per Cent. Bonds of Marion County, Missouri, May and November.

10 Per Cent. Bonds of Monroe County, Missouri, January and July.

All of which we can recommend with the utmost confidence.

TANNER & CO.,
No. 49 Wall street, New York.

☞ THE CENTRAL RAILROAD COMPANY OF IOWA offers its First Mortgage seven per cent. Gold Bonds at 95, free of tax. Pamphlets and full information may be obtained, and subscriptions will be received at the Company's offices, No. 32 Pine-st., New York, at the Bank of North America, No. 44 Wall-st., and at Howes & Macy's, No. 30 Wall-st.

W. B. SHATTUCK, Treasurer.

Michigan Central Railroad.

The condition of this company at the close of the first six months of its present financial year, November 30, 1869, is exhibited in the following report:

INCOME ACCOUNT.

By balance of income account, per Treasurer's Report June 1, 1869..		$800,033 57
Receipts of road from June 1, to December 1, 1869		2,409,439 49
Total		$3,209,473 06
To dividend paid July 3, 1869, 5 per cent. in cash		$575,110 00
U. S. Government tax on dividend	$27,161 75	
U. S. Government tax on receipts	25,991 51	
		53,153 26
Operating account, exclusive of interest and exchange accounts, from June 1, to December 1, '69..		1,549,005 05
Interest and exchange account		243,390 65
Balance to new account		788,814 10
Total, as above		$3,209,473 06

The foregoing account shows the net receipts of the road for the six months ending 1st inst., after deducting operating, interest, and exchange accounts, to be $617,043 79. Deducting $53,153 26, amount paid for Government taxes, the balance is $563,890 53. Adding the balance to the credit of this account, June 1st, $800,033 57 less the July dividend, $575,110, the amount to the credit of income account is $788,814 10.

The gross earnings show an increase over those of the corresponding six months of 1868, of $44,003 80; but the net earnings show a decrease of $73,788 84, owing to the fact that for five months, from the great competition, westward freight was carried at less than the cost of transportation.

The bonded debt having been decreased by the conversion of bonds to stock, now amounts to..	$4,030,988 89
The capital stock having been increased by the said conversions, amounting to $1,122,500, now amounts to	12,319,848 00
Total	$16,350,836 89

The sum invested in the Sinking Funds amounts to $1,375,593 49, which, taken from the amount of the bonded debt as above, $4,030,988 89, leaves the net bonded debt, $2,655,395 40.

The bonds of the company payable Oct. 1, 1882, are convertible to stock upon presentation at the office of the company on the 1st of January of any year—according to their tenor—and at other times at the option of the company.

A dividend of five per cent., clear of Government tax, has been declared by the company, payable January 3, 1870.

☞ The Chicago and Michigan Lake Shore Railroad is completed five miles north from New Buffalo, and fourteen miles south from St. Joseph, leaving eight miles of track to be laid before these two towns are connected. This distance will undoubtedly be finished by the 15th inst. This road will go to Muskegon *via* Coloma, Watervliet, Hartford Centre, Bangor village and Saugatuck.

☞ The Tennessee and Pacific Railroad, extending from Nashville to Knoxville, is being pushed forward rapidly. It is calculated that the first thirty miles will be entirely completed by the first of May next, so that cars will be running to Lebanon.

☞ The first section of the Chicago and St. Paul Railroad, from St. Paul to Hastings, 20 miles, has been completed. It is operated by the Milwaukee and St. Paul Company, which runs one train a day over it.

☞ One per cent. of the interest on the Virginia State bonds, both coupon and registered, due January 1, 1870, is to be paid on that day, by order of General Canby.

☞ The Central Railroad, of Iowa, has been completed to Marshalltown, there connecting with the Dubuque and Sioux City and Northwestern lines.

☞ John L. Caldwell has been appointed Superintendent of the Maryland and Delaware Railroad, and will enter on his duties on January 1st.

☞ Trains now run on the St. Paul and Sioux City Railroad as far as Lake Chrystal, about 15 miles southwest of Mankato.

☞ Work on the St. Paul and Pacific Railroad has been suspended for the winter.

Great Western Railway of Canada:

The committee of English directors of this company, now in this country, after thoroughly examining the road, recently held a meeting with James F. Joy, president of the Michigan Central road, and other prominent American railroad officials connected with the central route. The result was, Mr. Joy obtains a controlling influence over the affairs of the Great Western road, also over the Detroit and Milwaukee road, which was also included in the arrangement. The office of managing director, now held by Mr. Swinyard, is abolished. William K. Muir, present Assistant-General Superintendent of the Michigan Central road, has been appointed General Superintendent of the Great Western road. He assumes the duties of the office on the 1st of January.

Cumberland Valley Railroad.

The earnings of this road for the years ending September 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$208,206 56	$191,831 76
" freight and express	250,007 01	326,053 85
" mail	6,300 00	6,107 24
	$564,513 57	$523,992 85
Expenses, viz:		
Motive power	$105,638 48	$77,028 75
Conducting transp.	86,278 39	93,451 07
Maintenance of way	69,642 00	90,371 46
Maintenance of cars	11,907 02	12,543 80
General expenses	11,302 32	11,362 94
Construction & equipm't	107,649 05	62,318 62
	$392,417 26	$347,076 64
Net earnings	$172,096 31	$176,916 21

The receipts of the company from all sources during the years named have been as follows:

	1868.	1869.
Balance from previous year	$231,722 33	$312,155 04
Earnings as above	564,513 57	523,992 85
Other sources of revenue	12,551 15	15,776 89
Materials	12,599 53	.....
Stock issued	.....	200,395 00
Total	$821,386 58	$1,052,319 28
Expenditures, viz:		
Dividends	$87,277 00	$94,438 53
Interest on bonds	25,832 60	27,557 10
Expenses as above	392,417 26	347,076 64
Construction of Potomac Extension	.....	23,967 77

Balances of accounts	21,413 94	28,240 45
Cash, October 1	290,701 10	136,048 79
Total, as above	$821,386 58	$1,052,319 28

We have great reason to congratulate you that your road and interests have greatly improved during the past year, and that its prospects of usefulness to the community and profit to you are now brighter than ever. The march of progress in enterprise and industry which now stimulates the energies of men, has produced its influence and brought into requisition the facilities which your road affords. We continually receive manifestations of appreciation of the community of the facilities which the road affords, by giving employment to a large class of men, and affording business to another class whose enterprise and business habits are not only profitable to them, but of great importance to the community. Such men and their business we look upon with interest, and seek to promote it by all legitimate means. But like all other corporations, we have been subjected to the angry passions of others, who resort to suits at law to heal their supposed wrongs. We have reason to congratulate ourselves and you, that such litigation has now been all brought to an end, to the entire satisfaction of the company, whose action has not only been sustained, but has been commended by the Supreme Court. Our policy, which we have always been careful to keep within our chartered limits, and to make subservient to public interests, has been steadily and perseveringly carried out, and will be, until the road shall work its greatest good to the community and greatest profit to the stockholders.

In our last annual report you were advised of our purpose to encourage the construction of the road of the South Mountain Iron Company by an advance of two hundred thousand dollars to aid that enterprise. This money has been advanced and paid, and perfectly secured; the road has been fully completed, and large preparations have been made by that company to mine iron ore, which will be sent over, and greatly increase the amount of tonnage on our road; we have every reason to believe that this will prove to be a most profitable investment.

The large increase in the manufacture of iron, and the consequent demand for iron ore, has served to develope immense deposits of it in the vicinity of our road, not only along the base of the South Mountain, but in the valley, and in the North Mountain. Hence there is being surveyed and located a road from Chambersburg to Mont Alto, a distance of about 12 miles, which reaches a deposit of hematite ore, which in quality is excellent, and in quantity apparently inexhaustible. This road will doubtless be built during the coming year.

The South Penna. Iron and Railroad Company also contemplate to build, during the coming year, a road to their mines near Loudon, in Franklin county, starting from our road at a point about six miles above Chambersburg, near, Marion Station, and to erect two anthracite furnaces at their mines. It will be the policy of our company to encourage both these roads by all the legitimate means in our power, for each will greatly contribute to increase the business of our road, and promote the interest of the people of the entire valley. The resolutions of the Board to extend their road from Hagerstown to the Chesapeake and Ohio Canal, have been already communicated to you, and since August last the work was let to a contractor upon terms which were satisfactory, and he is now engaged in constructing it; the grading and making the road-bed ready for the superstructure will cost about $96,000, and the rails, ties, water stations, &c., about $90,000, and we expect to have the same completed and in running order by the 1st July next. This extension has been located to terminate at Powell's Bend of the Potomac river, with a branch to Williamsport, a distance of about two miles. But since this location, a movement has been made by the people of Virginia for a further extension of the road up through the valley of their State, by the way of Martinsburg and Winchester, or by the way of Charlestown and the Luray valley. Our action, therefore, as to the terminus on the Potomac will be suspended a few weeks to meet this exigency, and until they shall have determined the route for the further extension of the road; for each of the proposed routes demands a different point of crossing the Potomac river.

It has been the policy of the Board to put and keep our road in the highest state of perfection, hence our expenditures in the past year has been great; the entire track has been raised upon stone ballast, and there have been put into it five hundred and thirty-five tons of new iron, twenty-five thousand nine hundred and seventy-two oak cross ties, and two thousand three hundred and eighteen chairs. There have been laid sixteen hundred feet of new siding at Mechanicsburg, ten hundred and eighteen feet at Middlesex, two thousand feet at the junction of the South Mountain Railroad, five hundred and ninety-two feet at Carlisle freight house, fourteen hundred and fifty feet at Greason station, two hundred and thirty-one feet at Alterton, four hundred and nineteen feet at Newville, and five hundred and ninety-three feet at Greencastle, making a total of one and a half miles, and all of which cost six thousand one hundred and forty-one dollars and thirty cents. Seventeen wooden bridges over wagon roads and water courses have been taken out, and replaced with wrought iron girder bridges, which cost, including masonry, four thousand four hundred and eighty six dollars and five cents. Six eight wheeled freight cars have also been built, six eight wheeled and one four wheeled car purchased, which cost five thousand six hundred and seventy-one dollars and eighty-four cents; there has been expended for a new locomotive engine, which will be finished in a few weeks, seven thousand eight hundred and seven dollars and forty-three cents. Thus it will be seen that the expenditures of the year, which do not properly belong to working expenses, have been:

New locomotive engine, built in our own shop	$7,807 43
Grading and laying new sidings	6,141 30
Iron girder bridges and masonry	5,486 05
New freight cars, and cars purchased	5,671 84
Real estate purchased	140 00
Ballasting	37,072 00
Paid on account of Williamsport extension	23,967 77
Total	$86,286 39

Anticipating a largely increased trade upon our road during the coming year, we will require the freight engine which we proposed to purchase last year, but did not, because of our heavy expenditures for other purposes. We will also need some additional tools in the shop; eight hundred tons of new and re-rolled iron, and twenty-five thousand cross ties. At Shippensburg, an important point of shipment of iron ore, additional siding is required, and every facility should be furnished to cheapen the transportation of this article, which will be a most important item of revenue.

If it be not deemed expedient to change the point of the terminus of the extension to the Chesapeake and Ohio Canal, this work may be completed by the 1st July next, when provision must be made for the increased trade which it will produce. Reaching with our road that important point, we must be prepared to carry anthracite coal for the supply of furnaces upon the Potomac, lumber to that extensive agricultural region, and bring back the semi-bituminous coal of the Cumberland mines to supply the engines and shops in the East. For this work we must now get ready, and it will require at least seventy-five new eight wheeled freight cars. We propose to build one new passenger car this year. It does not require much foresight to enable us to predict that before many years, the business to be done on our road will require a double track, and a prudent management suggests that this should be attained out of the profits of the road, and that the work should be done gradually, without interfering with the usual dividends to stockholders. And for this purpose it is suggested that we should now begin to double track the road from Mechanicsburg to Whitehill, a distance of four and seven-eighth miles, a point to which the road is already double tracked—from Bridgeport. The expense of this would be:

429 tons 56 lb. rail, at $75	$32,174
2,145 splice joints, at $1 50	3,218
11,700 cross ties, at 55 cents	6,435
23,400 lbs. spikes, at 5½ cents	1,287
Frogs, switches, and switch timber	750
Grading culverts, and cattle guards	6,000
11,700 perches stone ballast	11,700
Laying 4⅞ miles of track	1,800
Total cost	$63,364

This addition to our road would greatly facilitate even our present business; but when we contemplate the increase which the South Mountain Iron Company will in the next year bring to our road, such a facility for passing trains seems to be indispensible. The coming year will doubt-

less find both the Mont Alto and Loudon roads nearly, if not entirely completed.

The company have 16 locomotives. Miles run with passenger trains, 133,530; with freight trains, 93,016; with construction trains, 16,384—total miles run, 242,960. Passengers carried east, 151,488; do., west, 156,725—total, 308,213.

STATEMENT, OCTOBER 1, 1869.

President.—FREDERICK WATTS.

Directors.—Frederick Watts, Thomas A. Biddle, Thomas A. Scott, Washington Butcher, Wistar Morris, H. J. Lombaert, Daniel O. Gehr, Thomas B. Kennedy, Edmund Smith, J. Edgar Thomson, Josiah Bacon.

Secretary and Treasurer.—EDWARD M. BIDDLE.

Superintendent.—O. N. LULL.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JUNE 30, 1869.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been		£674,621
Deduct—the ordinary working expenses (being at the rate of 67.59 per cent., against 65.98 of the corresponding half of last year)	£455,958	
The renewals, &c., of the permanent way and works in the half-year debited to revenue.	77,039	
		532,997
Leaving an available net balance earned in the half-year of		£141,624
Deduct—Loss on American currency		24,841
		£116,783
From this sum has to be deducted the amount of postal and military revenue due for the half-year to the Postal bondholders of		17,206
Leaving the balance of		£99,577
Applicable to the following payments, viz:		
Interest, &c., paid on lands	£1,930	
On mortgage to Bank of Upper Canada	4,423	
On loans, bankers' balances, promissory notes, European exchange, &c	5,411	
On British American Land Company's debentures	616	
On Montreal Seminary debentures	616	
On Island Pond debentures	2,700	
Half-yearly instalment on Portland Sinking Fund	2,577	
		18,276
Atlantic and St. Lawrence lease (in full)	32,210	
Detroit lease (in full)	11,250	
Montreal and Champlain	8,305

Comparing the results of the half-year's working with the corresponding period of 1868, there is an increase in the gross revenue of 27,824*l.* The aggregate expenses for the half-year, apart from renewals, amounted to 455,959*l.*, as against 426,771*l.* for the corresponding six months of 1868. The engineer's report shows that no less a sum than $40,000 was spent in "extra labor" alone in clearing the line from the vast accumulation of snow which had fallen during the storms, and the extra cost to which the locomotive and car departments were subjected in their battles with the elements justifies the statement that from these various causes an additional sum of 20,000*l.* was spent beyond the expenditure of ordinary winters. The snowstorms of the last half-year are estimated to have cost the company not only an additional expenditure of 20,000*l.*, but an estimated loss of traffic of 40,000*l.*, of which latter sum 40 per cent., or 16,000*l.*, would have been profit, thus making together an aggregate loss of net profit of 36,000*l.*, which would otherwise have been added to the results actually shown.

The cost of fuel was less by 1,800*l.*, although there has been an increase of 132,868 train miles run.

The average receipts from passengers in the half-year was 6s. 9d. per head, against 6s. 8d. and 16s. 6d. per ton of freight, against the same amount in the corresponding period of last year.

The charges for renewals amounted to 77,039*l.*, against a total charge in the corresponding six months of 67,403*l.* Included in the above charge for the half-year was 14,519*l.* for extra weight of rails as compared with the weight of old rails released. The weight of the rails laid was 75 lb. to the yard; and the number of miles actually relaid 62¼.

The loss on American currency was 24,841*l.*, against 18,882*l.* in the corresponding period of 1868, the proportion of receipts in that currency having been greater than in 1868, and the rate having fluctuated during the half year between 130¾ and 149.

[A table here shows the gross and net earnings from 1861 to last June in mixed currency and gold, and also the expenditure in renewals, and the direct loss sustained by the company by the depreciation of the American currency. The yearly profits, in sterling, have been as under:—1861, 142,492*l.*; 1862, 155,674*l.*; 1863, 288,414*l.*; 1864, 271,074*l.*; 1865, 221,877*l.*; 1866, 364,999*l.*; 1867, 218,231*l.*; 1868, 266,511*l.*; and for June 1869, 116,783*l.* In the half-year June 1864 there was no loss by discount on American currency, as the "greenbacks" were employed in the purchase of Portland bonds maturing in 1866 and sold in England. The total amount charged against revenue for renewals between 1862 and June 1869, is 984,848*l.*]

The experience of all railways on the American continent has proved that iron rails, as now manufactured, do not stand the strain of a heavy traffic, and they are, of course, more severely tried in the northern climate. All the trunk lines are now renewing the heaviest worked portions of their roads in Bessemer steel rails, they having found that the best iron rails obtainable do not last more than an average of five years, and in most cases considerably less. The directors have decided in future to relay those parts of the main line where the traffic is heaviest and the climate more severe with Bessemer steel, and they will next year send to Canada 5,000 tons of these rails. The other renewals will be continued, for the present, with iron re-rolled in Canada and the United States.

The entries in the capital statement simply bring into the account the discount on Postal bonds sold, and charges which have hitherto been standing in suspense, and against which the balance of the net revenue account for 31st December last—viz., 27,877*l.*—has been credited. Capital is in debt to revenue, and no working capital exists to carry the whole of the stock of stores, fuel, &c., amounting as per the balance-sheet to upwards of 200,000*l.* The completion of the ballasting of the line, which is urgently needed, would tend materially to lengthen the life of the rails. The rolling stock is now worked to its full capacity, and large quantities of traffic are every year refused, from the inability of the company to carry it. Until the capital already authorized be provided for these purposes, the company cannot be placed in the successful position which existing circumstances fully open before it.

The growing confidence entertained towards the company in Canada, has been manifested by the capital subscribed at Montreal to supply to a moderate extent the deficiencies in the rolling stock. Five hundred box cars have been already contracted for, and it is hoped that this local capital will provide a further quantity of 200 cars, at a total cost of about 115,000*l.* This will be valuable aid, both as regards the extra traffic it will produce and the evidence it affords of the interest taken in the railway in Canada; but it cannot be carried beyond a limited extent, and in a country where capital is so scarce can only be obtained upon comparatively high terms. There is no doubt of the fact that ample traffic exists to give a large average increase to the weekly receipts, and it is equally true that the present rolling stock is not sufficient, at the current rates of carriage, to add materially to the present gross returns. The local rates upon the line are regulated by a tariff which varies with the season, and they are raised at certain regular dates, as the river and lake navigation becomes more costly and difficult, until at its final close at the end of November, they attain their maximum. The "through rates" depend partly upon the price of Western produce and mainly upon the action of competitive lines of railway from the West to the Atlantic cities. During the whole of the year 1869 these through rates have ruled considerably lower than in 1868, and in 1868 they were below the rates current in 1867. Although the rates were raised in the latter weeks of October to something like the higher standard of 1868, they are still 10 per cent. below that standard, and the higher tariff which was confidently expected in the early part of November was, in all probability, arrested by the breakdown of the prices of produce at Chicago and throughout the West. The weekly returns of gross receipts have consequently shown a less increase in proportion to the quantities carried; indeed, it may be safely stated that in consequence of the low rates of the current year, as compared with those of last year, an average increase of above 2,000*l.* per week has been lost to the company.

In the last report the directors referred to the maturing debt of the Atlantic and St. Lawrence, and they are glad to be able to state that the arrangements of all the questions relating to that matter are progressing in a satisfactory manner, and that the overdue second mortgage bonds mentioned in the last report have been provided for.

The directors are happy to report that an agreement has now been completed between the Buffalo and Grand Trunk boards, subject of course to the approval of the proprietors of both companies. Special meetings will be held for the purpose of obtaining such confirmation. The terms of the agreement thus recently settled will be circulated in ample time for full consideration by the bond and stock-holders before the special meeting is held, and of which due notice will be given. It has been arranged that the agreement shall be approved by the shareholders of the Buffalo before the Grand Trunk proprietors are asked to ratify it.

The directors are further happy to announce that they see every prospect of being able to pay the interest for the current half-year on the first preference bonds.

Mr. Richard Potter, the president of the company, returned from Canada on the 4th instant, and at the adjourned meeting on the 17th instant will give the proprietors, further information upon the condition and prospects of the undertaking.

☞ The first section of the Oregon Central Railroad from Portland southward 20 miles, has been completed.

☞ The Leavenworth, Lawrence and Gulf Railroad now runs to Ottawa, twenty-eight miles from Lawrence, Kansas, but it is being built rapidly to the line of the Indian Territory. This road was built by Mr. D. L. Wells, of Milwaukee, who is now engaged in laying track upon it, beyond Ottawa. It is said that permission has been granted by the Cherokees for the extension of this road through the Indian Territory.

☞ The Missouri River, Kansas City and Gulf Railroad is now built from Kansas City south to Fort Scott, a distance of 110 miles. By the 1st of January it will be opened 25 miles further. This road is designed to pass through the Indian Territory, through Texas, and find an outlet at Galveston, on the Gulf of Mexico.

☞ A new survey of the proposed railroad from Youngstown to Ravenna, Ohio, passing through the Austintown coal fields, has been made by Civil Engineer Mesersmith. The route pursued runs in nearly a direct line from the Pittsburg depot, crossing the Mahoning river to the foot of Cemetery Hill.

☞ A consolidation scheme has been agreed upon, whereby the Portland and Kennebec, the Somerset and the Maine Central Railroads, with their branches and connections, are to come under one management, the arrangement to take effect in January.

☞ The State of South Carolina will pay the interest on her State debt falling due on January 1st, in gold coin, on demand, either at the State Treasury or at its financial agency in New York.

☞ The coupons of the Arkansas State bonds, falling due Jan. 1, 1870, will be paid on presentation at the American Exchange National Bank, New York.

Important Improvement for Railroad Companies.

Beebe's attachment for starting and stopping Cars on gum or spring action, mettal box is let in to the platform which is grooved or tongued inside; fitted in it to slide is the coupling with a vertical pin, acting against rubber or gum or equivalent at each end of the box: this is intended for his cross bar coupling or as the cars are now used with single link. Models may be seen at the office of the inventor. For sale by A. BEEBE, 78 Cedar st., N. Y.

Dividend Notice.

ROME, WATERTOWN AND OGDENSBURG RAILROAD,
VICE PRESIDENT'S OFFICE, No. 12 COLLEGE PLACE,
NEW YORK, Dec. 22d, 1869.

THE Board of Directors of this Company, have declared a semi-annual dividend of (5) five per cent. free, payable on and after the 15th January proximo. Transfer books will be closed on the 25th inst., and so remain till date of payment. Stock registered in New York, will be paid at the Mercantile Bank for a period of sixty days

THE WHARTON
Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, January 8, 1870.

An Undoubted Security.

Many persons, having at this time more or less surplus funds, are seeking information as to the *best* investment. Railroad Bonds, if well secured, are generally considered the best form of security now in the market. The Chicago, Danville and Vincennes Railroad, whose First Mortgage Bonds are advertised in another column, seems to be one which invites the closest examination, and grows in favor upon intimate acquaintance. In the first place, the name of the General Agents for negotiating the Bonds is a strong recommendation. For forty years in Boston and twenty years in New York, W. Bailey Lang & Co. have been the agents of a number of the most extensive and noted railroad iron makers in the world. In that capacity they have acquired an intimate and practical acquaintance with every part of railroad building and requirements, which is invaluable in enabling them to judge beyond question of the character and market value of any railroad work. They have, during all these years of successful trade, been honorably distinguished as a house of sagacity, energy and integrity, and their unqualified endorsement of a railroad enterprise means that there is no sham in it from top to bottom.

In the next place, their railroad has some very strong and convincing advantages. It is to be 140 miles long, running southward from Chicago through the eastern tier of counties in Illinois—a region with a large population, a rich soil, widely spreading coal fields, and rich deposits of superior iron ore, all of which will find, in this road, the shortest and cheapest route to profitable market. The road will cost $4,500,000, and is reasonably expected to earn over $2,600,000. More than $2,000,000 capital stock has been paid in, and to provide the additional means required to finish the line (55 miles are already in operation,) the Company have mortgaged their road, (the Union Trust Company of New York being official Registers,) to secure the payment of First Mortgage Bonds, at $18,000 per mile, the sale of bonds to follow the completion of the road. The bonds run 40 years, and pay 7 per cent. gold interest, and any holder of Government Bonds may make a handsome present profit by exchanging them for the C., D. & V. 7-40's, beside realizing thereafter the high rate of interest. The bonds are offered, for the present, at 95 and accrued interest, at which price they pay nearly 10 per cent., and we are not at all surprised at the prominence which they have taken among railroad securities.

Postal-Telegraphy.

The new postal-telegraph bill of Gen. Washburn, now awaiting the approval or disapproval of Congress, proposes the adoption of certain measures that, if tried, would be productive of either a great deal of good or a great deal of injury to the business interests of the country. The bill provides for the trial of a plan of telegraph reform similar to that lately adopted in England, by which the Government shall take possession of the lines and assume their control, through a bureau of management to form a part of the Post Office Department. It is of the greatest importance that a measure proposing such radical changes should be thoroughly understood by those whose interests it most directly affects. The main idea of the bill is embodied in a provision that the Government, at a fixed period, shall assume the proprietorship of all the lines in the country, and is based on the Telegraph Act of 1866, by which Congress invested itself with the right to take possession of the Western Union and all other lines, and to which the telegraph companies gave an enforced assent in order to secure terms as favorable to themselves as possible. It is this assumed right which Mr. Washburn's bill is designed to enforce. The first section enacts that, after July 24th, 1871, it shall be unlawful for any person, except those employed by the Post Office Department, to transmit telegrams or receive payment for their transmission. The second section provides for the appraisal of existing telegraph lines and property, pursuant to the act of 1866, and their purchase by the Post Master General, subject to the approval of Congress. The bill further provides for the establishment of a bureau in the Post Office Department, with an organization similar to that existing under the *regime* of the Western Union Company. The machinery for taking charge of and operating the lines can, it is claimed, be in complete readiness within a year and a half; and after July 24th, 1871, a uniform stamp tariff of twenty cents is to be charged throughout all parts of the United States for messages of thirty words, or less, including date, address and signature, and one cent for each additional word. Large reductions on these rates are to be made for press reports, and no franks are to be allowed. Another abuse of the present system is to be corrected by providing for the transmission of all messages in the order received, with the single exception of Government dispatches, which are to have priority over all others. The Post Master General is also to be authorized to place at the exclusive disposal of the newspaper press a certain number of wires deemed sufficient for its purposes. The extension of telegraph facilities in small towns and villages is provided for by the bill, and also a telegraph money-order system which is to be at once put in operation. Secrecy of messages is enjoined under heavy penalties for divulging or giving any information concerning their purport. Lastly, it provides that officers, clerks and operators shall be removed only for cause, and that promotions to vacancies shall be made in regular order, and not for political purposes.

In many respects the reforms provided for in this bill are very desirable; but whether it is possible to effect them by the adoption of the meas-

ures proposed is a question which should be decided before a trial of the costly experiment is made. Considered practically, there are many serious objections to be urged against the scheme, which more than outweigh its apparent advantages; and, in view of the obstacles in the way of successfully establishing a system of postal-telegraphs in the United States, Congress would do well to leave the business entirely alone, for the present at least. In the first place, the Government cannot afford to incur the heavy expense involved in purchasing the lines and property of the companies. The debt of the country is already greater than its industries can bear, and no measure necessitating increased taxation, either direct or indirect, unless absolutely demanded, should receive the sanction of Congress. But even if the Government could afford to try the experiment pre-supposing a success which, under the circumstances, would be extremely doubtful, there is no guaranty that the business of transmitting messages would be done any better than it is now, or more cheaply unless done at a loss. On the contrary, there is every reason to believe that the business of the lines would be transacted with much less accuracy and precision than at present; and should this prove true, the most disastrous results would follow. The business community would have no security against errors and delays in the transmission and delivery of messages, and if one error should occur in the business of the Telegraph Bureau for every ten that occur in the Post Office Department, the wires would cease to be a trustworthy medium for the transaction of important business requiring unfailing accuracy and promptness, and involving, in some cases, a gain or loss of many thousands of dollars. Private corporations, such as the Western Union Company, can be held strictly responsible for the proper fulfilment of their contracts with the Senders of messages; but, as in the case of registered letters that miscarry or are lost, after the payment of special rates to insure them safe delivery, the Government officers would, doubtless, disclaim all responsibility for the delivery of dispatches, and any attempt to hold them personally or officially accountable would involve years of costly litigation without being any satisfaction to the injured parties. It is moreover probable that, notwithstanding the provision of Gen. Washburn's bill to the contrary, the efficiency of the Telegraph Bureau would be greatly marred by its periodical "re-organization" under each incoming administration, and that the dangerous and demoralizing political influences which have hitherto prevented the organization of a permanent and efficient civil service in the United States would, sooner or later, fill the offices of the bureau with men whose qualifications were a consideration of secondary importance to the political strength of their "backers." Altogether, the experiment is a dangerous one. What could be saved to the few who would avail themselves of the facilities offered by the telegraph, would be made up from the pockets of the taxpayers of the nation, by whom, as a class, no benefits would be gained. The time may come when such a scheme can be very properly discussed, but it is now neither practicable nor desirable, and we hope Congress will so regard it.

We have here endeavored to point out a few of the many objections to the postal-telegraph project regarded from a purely practical stand point. But there are other considerations which should be taken into account. The adoption of the measures proposed in Gen. Washburn's bill would not only be unwise and impolitic, but directly at variance wtth the principles on which our Federal Government is founded. The same arguments urged in support of the arbitrary purchase of the Telegraph lines, would apply with equal force to the purchase of the railroad system of the country, which has been gravely urged by certain so-called Statesmen who believed that the interests of the United States would be furthered, and its development facilitated by giving the Government control of all the avenues of trade and travel. All schemes for centralizing the political and material power of the country are dangerous, and the press and public should be cautious in yielding assent to such measures, whatever may be the evils they are designed to reform.

Boston and Lowell Railroad.

The receipts from operations of this road for the fiscal year ending September 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$401,367 91	$444,380 41
" freight	534,011 74	586,756 83
" mails & express	21,764 39	23,667 83
	$957,144 04	$1,054,805 07
Expenses, viz:		
Repairs of road	$128,285 43	$152,885 44
" equipment.	125,517 23	148,620 79
" bridges	14,973 95	18,834 45
" structures.	61,279 93	47,395 66
Fuel	93,185 92	96,042 55
Wages	160,380 00	172,338 75
Miscellaneous	37,365 75	34,296 84
Advertising, etc	5,346 20	6,432 92
Taxes and insurance	33,446 83	70,240 69
Gratuities & damages.	4,893 38	4,451 17
Oil and waste	12,041 71	15,318 74
Removing snow & ice.	2,219 59	1,527 72
Rents	43,069 39	41,124 06
	$722,005 31	$809,509 78
Net earnings	$235,138 73	$245,295 29
To which add accumulations of interest upon the sinking fund		19,358 54
Total net income		$264,653 83
From which deduct—		
Interest	$18,862 66	
Interest on scrip	21,960 00	
Dividends	175,280 00	
Charged Trustee sinking fund	19,358 54	
		235,461 20
Balance, transferred to Contingent Fund		$29,192 63

This account has been an open one from the first construction of the road, under various names, of surplus, reserves, &c., receiving from year to year the excess of earnings over and above expenses and dividends, or furnishing means for keeping up the average dividend when the earnings fell short. It was drawn upon for this purpose in 1842, '43, '49, and 1859, for sums amounting in the aggregate to $201,029 69. In 1867 there was withdrawn from it a scrip dividend of $366,000, payable to holders of old stock, and due in 1873. The money representing this dividend is among the assets of the Trustee of the sinking fund. Contingent fund now stands credited with a balance of $221,255 42. A small portion of this sum is invested in the sinking fund, and the remainder is in the working materials and surplus lands of the corporation.

At the time of the construction of the present passenger station of this corporation in Boston, and the new bridge and tracks connecting it with the old line at East Cambridge, the corporation issued $440,000 of six per cent. bonds, payable in 1873, or convertible into stock, at the option of the holder. To secure the payment of these bonds, in case of their non conversion, a sinking fund was ordered to be created, by transferring from the earnings of the road to the hands of a Trustee, semi-annually, one-half of one per cent. on the capital stock. This accumulation, being put on interest, would be more than sufficient to take up the bonds at maturity.

In 1867 the bondholders commenced to avail of their right to convert their bonds into stock, and up to the present time have exchanged $365,000, leaving only $75,000 outstanding. As the stock is above par, is not subject to individual taxation, and has yielded a better rate of interest than the bonds, it is probable that the entire balance will be converted within a short time. When this is done, the sinking fund will not be required for its original purpose, but may be otherwise disposed of. In view of this probability, and for the purpose of equitably restoring to stockholders the earnings withheld, your Directors decided, in 1867, to divide from this fund 20 per cent. upon the old capital stock, payable in 1873, either in money or new stock, as might be hereafter ordered. The scrip for this dividend is attached to the certificates of old stock, and bears interest at the rate of three per cent. per annum. The semi-annual payments to the sinking fund are, however, still continued, and it will stand charged on the first day of January, 1870, with about $390,000.

The joint working of the Boston and Lowell and Nashua and Lowell roads has produced results highly satisfactory to both parties.

The road and bridges, buildings and equipment of this corporation have been greatly improved in their general condition, besides the addition of much valuable property and rolling stock.

In 1857 the capital and debt of the corporation was	$2,268,920 00
In 1869 the capital and debt of the corporation was	2,570,000 00
Increase	$301,080 00

The additions made to the property of the company in the same time, over and above the renewal and improvements to property owned in 1857, may be stated in round numbers at $705,000.

At the last annual meeting, the Directors stated their intention to apply to the Legislature for power to take land in Boston for the purpose of enlarging the depot facilities. Such application was made, in conjunction with the Eastern Railroad Company, and a grant was obtained, covering all the land lying between Andover and Lowell Streets and Causeway and Minot Streets. The Act authorizes its appropriation at any time within three years, and provides for an award of Commissioners upon its value, in case the parties cannot agree. The area of land covered by the grant is about eight acres. Its assessed valuation for taxes, in 1868, was about $700,000. The proposed arrangement with the Eastern Railroad contemplates a sale to them of our present passenger station and bridge, and about four acres of land in Cambridge; also, that they will take a part of the new land covered by the grant.

Our grounds in Boston now provide the metropolitan terminus for about 900 miles of railroad. From every part of this 900 miles cars are sent to our station. The equipment of this great connected line amounts to about 225 locomotives, 175 passenger cars, 80 baggage cars, and 5,000 freight cars. Our freight yards and houses are at present no more than ample to accommodate the large traffic thus brought to us, notwithstanding the great enlargement made in 1864, while our passenger stations and grounds are already wholly inadequate to the demands of the business.

Unless some national calamity shall again bring

the industry of the country to a stand, we may reasonably expect that a business which has doubled in the last ten years, will continue to largely increase in the future.

With a view, therefore, to an efficient performance of the work already in hand, as well as to a prudent provision for the future, while room is within our reach, your Directors recommend that the corporation now accept the Act referred to—a copy of which is hereto appended; and that the Board be authorized to proceed to locate and purchase, or take, land under it, whenever and so far as in their judgment the interests of the corporation will warrant, and to construct suitable buildings and terminal facilities thereon, when satisfactory contracts relating thereto can be concluded with the adjacent or connecting roads.

The resources of the corporation applicable to the construction of enlarged facilities, are: First, the proceeds of sale of our present passenger station and grounds in Boston, the passenger bridge, and some of our lands in East Cambridge. Second, the money now held as a sinking fund, if the scrip dividend should be paid in stock, or the proceeds of sale of a corresponding amount of stock, in case it should be decided to pay that dividend in money. In either event, it may be safely assumed that the capital and liabilities of the corporation are not to be increased by the outlays beyond the aggregate of the now existing stock, debt and scrip.

This aggregate is as follows:

Old capital	$1,830,000
Bonds converted and convertible to st'k	440,000
Scrip dividend represented by stock	366,000
Total stock	$2,636,000
Bonds of 1879 and floating debt	300,000
Total investment	$2,936,000

To realize 8 per cent. on this amount of stock, and pay interest on the debt, will require net earnings to an amount of $229,880.

The total receipts of 1869, exclusive of accumulation of sinking fund, were	$1,054,805 07
The total expenditure and rent payments of 1869, exclusive of interest, dividends, and sinking fund instalment, were	809,509 78
Net balance	$245,295 29
The net balance of 1868, on same basis, was	$235,138 73
The net balance of 1867, on same basis, was	237,598 05
The net balance of 1866, on same basis, was	243,529 05

It appears, therefore, that in each of the last four years, even while large outlays were being made for renewals, the net earnings have been sufficient to pay at least an 8 per cent. dividend on all the capital required for carrying out the enterprise.

The Woburn Branch, the Lowell and Lawrence, the Salem and Lowell, and other connections, operated jointly by this corporation with the Nashua and Lowell Railroad corporation, continue to yield satisfactory results.

Since the last annual meeting, the Directors have had occasion to consider the expediency of purchasing the Stoneham Branch and the Lexington and Arlington Railroads.

The Stoneham Branch has been operated by us since its opening in 1862. The business upon it has steadily increased, bringing to us and yielding a profit over ten miles of our trunk road, a traffic that had never before reached us. It is now offered to this corporation at a very large discount from its cost; and, believing it for our advantage to own rather than to lease the property, your Directors have concluded a conditional purchase, subject to your approval and ratification.

The Lexington and Arlington road has, for some years, been in the ownership of a few individuals, holding it for private speculation, with power, under legislative authority granted in 1864, to sell it to any railroad corporation in the Commonwealth.

Diverging from the Fitchburg Railroad, in Cambridge, it extends to the village of Lexington, 10 miles from Boston, and on the line of a contemplated rival road to Lowell. The Legislature of last season granted an Act for its extension to Bedford, and notice was lately published of an intended petition for authority to extend it to Lowell. As that part in operation is earning a respectable return, and enters a country capable of great development, your Board deemed it highly desirable, in the existing aspect of the matter, to secure its purchase for this corporation, in accordance with the legislative authority already existing. Gentlemen connected with our road have therefore taken it into their hands, and it will be offered to you at cost, at the annual meeting.

We recommend, not only its purchase, but that measures be authorized for connecting it with our main line.

TREASURER'S BALANCE SHEET, OCTOBER 1, 1869.

Road bed		$453,117 14
Superstructure		367,824 62
Land and land damages		560,047 46
Real estate and buildings		922,049 31
Bridges and culverts		119,557 16
Engineering		47,359 07
Engines		92,801 76
Passenger cars		34,204 75
Merchandise cars		56,338 85
Cash		25,628 34
Notes receivable		4,354 38
East Cambridge Flats		67,228 58
Trustee of sinking fund		358,104 84
Material charged to Boston & Lowell and Nashua and Lowell Railroad		138,468 58
Suspense account		13,724 98
		$3,260,709 82
Capital stock	$2,195,000 00	
Bonds of 1853	75,000 00	
Bonds of 1864	200,000 00	
Notes payable	100,000 00	
Unclaimed dividends	1,763 00	
Unclaimed coupons	723 90	
Salem and Lowell Railroad	2,187 50	
Scrip dividend of 1866	866,000 00	
Contingent fund	221,255 42	
Dividend No. 66, "declared"	87,800 00	
Dividend on scrip	10,980 00	
	$3,260,709 82	

President.—F. B. CROWNINSHIELD.

Directors.—F. B. Crowninshield, George W. Lyman, J. G. Abbott, Wm. Minot, Jr., Hocum Hosford.

Treasurer.—J. THOMAS STEVENSON.

Manager.—GEORGE STARK.

Superintendent.—JOHN B. WINSLOW.

☞ The following gentlemen have been elected directors of the Atlantic and Great Western Railway: Rush C. Hawkins, Thomas W. Kennard, Wentworth Huyshe, J. P. Pannes, W. P. Rogers, Lawrence Johnston, D. J. Day, W. W. McFarland, Charles Day, Joseph Lerocque, William H. Taylor, Samuel L. M. Barlow and John Gardner, of New York; David Jones, Ravenna; Tatlow Jackson, Philadelphia; William Lee, Randolph; Jacob Crall, Ashland; Jacob Ribler, Galion; J. W. Tyler, Cleveland; George R. Babcock, Buffalo; James McHenry, London.

☞ Lyon Brook Bridge, on the line of the New York and Oswego Midland Railroad, has been completed, and a locomotive and train of cars, containing 250 passengers, passed over it on the 23d ult. This bridge is 162 feet high from the bed of the brook and 824 feet in length; there are forty-eight pedestals and twenty four sections. The highest of the two abutments, at either extremity, is about forty feet. It is approached from the west by a wood trestle, 370 feet in length, averaging some 25 feet high, and cost about $150,000.

Needed Reforms in Railroad Management.

In many respects, the system generally adopted in the management of our American railroads indicates a high order of business enterprise and sagacity on the part of the directors and managers of those great highways of trade and travel that have contributed, more than anything else, to the growth, development and prosperity of the country. No necessary improvement, calculated to increase the capacity of our roads, or facilitate the movement of freight and passengers, is neglected; the changed conditions of business and the necessity for constantly increasing speed, are met and provided for on all our principal through routes; superior accommodations are offered for the transportation of all kinds of produce and merchandise in whatever form they can be most conveniently and cheaply forwarded, whether in bulk or package, in air-tight and fire-proof cars, or, as in some instances necessary, in cars built for ventilation or refrigeration; palatial drawing room coaches and elegant sleeping cars have been built for the convenience of the traveling public, and where obstructions to travel are anticipated during the season of snow, fuel and provision cars are attached to each train—in short, everything seems to have been done that was needed to perfect, in its smallest details as well as its more important features, our system of railroad communication throughout the wide extent of territory limited only by the geographical boundaries of the continent.

Notwithstanding all this, there are many essential defects in the management of our roads that should be promptly and effectually reformed. It cannot be denied that, with all the superior accommodations offered, railroad travel in the United States is far less safe than it should be; or that the annual loss of life and injury to passengers, as well as the destruction of millions of dollars worth of property, attendant upon the frequently occurring "disasters" almost daily recorded in the news columns of the public press, is in too many instances attributable to the want of greater vigilance on the part of railroad officials, the absence of a more perfect system of telegraphic communication that would enable the Superintendent to regulate the movement of each train, and the neglect of certain minor details essential to the safety of trains run at the high rate of speed now demanded by the traveling public. Within the past sixteen years, from 1853 to 1869, inclusive, the total number killed on the railroads of the United States, according to the most trustworthy estimates now at hand, was over 3,000, and the number wounded over 11,000. In contrast to this it is stated that, on the entire railroad system of continental Europe, but one accident resulting in injury to passengers occurred during a period of four years. Supposing our roads to be well built and properly equipped, as a due regard for the safety of the traveling public demands that they should be, it is evident that the greater degree of danger attending railroad travel in America than in Europe, is mainly attributable to the want of a more perfect system

of management. Experience has shown that travel by rail can be made both safe and expeditious, as it is in Europe at the present time; and the very simple means by which this end is attained should be promptly adopted throughout the United States.

The unfailing punctuality with which trains are run on European roads is of itself an important element of safety. Every trip is made according to the requirements of the time tables with which the engineers are provided, and no time is lost on one part of the road to be made up on another, as is too often the case in this country, by sudden dashes of extraordinary and dangerous speed. The exact position of each train is known to the Superintendent or his assistants at any minute, and no train is allowed to venture from a station without it being definitely known whether the track is clear, and if it will be kept so. As the tracks are always double, direct collisions are practically impossible; and as the position of every train is almost momentarily reported, obstructions are always removed in time to leave a clear track for passenger trains. It is probable that the general features of this system are adopted on every railroad in the United States; but to the want of a more rigid enforcement of rules and regulations, and the absence of that unceasing vigilance which is the price of safety in railroad management, may be attributed the greater part of the disasters occurring on our railroads.

Another reason for the greater safety attending railroad travel in European countries is the careful police which the law requires the companies to maintain along the entire line of their roads. Experienced and trustworthy watchmen are stationed at short intervals, whose duty it is to see that the section of track under their charge is safe and wholly free from obstructions at all times. In this important particular, the management of most American roads is essentially defective. In Europe every foot of track is regularly inspected before and after the passage of each train, and an engineer is never out of sight of one of their watchman longer than three minutes at a time. Consequently, we never hear of stray cattle, fallen rocks or other obstructions in the way of passing trains; no one tampers with the rails or misplaces the switches, nor are draws left open or culverts, bridges or embankments washed away without the fact being known in time to prevent accident. In this country there are thousands of miles of railroad that are not carefully policed oftener than once a week, if as often, and it cannot be wondered at that on those long stretches of neglected track accidents are of comparatively frequent occurrence. The cost of maintaining a large force of intelligent men for this purpose is certainly considerable; but we have no doubt that the saving that would result from the prevention of needless and costly accidents, would more than cover the increased expense incurred by the companies.

We have thus attempted to point out as briefly as possible, a few of the many defects in the management of our American roads for which a remedy can easily be found; and, at the beginning of a new year, it is timely to remind those responsible for the management of our roads of the important duty which devolves upon them in the adoption of whatever means are best calculated to avert disaster and insure safety to the traveling public. It is useless to close our eyes to the fact that, in the United States, a journey by rail is attended with a far greater degree of danger than it need be, and those who are truly interested in railroad enterprises should lend their influence in securing the adoption of such reforms as may be needed to remedy the evils against which the press and the public has just cause for complaint. It has been found that, if proper care is exercised in guarding against the causes of accidents, a high rate of speed is not inconsistent with a reasonable degree of safety, and there is no good reason to be urged why a success which is possible at one time, is not also possible, under conditions equally favorable at all times. It is unreasonable to demand that railroad travel shall be attended with no risk; but the fact that, with but few exceptions, accidents are prevented on the railroads of Europe, shows that with a system of management equally perfect in all its details, the number of accidents occurring on American railroads might at least be greatly reduced.

Commerce of New York.

The foreign imports at New York for the month of November, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$9,707,521	$11,015,790
Do. for warehousing	7,050,229	6,918,527
Free goods	1,323,254	1,151,880
Specie and bullion	220,316	156,286
Total entered at port	$18,301,320	$19,237,483
Withdrawn fr. wareh'use	6,104,542	7,818,234

The foreign imports at New York for the eleven months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$120,278,048	$143,354,438
Do. for warehousing	99,282,123	115,419,499
Free goods	10,916,677	13,641,840
Specie and bullion	6,693,899	15,475,681
Total entered at port	$237,170,747	$287,891,458
Withdrawn fr. wareh'se	94,861,534	102,489,184

The revenue from customs at New York:

	1868.	1869.
1st quarter	$28,026,042 14	$34,640,194 91
2d quarter	27,424,706 51	28,827,215 03
3d quarter	34,150,298 97	35,865,913 58
In October	10,059,277 34	10,554,660 92
In November	7,309,086 88	8,540,788 60
11 months	$106,969,411 84	118,428,773 04

The exports from New York to foreign ports in the month of November, were:

	1868.	1869.
Domestic produce	$13,881,126	$16,836,617
Foreign free goods	9,763	44,159
Do. dutiable	517,907	512,226
Specie and bullion	1,181,085	1,126,845
Total exports	$15,589,881	$18,519,847
Do. exclusive of specie.	14,408,796	17,393,002

The exports from New York to foreign ports for eleven months from January 1, were:

	1868.	1869.
Domestic produce	$141,543,298	$169,984,602
Foreign free goods	561,594	371,227
Do. dutiable	6,973,925	6,812,010
Specie and bullion	69,123,694	30,375,549
Total exports	$218,202,511	$207,043,388
Do. exclusive of specie	149,078,817	176,667,839

☞ The Wilmington and Reading Railroad has been completed from Wilmington to Coatesville. The last rail was laid on the 24th ult.

Imports of Dry Goods.

The imports of foreign dry goods at the port of New York for each month of the years 1868 and 1869, are officially stated as follows:

	1868.	1869.
January	$5,119,359	$7,661,015
February	8,574,770	9,201,193
March	9,361,654	13,321,059
April	4,826,418	7,928,674
May	5,825,994	6,993,707
June	4,181,629	4,368,184
July	6,971,547	7,936,470
August	12,853,606	12,775,441
September	8,457,768	8,956,602
October	5,702,189	6,059,108
November	5,514,392	5,746,185
December	3,516,508	3,768,779
Total	$80,705,884	$94,726,417

The following will show the relative proportion of the different classes of fabrics:

	1868.	1869.
Manufactures of wool	$25,753,436	$28,526,020
" cotton	13,561,001	17,482,213
" silk	21,708,801	24,995,838
" flax	12,501,157	15,261,355
Miscellaneous dry goods.	7,381,439	8,460,991
Total imports	$80,905,834	$94,726,417

The value of foreign dry goods entered directly for consumption at the port of New York, is as follows:

Months.	1868.	1869.
January	$3,160,052	$5,066,833
February	5,675,807	6,857,561
March	6,815,133	9,973,566
April	3,779,001	5,895,912
May	4,344,834	4,755,133
June	2,842,868	2,975,773
July	4,228,253	4,789,069
August	9,035,309	8,961,771
September	6,370,866	5,543,092
October	4,137,852	4,178,511
November	3,836,263	3,828,351
December	2,285,028	2,240,660
Total	$56,511,266	$65,066,232

The value of foreign dry goods entered for warehousing at the port of New York, is as follows:

Months.	1868.	1869.
January	$1,959,307	$2,594,182
February	2,898,963	2,348,682
March	2,546,521	3,347,493
April	1,047,417	2,042,762
May	1,481,160	2,288,574
June	1,338,761	1,892,411
July	2,743,294	3,147,401

September	2,086,902	3,413,510
October	1,564,337	1,880,597
November	1,678,129	1,917,884
December	1,231,480	1,528,119
Total	$24,394,568	$29,660,185

The value of foreign dry goods withdrawn from warehouses at the port of New York, is as follows:

Months.	1868.	1869.
January	$1,604,974	$1,937,274
February	3,195,825	2,696,567
March	4,127,654	3,447,321
April	1,155,172	2,188,853
May	1,664,920	1,747,901
June	860,011	930,157
July	1,481,329	1,373,459
August	4,021,283	4,246,681
September	2,844,755	3,399,918
October	1,583,480	2,152,869
November	1,317,823	1,732,828
December	736,496	822,975
Total	$25,593,722	$26,676,303

The total imports of foreign dry goods at New York from 1849, compare as follows:

Year.	Invoiced value.	Year.	Invoiced value.
1849	$44,435,571	1860	$103,927,100
1850	60,106,375	1861	43,686,689
1851	62,846,731	1862	56,121,227
1852	61,654,144	1863	67,274,547
1853	93,704,211	1864	71,589,752
1854	80,842,936	1865	91,965,138
1855	64,974,062	1866	126,222,855
1856	93,362,893	1867	86,263,643
1857	90,534,129	1868	80,905,834
1858	60,154,509	1869	94,726,417
1859	113,152,624		

All of the figures above given represent only the foreign cost of the goods in gold, freight and duty not included.

Railroads of Iowa.

Statement showing the number of miles in operation of the several Railroads in the State January 1st, 1869; the gross earnings for the year previous; the estimated number of miles constructed in 1869; and the estimated number of miles in operation January 1, 1870:

	No. miles of road in operation Jan. 1, 1869.	Gross earnings for the year ending January 1, 1869.	Estimated No. of miles road constructed since Jan. 1, 1869.	Estimated No. of miles in operat'n Jan. 1, '70.

St. Louis and Cedar Rapids	.....	.....	42.250	42.250
	1,451.127	$8,924,931 13	648.418	2,094.545

The above table was prepared from the best information at hand, and will not vary much from the true figures. The figures in the first column were obtained from the reports made to the State Treasurer pursuant to the provisions of sec. 1, chap. 196, Laws 1868, hence are correct. The estimates in the third column are made with the understanding, that the Cedar Falls and Minnesota road will reach the State line by January 1, 1870; the McGregor and Missouri River Railway will reach Clear Lake; the Iowa Falls and Sioux City will build twenty miles after this date (Nov. 4th); the Central Railroad of Iowa will reach Marshalltown; the Burlington and Missouri road will be completed to the Council Bluffs and St. Jo Crossing; the Des Moines Valley road will reach Ft. Dodge; the Burlington, Cedar Rapids and Minnesota road will reach the Washington Branch Junction, and be built from Cedar Rapids to Vinton; and the St. Louis and Cedar Rapids road will reach Ottumwa.

In most of the foregoing cases, I am assured that the estimated amount of road to be built will be fully completed by the first of January, 1870. Should such be the case the total length of road built, not including side tracks, from January 1st, 1869, to January 1st, 1870, will be 643 1-2 miles.

ED. WRIGHT, Secretary of State.

Fires during the year 1869.

The *N. Y. Herald* publishes a list of fires that have occurred in each city and town in the United States for the year ending December 31, 1869, with a description of the property destroyed, where the losses are reported to have reached $20,000 and upwards. The following is a recapitulation:

Losses in	Amount.	Losses in	Amount.
January	$3,294,000	July	$1,677,000
February	2,637,000	August	6,838,000
March	2,892,000	September	3,242,000
April	4,672,000	October	2,792,000
May	3,830,000	November	2,650,000
June	1,690,000	December	4,200,000

Total losses in 1869	$40,684,000
Total losses in 1868	34,757,000
Total losses in 1867	36,905,000
Total losses in 1866	66,410,000
Total losses in 1865	43,139,000
Total losses in 1864	28,522,000
Total losses in 1863	14,060,000
Total losses in 1862	17,640,000
Total losses in 1861	18,020,000
Total losses in 1860	15,597,000
Total losses in 1859	16,058,000
Total losses in 1858	11,561,000
Total losses in 1857	15,792,000
Total losses in 1858	21,150,000
Total losses in fourteen years	$380,299,000

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund, we learn that the total funded debt of the State, May 15, 1869, was... $10,048,381 86

The redemption during the six months was:

Loan of 1870	31,800 00
Outstanding Nov. 15, 1869	$10,016,581 86

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT, PAYABLE AT NEW YORK.

Loan, payable after Dec. 31, 1860, not bearing interest		$1,270 00
Loan, (Union,) payable July 1, 1868, not bearing interest		2,500 00
Loan, payable after Dec. 31, 1870, bearing 6 per cent. interest		1,515,677 03
Loan, payable after Dec. 31, 1875, bearing 6 per cent. interest		1,600,000 00
Loan, payable after June 30, 1881, bearing 6 per cent. interest		4,095,300 00
Loan, payable after Dec. 31, 1886, bearing 6 per cent		2,400,000 00
Total foreign debt		$9,614,756 50

DOMESTIC DEBT, PAYABLE AT COLUMBUS.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds, not bearing interest	60 36	
Union loan of 1871, bearing 6 per cent. interest	400,000 00	
		401,825 36
Total public funded debt, Nov. 15, 1869		$10,016,581 86

In addition to the actual redemption, as above stated, the Commissioners have purchased during the period covered by this report, Ohio State stock to the sum of $113,600, this making a real reduction of $145,400 in the State debt within that time. The amount of uncanceled State stocks now held by the Commissioners is $160,643 59, divided among the several loans as follows:

Loan of 1871	$19,000 00
Loan of 1885	29,700 00
Loan of 1881	111,943 59
Total	$160,643 59

These stocks the Commissioners can at any time cancel or exchange for the loan that matures at an earlier day, just as they should deem best for the interests of the State. Consequently, the aggregate sum thereof should be deducted from the gross amount of the outstanding or uncanceled stock, in order to arrive at the real amount of the redeemable debt. The actual amount, therefore, of the public funded debt of the State is $9,855,938 27.

The receipts into the Sinking Fund, and the disbursements therefrom, were as follows:

RECEIPTS.

Balance in Treasury, May 15, 1869	$227,644 99
Taxes	593,879 55
School lands	8,688 59
Surplus revenue	2,249 42
War claims refunded by the United States	28,372 29
Land sales	5,422 00
Dresden lots	100 00
Buttles' estate	4,000 00
Interest on State stocks exchanged	440 00
Returned from New York	29,354 66
Total	$895,651 50

DISBURSEMENTS.

Principal of funded debt	$158,500 00	
Interest on funded debt	308,844 15	
Interest on irreducible debt	77 12	
Office expenses	888 23	
Transfer of general revenue by Auditor of State, under act of May 15, 1869	150,000 00	
		618,309 50
Balance in Treasury, Nov. 15, 1869		$277,342 00

☞ Ogden has been finally decided upon as the point of junction of the Central and Union Pacific Railroads. The former takes the line from Promontory to Ogden, and pays over to the latter the bonds remaining due as part of the purchase money.

☞ The George's Creek Coal and Iron Company has declared a dividend of 3 per cent. for the last six months, payable on and after the 11th instant, clear of all taxes except United States tax.

☞ The Canada Southern Railway bill has been passed in Parliament in its entirety from Buffalo to the Detroit and St. Clair Rivers. This is what is called the Thompson bill in Canada.

☞ Work on the western division of the Memphis and El Paso Railroad, between Fort Yuma and San Diego, Cal., will be commenced early in the spring.

☞ The cars of the Portland and Oxford Central Railroad now run to Canton.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 8, 1870.

Stock Exchange and Money Market.

Money has been in urgent request, chiefly on speculative account, and, as the available supply, especially in private hands, has been moderate, rates have shown more firmness, closing on Wednesday on the basis of 7 per cent. as the prevailing charge to the more prominent street borrowers. In the discount line, there has been relatively less animation, and a more even range of quotations, the extremes on choice to very good grades of business paper having been from 8@12 per cent. per annum. The city banks, last week, added nearly 2¾ millions to their specie hoard, two millions to their deposit line, and over half a million to their legal tender reserve, while they reduced their loans and discount averages $689,613. The U. S. Sub-Treasury added nearly 4½ millions to the coin balance, while it cut down the currency reserve about 1⅞ millions. The cash balance of the Office at the beginning of the year was over 90 millions, against about 87¼ millions at the beginning of December. The aggregate of the January interest and dividend payments at this business centre has been given at about 50¾ millions. Some further mercantile failures have been reported, since our last, including an important one in the Sugar refinery interest.

The specie reserve of the city Banks according to the latest return is $31,166 908, against $20 733,122 same time last year. The city bank deposits are now $179,129,391 against $180,490,445 week ending Jan. 2 1868. The legal tender reserve amounts to $45 034,608, against $48,896,421 same time last year. The circulation now stands at $34,150,887, against $34,379,609 same time last year. The loans are now $250,406,387, against $259,090 037 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $79,871,075 a day, against a daily average of $82,244,289 the preceding week, and $94,250,101 the week ending with Dec. 18, 1869. The current week's exchanges average about $116,512,000 a day. The city banks, last week, reported a gain of $2,746,931 of specie, $1,963,808 of deposits, and $540,616 of legal tender notes. They reduced their loans, $689,613; and increased their circulation, $23,050.

The city bank exchanges on Wednesday were $101,891,663.

National Bank notes to the amount of $37,500 were issued last week by the Treasury Department, making the total issue to 1,092 banks thus far, amount to $319 702,671, against $282 555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,960 879, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,741,792. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,499,050; and for the public deposits, $19,291 000—making a total of $361,790 050. The Treasury Department last week redeemed and destroyed $114,000 of worn and mutilated fractional currency, and issued $235,000 of new. The outstanding amount of fractional currency on the 1st of Jan. was $39,762,665, against $38,885,565 on the 1st of December, 1869.

The U. S. Sub-Treasury receipts, week ending with Jan. 2, (which comprised only five business days,) were $6,437,552 in coin, (including $1,343,599 from customs duties,) and $3,387,810 in currency; payments, $2,119,058 in coin, (including $453,000 of coin interest,) and $5,244,983 in currency; balance at the close of the week, $90,057,429 (including $81,346,887, of coin, and $5,250,566 of currency,) against $86,493,121 at the close of the preceding week, showing an increase of $3,564,308. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $566,095 in coin, (including $387,100 from customs,) and $478,007 in currency; payments, $5,846,364 in coin, (including $5,572,500 of coin interest,) and $1,167,008 in currency. On Tuesday, receipts, $1,074,172 in coin, (including $409,000 from customs,) and $908,263 in currency; and payments $1,263,662 in coin, (including $1,246,619 of coin interest,) and $518,330 in currency. The balance at the close of business on Tuesday stood at $92,206,272, (including $4,951,498 of currency, and $75,877,128 of coin,) against $88,802,947 a week previous; and $76,063,908 on Dec. 21, 1869. The aggregate receipts of the office in Dec. were $51,554,741, including

$6,969,667 from customs; aggregate payments, $48,729,064, including $2,430,597 of coin interest.

The outstanding amount of coin certificates on the 1st of Jan. 1870 was $40,170,380, against $36,862,940 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,241,598 of coin certificates through the receipts for customs.

Government revenues have been yielding less satisfactorily since our last. The excises yielded about 2¾ millions; customs at the port of New York, $1,399,406, and at the outports about $450,000 (in coin) more, making the grand total income for the week equal to about $4,969,300 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 90 millions.

There has been more animation in the Gold line within a range of from 119¼@120½, leaving off on Wednesday at 119⅞@120, on a rather more confident speculative movement, Government, will sell four millions of coin, during the coming month, according to an official announcement ma le on Monday. The coin reserve of the Treasury Department on the 1st inst was $109,159,476, of which there were $81,346,886 in the Sub-Treasury here. Included in the reserve were $40,170,380 on deposit on private account. The customs and export demand for coin is at present very light

The customs revenue of the port on Wednesday was $391,000.

The coin balances of the Government at this port on Wednesday morning, amounted to about 75⅞ millions.

The coin interest disbursements on Wednesday were $1,170,906.

The customs demand for Gold last week, averaged $279,881 a day; thus far, this week, it has averaged $397,700 a day, or equal to a weekly aggregate of $2,386,200. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $169,059, and since Jan. 1, 1869, $14,918,725, against $7,163,071 same time in 1868. The total customs revenue of the Government, in coin, at this port, in the year, 1869, was $129,603,460, against $116,471,894 in 1868. At San Francisco, from Jan. 1, to Dec. 25, 1869, $8,248,858, against $8,419,726 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Dec. 11, were about 86 millions.

The exports of specie, from this port, last week, were $92,282, against $222,815 same week last year; total, since Jan. 1, 1869, $32,013,569, against $70,841,599 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $453,000, and in all 1869, $90,352,669, against $82,896,417 in 1868. The specie exports from San Francisco, from Jan. 1, to Dec. 25, 1869, were $37,073,051, against $34,735,435 same time in 1868.

Foreign exchange closed stronger in price, on a lighter offering, and a moderate inquiry. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108⅝@108¾, and on Paris to 5.21¼@5.17½; sight bills on London to 109⅝@109½, and on Paris to 5.16⅞c.@5.15⅝. The offering of produce bills has been on a reduced scale this week. The week's exports of domestic produce have been to the currency value of $2,174,516, making the total in 1869, $198,193,628, against $168,710,408 same time last year.

Government securities have been more sought after by home and foreign buyers and have improved in price, favored, in part, by the debt exhibit of January 1st, which showed a further liquidation of $4,812,782 in December. Government bought in on Monday two millions of Five-Twenties at from 111.75@112.70, out of an aggregate offering of $3,194,450.

The six per cents of 1881, 1865 (new), 1867, and 1868 Five-Twenties are now quoted ex the 1st of January coupons.

U. S. sixes of 1881 closed here buoyantly at 115¾@116; U. S. Five-twenties of 1862, 113⅞@114; U. S. Five twenties of 1864 at 113⅜@113½; U. S. Five-twenties of 1865 at 113⅜@113½; U. S. Five-twenties of 1865, consolidated, 112¼@112⅜; U. S. Five-twenties of 1867, 112⅜@112⅝; U. S. Five-twenties of 1868, 112½@112⅝; U. S. Ten-forties at 110⅝@111; U. S. Six per cent. currency bonds, 109¼@109½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 22.	Dec. 29.	Jan. 5.

State and railway bonds have been fairly active and generally held with confidence. Central Pacific Railway six per cents closed at 88½@89, ex January coupon. Messrs. Fisk & Hatch, in a new pamphlet, give the gross earnings of the road during the first eight months of the through connection at $4,442,652; operating expenses, at $2,198,197; net earnings, $2,244,455; annual interest claims against the road, on account of its First Mortgage, only $1,560,000, all in coin.

Railway and miscellaneous share property has attracted more attention at generally stronger prices, closing buoyantly.

General business has shown a moderate degree of animation, but on the basis of easier prices in most instances. Middling upland cotton closed heavily on Wednesday at 25¼ cts. per lb. The stock of cotton now here is given at about 46,500 bales. The receipts at the port this week, have averaged about 9,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,313,750 bales, against 1,037,120 bales in 1868-'9; exports, same time 699,600 bales, against 550,200 bales same time in 1868-'9; stock on hand at latest dates, 379,950 bales, against 294,450 bales same date 1869. The exports of domestic cotton goods from this port, in 1869 were 21,047 pkgs., against 26,048 pkgs., in 1868. From Boston, 7,185 pkgs., in 1869 against 11,422 pkgs. in 1868.

Foreign goods have been in very slack demand and weak and irregular in price. The week's imports reached a specie value of $2,747,433.

At the Live Stock markets, this week, Beeves have been in less demand, at from 10@17½c., per lb.; week's receipts, 4,796. Milch cows inactive, at $40@$110 each, receipts, 108. Veal calves in light request at from 8@12c. per lb.; receipts, 730. Sheep and lambs in fair demand at from 5@8c., and 7@8½c. per lb.; receipts, 19,643. Swine in moderate request at 9½@10¼c. per lb., all live weight; receipts, 9,577.

Ocean freights have been very quiet and quoted heavy. For Liverpool we quote flour at 1s. 3d.@1s. 6d. by sail, and 1s. 6d. by steamer, per bbl.; grain at 3½d.@4d. by sail, and 4d. by steamer, per bushel; cotton at $\frac{3}{16}$d.@¼d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@22s. 6d. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 524.

The balance in the Sub-Treasury on Wednesday was $93,381,287 14.

The New York exports, exclusive of specie, for the week ending Jan. 4, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$1,926,240	$2,174,516

The imports for the week ending December 31, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,054,593	$648,938
Gen. merchandise	2,130,366	2,098,495
Total for the week	$3,184,959	$2,747,433
Previously reported	241,676,904	286,563,970
Since January 1	$244,861,863	$289,311,403

☞ The Buda Branch of the Chicago, Burlington and Quincy Railroad will be completed next month. The track is down now on the north end from Buda to Bradford, ten miles, and on the south end from Yates City to Brimfield.

☞ The distance between Halifax, N. S., and St. John, N. B., is now traveled in 13 hours, *via* the Windsor and Annapolis Railroad. The cars connect with steamers from St. John at Annapolis, and run through to Halifax without change.

☞ FIRST CLASS SECURITIES. TANNER & CO., BANKERS, No. 49 Wall st., New York, have for sale a line of investment securities of the highest order. Among them,

6 Per Cent. First Mortgage Gold Bonds St. Louis and St. Joseph R. R. Co., May and November.

8 Per Cent. First Mortgage Gold Bonds St. Joseph and Denver City R. R. Co., February and August.

10 Per Cent. Bonds of Marion County, Missouri, May and November.

10 Per Cent. Bonds of Monroe County, Missouri, January and July.

All of which we can recommend with the utmost confidence.

TANNER & CO.,
No. 49 Wall street, New York.

Middlesex (Mass.) Railroad.

The earnings of this road for the year ending November 30, 1869, were $229,090 44, and the expenses, $200,967 09, making the net earnings, $28,123 35. After deducting dividend and revenue tax a surplus of $38,149 48 is left. The excess of assets over liabilities is $60,616 23, which amount is exclusive of the road.

The cars of the company have run 103,509 round trips, a total distance of 571,228 miles, and have carried in all 3,700,884 passengers.

The company's equipment and rolling stock is in good condition, and will compare favorably with that of any Street Railway Company in the country. A very large amount, $24,777 78 (over 6 per cent. of the capital stock of the Company,) has been expended and charged in above expenses to "repairs of road," beyond what will be required for years to come. Four new cars have also been built by the company and charged to expenses.

The Directors feel assured of the ability of the road to earn and pay regular semi-annual dividends in the future.

Detroit, Hillsdale and Indiana Railroad.

At the recent meeting of the stockholders of this company at Hillsdale, Mich., the following Directors were elected: John Owen, C. H. Buhl, and John S. Newbury, of Detroit, Mr. Quick of Ypsilanti, Mr. Davenport of Saline, I. D. Corey, of Manchester, A. P. Cook, of Brooklyn, John P. Cook, Henry Waldron, of Hillsdale. The Company will run its cars over the Michigan Central as far as Ypsilanti. Thence to Hillsdale a new road will be built, by aid of the Michigan Central Company, that corporation taking a first mortgage bond for indemnity for iron and rolling stock furnished. About $8,000 per mile have been secured for the road-bed and ties. The road is to be completed next year. J. B. Walton, Esq., is Chief Engineer.

☞ Coupon No. 15 of the first mortgage bonds of the Vermont Valley Railroad, due October 1, 1867, will be paid at the office of the treasurer in Bellows Falls, Vermont, for the space of twenty days from January 1, 1870; the same coupon will be paid at the Continental National Bank in the city of New York.

☞ The last rail on the line of railroad connecting Dubuque with St. Paul was laid Saturday, at the State line, on the Cedar Falls and Minnesota Railroad; the distance is 300 miles.

The Public Debt Statement.

The following is a recapitulation of the public debt statement for December, 1869:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$221,589,300 00
Six per cent. bonds	1,886,349,800 00
Total	$2,107,939,100 00
Accrued interest	$48,797,782 58
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,545,000 00
Navy Pension Fund 3 per cent	14,000,000 00
Total	$59,545,000 00
Interest	1,120,900 00
Debt on which int'r't has ceased since maturity	4,140,936 64
Interest	544,906 60
DEBT BEARING NO INTEREST.	
Demand and legal tender notes	$356,113,098 50
Fractional currency	39,762,664 68
Gold certificates of deposit	40,170,380 00
Total	$436,046,143 18
Total amount outstanding	2,607,671,179 82
Interest	50,463,490 18
Total debt, principal, and interest to date, including coupons due, and not presented for payment	$2,658,134,670 00
AMOUNT IN TREASURY.	
Coin	$109,159,475 96
Currency	12,778,963 02
Sinking fund in United States coin-interest bonds, and accrued interest thereon	22,545,927 34
Other United States coin interest bonds purchased, and accrued interest thereon	64,908,350 37
Total	$209,387,716 69
Debt, less amount in Treasury	$2,448,746,953 31
Debt, less amount in Treasury December 1st, 1869	2,453,559,735 23
Decrease of debt during the past month	$4,812,781 92
Decrease of debt since March 1st, 1869	$76,716,306 70

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,075,000	$812,217 52
Kansas Pacific, late Union Pacific, East'rn division	6,303,000	189,090 00
Sioux City and Pacific	1,628,320	48,849 60
Central Pacific	2,362,000 / 23,519,000	64,874 22 / 701,209 86
Central Branch Union Pacific—Assignees of Atchison and Pike's Peak	1,600,000	48,000 00
Western Pacific	1,648,000	26,615 64
Totals	$64,135,320	$1,890,856 64
Interest paid by United States		$4,984,822 54
Interest repaid by transportation of mails, etc		1,861,089 71
Balance of interest paid by United States		3,123,732 83

☞ Three vessels have arrived at Aquia Creek with iron for the Fredericksburg and Charlottesville Railroad. This iron is intended for the first twelve miles of the road, which is now ready. Forty tons have been transported to Fredericksburg, and the remainder will be forwarded as speedily as needed.

☞ The Hagerstown *Mail* says that the County Commissioners have made an arrangement with the Washington County National Bank, the First National Bank of Hagerstown, and the Old Hagerstown Bank, by which the necessary funds are provided for the payment of the half-yearly interest on the bonds of Washington county ($150,000) given in aid of the Western Maryland Railroad.

Journal of Railroad Law.

COMMON CARRIERS—WHEN, THEIR COMMON LAW LIABILITY MAY BE LIMITED—EFFECT OF RECEIPT—RULES GOVERNING VALUE OF BAGGAGE.

The facts in the late case of The Adams Express Company *vs.* Haynes (42 Ill. 89) are fully and clearly stated in the following opinion by

WALKER CH. J.—This was an action of assumpsit brought by Richard F. Haynes, in the Cook Circuit Court, against the Adams Express Company, to recover the value of the contents of a trunk, intrusted to them as common carriers, to transport from Nashville, Tennessee, to Chicago, Illinois; and it was claimed that the contents of the trunk were lost through the negligent and fraudulent conduct of the company. The instrument declared on is as follows:

"Adams Express Company,

"Great Eastern, Western and Southern Express Forwarders.

"Nashville Feb. 10th, 1865.

"Received of R. F. Haynes, 1 Trunk value ——, marked Mr. T. M. Shepherd, Chicago, Ill., which it is mutually agreed is to be forwarded to our agency nearest or most convenient to destination, only, and there delivered to other parties to complete the transportation.

"It is part of the consideration of this contract, and it is agreed, that the said express company are forwarders only, and are not to be held liable or responsible for any loss or damage to said property while being conveyed by the carriers to whom the same may be by said express company intrusted, or arising from the dangers of railroad, ocean, or river navigation, steam, fire in stores, depots, or in transit; leakage, breakage, or from any cause whatever, unless in every case the same be proved to have occurred from the fraud or gross negligence of said express company, or their servants; nor in any event shall the holder hereof demand beyond the sum of fifty dollars, at which the article forwarded is hereby valued, unless otherwise herein expressed, or unless specially insured by them, and so specified, in this receipt, which insurance shall constitute the limit of the liability of the Adams Express Company. And if the same is intrusted or delivered to any other express company or agent (which said Adams Express Company are hereby authorized to do), such company or person so selected shall be regarded exclusively as the agent of the shipper or owner, and as such, alone liable; and the Adams Express Company shall not be in any event responsible for the negligence or non-performance of any such company or person; nor in any event shall said express company be liable for any loss or damage, unless the claim therefor shall be presented to them in writing, at this office, within thirty days after this date, in a statement to which this receipt shall be annexed. All articles of glass, or contained in glass, or any of a fragile nature, will be taken at shipper's risk only: and the shipper agrees that the company shall not be held responsible for any injury, by breakage or otherwise, nor for damage to goods not properly packed and secured for transportation. It is further agreed, that said company shall not in any event be held liable for any loss, damage, or detention, caused by the acts of God, civil or military authority, or by rebellion, piracy, insurrection or riot, or the dangers incident to a time of war.

"For the company,

"M. A. Barry."

"Freight paid 48s."

A trial was had by the court and a jury, which resulted in a verdict in favor of plaintiff for the sum of $500 damages. Thereupon defendant entered a motion for a new trial, which was overruled by the court and judgmsnt was rendered on the verdict, and defendant brings the case to this court to reverse the judgment.

It will be observed, that the receipt upon which this suit is brought contains provisions which were designed to relieve plaintiffs in error from almost every species of responsibility. It is true, that it leaves them liable for fraud and gross negligence, but even then, only to the extent of fifty dollars. We are at loss to conjecture how a sane man could be induced to receive such an agreement knowing its contents. If he understood its terms and conditions, he knew that he was licensing the company, or any of its numerous agents and employees, to appropriate all of the property thus intrusted to their care, by paying him the sum of fifty dollars. And, it appears, that he paid an eighth of that sum, nominally, for transportation of the property, but it looks more like a premium for violating their trust. No person can be surprised that $500 worth of property intrusted to them under such a receipt, never reached its destination, but it would have been singular if it had.

In the case of the Western Transportation Company *vs.* Newhall 24 Ill. 466, it was held, that a common carrier could not restrict his liability by a mere notice that property received by it was subject to specified conditions, indorsed upon the receipt, or given in any other mode. Prior to that case was the case of the Illinois Central Railroad *vs.* Morrison 19 Ill. 136, where it was held that a common carrier might enlarge or diminish his liability by express agreement, they still remaining liable for gross negligence, or willful misfeasance of duty, against which good morals and public policy forbid they should be permitted to stipulate. And where a common carrier received goods for transportation under a restricted liability and they have been lost, and the carrier is unable to show how or when they were lost, it would only be reasonable to conclude they had been lost through gross negligence or misfeasance.

And it is but reasonable, when the restrictions appear in the receipt, that the jury should be satisfied from the evidence, that the person to whom it was given had full knowledge of the restrictions when the receipt was given. And to show that he was not so informed, all of the circumstances attending the giving of the receipt may be admitted in evidence. In the case of the Western Transportation Company *vs.* Newhall, reference was made to the Mich. Central R.R. Co.; *vs.* Hale *et al*, 6 Mich. 244, where the court held, that "His assent to this limitation is still necessary, and that is a question of fact for the jury, to be determined by evidence *alinude*, and is not the subjec of presumption from the terms of the receipt alon And this is the correct rule respecting notices o common carriers designed to have such effec

The carrier can no more restrict his common law liability, unless upon the free and full agreement of the party dealing with him, than he can refuse to carry when required. Such an agreement is not to be implied from the posting of notices or the simple delivery of one to the consignor, as this would be no more than limitation of his liability, by *ex parte* action. Some evidence of assent to the terms of the notice is necessary, from which a contract may be implied."

While this was said in reference to a notice on the back of a receipt, still, if it appeared that the consignor had received a receipt containing limitations, of which he was uninformed, the effect would be the same. And it is for the jury to determine whether he intended to accept an undertaking with a restricted liability. If defendant in error did receive this receipt with a full knowledge of its terms and conditions, and intended to assent to the restrictions it contained, then it undoubtedly became his contract as fully as if he had signed it. See Baker *vs.* Mich. South and N. Ind. R. R. of this term *ante* 73.

On the trial below, the court, against the objection of plaintiffs in error, permitted defendant in error to prove a portion of the contents of the trunk. The general rules of evidence exclude parties to the record, and persons having an interest in the result of the suit, from testifying. But, from the necessity of the case, an exception has obtained, in favor of persons who have lost baggage intrusted to a common carrier. But it has never been regarded as a rule, or extended beyond that particular class of cases. And courts always receive such evidence with caution and endeavor to restrain the rule within narrowest limits, and to caution juries when they receive such testimony. Illinois Central Railroad *vs.* Copeland 24 Ill. 332.

We are aware of no case which has gone to the length of holding, that a consignor of goods transported by water, by rail or otherwise, might in case of loss prove their contents. And if allowed in the case of loss by an express company, no reason is perceived, why the same thing might not be done in every case of loss by common carriers, without reference to the mode of transportation or the character or value of the goods intrusted to the carrier. The exception must we think, be restricted to baggage accompanying a person when traveling. Until the legislature shall change the rule, we must administer the law as we find it. Whatever may be the hardship, or whatever might be our inclination, we are powerless to extend the exception. The court below therefore erred, in permitting defendant in error to testify as to the contents of the trunk, as they were in no sense baggage. The judgment of the court below must be reversed and the cause remanded.

Judgment reversed.

COMMON CARRIERS—TO WHAT EXTENT INSURERS—WHEN ARTIFICE OR CONCEALMENT ON PART OF PERSON DELIVERING GOODS RELIEVES AN EXPRESS COMPANY.

The facts of the late case of The American Express Company *vs.* Perkins (42 Ill., 458,) are fully and clearly stated in the following opinion by

LAWRENCE, J.—This was an action on the case, brought by Mary E. Perkins against the American Express Company as a common carrier. There was a trial by the Court and judgment for the plaintiff. The plaintiff below delivered to the company a package containing a wreath, to be taken from Decatur to Cairo. The wreath was partially made of glass, and when it arrived at Cairo the glass was broken. The receipt given by the company to the plaintiff, and put in evidence by the latter, contained a provision that the company would not be responsible "for any articles contained in or consisting of glass." Without holding that the company could discharge itself, by this proviso, from its liability as a common carrier, unless the plaintiff assented to such proviso, we must nevertheless, hold that such liability to its common law extent, did not attach, unless the company was informed what the package contained, in order that a degree of care might be used, proportioned to its fragile character. The plainest dictates of fair dealing and good faith required the plaintiff to furnish this information. This principle was settled in the case of the Chicago and Aurora R. R. Co. *vs.* Thompson, 19 Ill., 578, where it was sought to charge a common carrier for the loss of money in a valise, that had been shipped in a box containing other articles of little value. The company was not informed that the box contained money, and its appearance furnished no indication of that fact, but rather the contrary. The Court reviews the authorities and holds, that, in order to charge common carriers as insurers, they must be treated in good faith, and that concealment, artifice or suppression of the truth, will relieve them of this liability. It was held that the company should have been informed of the money being in the box, in order to charge them. So in this case, the company should have been told of the contents of this box before they can be charged for the breakage of so fragile a substance as glass. That they were so informed there is not a particle of evidence. The judgment is reversed and the cause remanded.

Judgment reversed.

☞ The certificate of incorporation of the Placerville and Sacramento Valley Railroad Company was filed on the 18th ult. The object of the company is to construct a railroad forty miles in length, through the counties of El Dorado and Sacramento. The capital stock is $750,000, divided into shares of $100 each. The Trustees are: L. L. Robinson, Charles E. McLane, Hall McAllister, F. L. A. Pioche, William Alvord, Jonathan Hunt, and F. A. Bishop.

☞ The work on the iron bridge at East Guilford, on the line of the New York and Oswego Midland Railroad, is completed and ready for the rails. This Bridge is three hundred feet in length and sixty feet high.

☞ The grading on the New Berlin Branch of the New York and Oswego Midland Railroad is substantially completed and the laying of the rails will be pushed forward with due vigor. Work is also progressing upon about a dozen sections of the Auburn Branch.

☞ Twelve miles of the Adirondack Railway was formally opened on the 1st inst. The road now extends forty-nine miles north of Saratoga, to near Johnsbury.

First Mortgage Bonds

OF THE

CHICAGO, DANVILLE & VINCENNES RAILROAD.

Total amount to be issued	$2,500,000
Capital stock paid in	2,100,000
Estimated cost of road (140 miles)	4,500,000
Estimated earnings per annum	2,639,306
Net earnings per annum	879,768
Interest on the loan per annum	175,000
Amount of bonds per mile of road	18,000
Amount of interest per mile	1,260
Amount of net earnings per mile	6,284

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y., as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.

They bear examination and comparison, better, it is believed, than any other now before the public, in the fixed and unchangeable elements of *Safety, Security, and Profit.*

They bear good interest—Seven per cent. Gold for forty years—and are secured by a *Sinking Fund*, and First Mortgage upon the road, its outfit, and net income, the Franchises, and all present and future acquired property of the Company.

They depend upon no new or half-settled territory for business to pay their interest, but upon an old, well settled, and productive country;—assuming that a railroad *built* through the heart of such a region offers better security for both *Interest* and *Principal* than a road *to be built* through the most highly extolled wilderness or sparsely settled territory.

This Railroad possesses special advantages, in running into and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and old farming settlements in the richest portion of the State of Illinois: in running near to deposits of Iron Ore of great extent and value, and over broad fields of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the Lakes to the Gulf;" as with its Southern Connections it forms a Trunk Line 45 miles shorter than any other route from Chicago to Nashville.

These Bonds are therefore based upon a Realty and a Business that a few years must inevitably double—and competent judges say treble—in value.

Governments selling while the price is high pay well if put into these Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.

Pamphlets, with Maps, &c., on hand for distribution.

Bonds may be had directly of us, or of our Agents.

W. BAILEY LANG & CO., Merchants,
54 Cliff Street, New York,
Agents for the sale of the Bonds.

Mississippi and Tennessee Railroad.

The earnings of this road for the year ending September 30, 1869, were $385,974 02; operating expenses, $233,741 97; net receipts, $152,232 95; increase in net receipts over the preceding year $35,388 73. The road extends from Memphis to Grenada, 99 miles. The directors are: F. M. White, Gen'l. Roberston, Major McKay, John Caldwell, Desoto; N. R. Sledge, E. McGhee, N. Howard, Panola; W. B. Greenlaw, Frank White, Sam Tate, Memphis, Tennessee. President, F. M. White, Superintendent, A. S. Levermore.

☞ The stockholders of the Lake Shore and Michigan Southern Railroad Company have voted against the consolidation of that road with the Toledo, Wabash and Western Railroad. About 40,000 shares were represented.

☞ It is proposed to run the cars of the Connecticut Valley Railroad from Hartford to Middletown on the track of the Hartford and New Haven Railroad, instead of building a new and direct line.

☞ A company has been formed in Schenectady for the purpose of building a railroad from that city to tap the Albany and Susquehanna Railroad, in the town of Duanesburg. The proposed road will be about fourteen miles in length.

☞ The surveys for the branch from the Philadelphia, Wilmington and Baltimore Railroad to Bel Air, in Hartford county, Md., will soon be commenced.

☞ A preliminary survey has been made of a new railroad from Phœnixville to Point Pleasant, Pa. The cost of the road is estimated at $1,274,150.

Dividend Notice.

ROME, WATERTOWN AND OGDENSBURG RAILROAD,
VICE PRESIDENT'S OFFICE, No. 12 COLLEGE PLACE,
NEW YORK, Dec. 22d, 1869.

THE Board of Directors of this Company, have declared a semi-annual dividend of (5) five per cent. free, payable on and after the 15th January proximo. Transfer books will be closed on the 25th inst., and so remain till date of payment. Stock registered in New York, will be paid at the Mercantile Bank for a period of sixty days.

MARCELLUS MASSEY,
Vice President.

3t52

INTEREST ON CITY STOCKS.—The interest on the Bonds and Stocks of the Corporation of the City of New York, due February 1st, 1870, will be paid on that day, by PETER B. SWEENY, Esq., Chamberlain of the City, at his office, in the New Court House.

The transfer books will be closed TUESDAY, January 4, 1870.

RICHARD B. CONNOLLY, Comptroller.

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE,
NEW YORK, Dec. 30, 1869. 4t2

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, January 4, 1870. A dividend of FIVE PER CENT. in cash, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 1st day of February next, to the holders of full paid shares registered at the close of the seventeenth day of January instant, after which date and until the fifth day of February next, the transfer books will be closed.

THOMAS E. WALKER,
Treasurer.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

The Darien Canal Project.

The degree of success which has attended the completion of the Suez Canal, and its opening to the trade of Europe and the East, has invested the scheme of an inter-oceanic ship canal across the Isthmus of Darien with a new interest for the American people. It will be remembered that Secretary Seward, as head of the Department of State under the last administration, took an active interest in the project and commissioned Mr. Caleb Cushing to proceed to the State of Colombia to negotiate the necessary treaty with the government of that country; but although the mission was successful in accomplishing the object sought, nothing of practical importance resulted from it. The project, however, has not been abandoned by the Government. President Grant in his recent message calls especial attention to the fact that negotiations have been resumed with the Colombian Government, and urges the importance of the work, to aid which a naval expedition will shortly be sent to make thorough and careful surveys of the several passes of the Isthmus deemed practicable as routes for the projected canal. The deep interest manifested in the scheme by the government and the people of the United States, has led most writers on the subject of an Isthmian route to the Pacific, to regard the canal as an accomplished fact and to overlook the many serious, if not insurmountable, obstacles in the way of the successful completion of the work, even if it should ever be fairly undertaken. We have carefully examined the subject with the assistance of the best authorities, and are convinced that the difficulties, which will present themselves on a careful survey of the Isthmus, are so great as to render it doubtful if our capitalists can ever be induced to engage in the work.

In the first place, it should be remembered that the only route for a canal deemed practicable by those best acquainted with the topography of the country, is the pass now occupied by the Panama Railroad; and also that the Colombian Government cannot grant a right of way across the Isthmus except upon terms which the projectors of a canal would be loth to accept. The railroad company have acquired certain rights and privileges which any other company or corporation proposing to establish communication across the Isthmus will have to purchase, or pay damages to the road in proportion to the extent to which it is likely to injure its business. In the contract between the Colombian Government and the Panama Company, reformative of that of April 5th 1850, it is provided as follows:

The Government of the Republic binds itself during the time in which the exclusive privilege which is conceded to the Company for the working of the railroad remains in force, not to construct for itself, nor to concede to any person or company, by any title whatever, the power to establish any other railroad on the Isthmus of Panama; and it also stipulates that while the said privilege continues in force the Government shall not have the power of undertaking for itself, nor of permitting any person to undertake, without the concurrence and consent of said Company. the opening or working of any maritime canal which may unite the two oceans across the said Isthmus of Panama, to the westward of the line of Cape Tiburon on the Atlantic and of Point Garachine on the Pacific. But it remains stipulated that the right which is conceded to the Company to give its consent does not extend to its opposing the construction of a canal across the Isthmus of Panama (except upon the route of the railroad itself) but only to its exacting an equitable price for such a privilege and an indemnification for the damages which the Railroad Company may suffer by the rivalry or competition of the canal.

If the sum which may be demanded by the Company shall not appear equitable to the Government of the United States of Colombia, then it shall be fixed by arbitrators in New York or Panama, one to be named by the Government, the other by the Company, and in case of their not agreeing, the two shall name a third, whose decision shall be without appeal. In pronouncing their decision the arbitrators shall take into consideration the grounds upon which the Company rests and the information which the Government shall give upon the matter, and in view thereof shall decide, without appeal, as they may deem most just and equitable. The sum, whatever it may be, which shall be finally designated, shall belong one-half to the Railroad Company and one-half to the Government of Colombia.

As the opening of the ship canal across the Isthmus would, of course, destroy the value of a road that has no local traffic to sustain it, an equitable decision of the arbitrators would probably allow damages to its full value—at least $25,000,000. As no company would be willing to pay so heavily for the privilege of beginning so costly a work, a difficulty presents itself at the outset which could not readily be overcome.

Another great difficulty in the way of cutting a ship canal at this point is the want of suitable laborers, who could resist the fatal influence of the climate. The experiences of the Panama Railroad Company in this matter show that to supply this want would be almost, if not wholly impossible. Colonel Totten, the engineer of the railroad, basing his calculations on his own experience and a thorough knowledge of the topography of the country, has given it as his opinion that, to build a canal in twenty years, a working force of at least 15,000 men would be needed. This would require an aggregate of more than 200,000 able bodied laborers, allowing for the desertion, sickness and mortality. The poisonous malaria that renders the climate of Central America fatal to whites is so generally known, that it would be difficult to persuade many Americans

to engage in the work, even if the most liberal inducements were offered. Natives could not be procured in sufficient numbers; Europeans would not be able to resist the influence of the climate; coolies would not pay the cost of importing them, if the experience of the railroad builders be taken as a test; and Jamaica negroes are not worth their rations as laborers. The only source, then, from which a suitable force of men could be obtained, is Africa, and if it should be necessary to press the natives of that country into the service, we should be reviving the most objectionable features of the old slave trade. To do this would require the consent of every European Government and, if carried out, would establish the dangerous precedent of a recognized and open trade in negroes.

But besides this difficulty in the way of building the canal, others exist touching its practical utility when finished. Of these the most important, perhaps, is that it would be available for steamers only; it being evident that, under ordinary circumstances, sailing vessels could follow the old route round Cape Horn more safely and profitably. The reason for this is that vessels would not only have to be towed through the canal but, before they could be fairly started on their voyage across the Pacific, it would be found necessary to tow them from one hundred and fifty to two hundred miles out to sea. The entire section of coast from the Equator to 15° north latitude is free from winds available for sailing vessels. Geographically it is known as the region of the Southeast and Southwest monsoons, and extends from 9° south latitude to the Equatorial calm belt which touches the western coast of Tehauntepec, about 15° north latitude; and longitudinally, from 78° to 119° west from Greenwich—including the entire western coast of Central America, Darien, Colombia and Equador. During most of the year this is a region of perpetual calms or light, baffling winds. To avoid being becalmed, it is necessary for vessels following the coast to keep nearly 200 miles to sea, to avail themselves of the Northeast and Southeast trades. This renders the bay of Panama far better adapted to steamers than sailing vessels, the latter being sometimes six or eight weeks, and often longer, in getting out to sea. If what we have said is true, the canal project does not promise to prove in all respects a commercial success, as most of the vessels engaged in the trade which it is designed to accommodate could follow the old routes more safely and with a saving of expense that would compensate for the additional time consumed in the voyage.

In addition to these objections the engineering difficulties to be overcome are very great. To meet these would involve an expenditure of several hundred millions, at least; and, considering the fact that the canal, when finished, would be only in part adapted to the uses for which it is intended, the practical question arises, will it pay for any one Government or company of private capitalists to undertake the work. It appears to us that it would not. Besides, we already have a railroad across the Isthmus which is capable of transporting freight at a cost but little greater, if any, than would necessarily be charged for canal tolls, towage and increased insurance premiums. With this road, the Pacific Railway and other trans-continental routes now building or in contemplation, all of which certainly afford ample facilities for the limited trade that would follow the canal, the project is not one on which our Government or people can look with very great favor, as promising sufficient benefit to warrant the necessary outlay. Aside from the engineering difficulties peculiar to Darien, the objections we have mentioned apply with equal force to any canal that may be built, or attempted, South of Tehauntepec; and although the construction of such a work would, doubtless, be highly gratifying to our national pride, we cannot afford at the present time to indulge a spirit of emulation without a prospect of reaping greater and more satisfactory results than are likely to follow an attempt to build an Isthmus Canal. Although the Government favors the project, it does not propose to grant pecuniary assistance, nor is it likely to do so. Under these circumstances we doubt if the naval expedition now fitting out will accomplish any more permanently beneficial results than the acquisition of more definite information concerning the geography of the Isthmus and the conformation of the mountain range that traverses its entire length.

Boston and Providence Railroad.

The earnings of this road for the fiscal years ending November 30, 1868 and 1869, were as follows:

Compared with the previous year the gross earnings show an increase of $108,911 96; with an increase in expenses of $34,112 23—making the increase in net earnings $74,799 73. The report says:

While the receipts for the year have thus increased to a larger sum than in any former year during the existence of the corporation, the net earnings have been greater than in any corresponding period in a still larger ratio. The increase of the gross receipts has been more than nine per cent. over those of the preceding year, against an increase in the operating expenses of a small fraction over four per cent.

There have also been paid from the receipts certain extraordinary expenditures, as shown by the accounts, amounting to more than five per cent. of the gross income, while the amount of material on hand is larger than remaining at the close of any preceding year.

There have been added to the equipment of the road during the year two new locomotives.

Four new passenger cars for our local trains, in addition to the first-class equipment, nearly new, which was taken by us on the discontinuance of the Bristol train, together with our proportion of four new cars built expressly for the "Shore Line," have given us such largely improved accommodations in this important department, as to require but little addition, which has already been contracted for, to make it in every respect complete and satisfactory.

We have also added to our rolling stock twenty-nine new freight cars, to meet the requirements of this department, the returns from which exhibit the gratifying fact of a net gain in the receipts over the previous year of more than $30,000, notwithstanding the sum of more than $48,000, the amount of the freight receipts of the "Bristol Line," now discontinued, was included in the receipts of the former period.

We have purchased and re-rolled during the year 1,550 tons of iron and steel rails, of which there has been laid all that the proper renewal of the superstructure has required, leaving a considerable quantity on hand for the supply of another year.

There have been erected two new passenger depots, one at the Foxboro' and one at the Mount Hope Station.

By authority of an act of the Legislature, and in accordance with a vote of the stockholders, passed at their last meeting, a subscription has been made, and the assessments thereon paid, on behalf of the corporation, for 150 shares of the capital stock of the Mansfield and Framingham Railroad Company. The additional connection which the completion of this enterprise gives to us at Mansfield, especially in the transportation of coal and other freight from our eligible tide-water at India Point, into the manufacturing region which it opens to us, has added to the inducements already existing, for placing our valuable territory at that point in a condition to secure to us the most remunerative returns. At this terminus of the road, where for obvious reasons, it is more valuable to us than if it were at our terminus in Boston, we have more than fifteen hundred feet of river front, the most favorable in location, and with the deepest water, in the harbor of Providence.

An order of the City Council of Providence the past year required us to change the location of our street track from India to Fox Point, and to relay and repave the same in a prescribed manner with cube paving, nine feet in width. The larger portion of this work has been done, and upon its completion an arrangement will be made with the Providence, Warren and Bristol Railroad Company, for its joint use with us on just and equitable terms.

The inconvenient and inadequate structures for carrying on our freight business in Boston, some of which are coeval with the building of the road, while others have been erected as temporary expedients as its business has increased, and being

of wood are more exposed to the perils of fire, and all of them so situated as to subject us to great inconvenience and large expense in the handling of our freight, have been the subject of complaint and discussion for several years. The directors have at length determined that the interests of the corporation will not admit of longer delay in the erection of a spacious and commodious freight house, in which all our freight can be handled under one roof, with a great saving of expense, and in the most convenient and expeditious manner. The foundations of this long needed structure have been laid, and it will be pressed to completion early in the present year.

Several purchases of real estate have been made during the year, beside those on the line of the road between Boston and Readville for the construction of the third track hereinafter referred to. The principal of these is a tract of about 32,000 feet, added to our station grounds in Boston, to replace that portion of our territory taken by the city for the widening and extension of certain streets. We have acquired, also, at very reasonable rates, three parcels, comprising about 170,000 feet, near our machine shops, which were required for their protection, and probable future extension. At Foxborough, the land for the new station house, and at Mansfield two lots necessarily required for our increasing freight and the new connection of the Mansfield and Farmingham Railroad, have all been obtained upon the most favorable terms. All these improvements and purchases have been paid for from our receipts, and without incurring a dollar of debt, to be a charge upon the earnings of future years.

In reviewing accounts of the past year, the most gratifying feature to be observed in them is the large proportion they exhibit of the receipts from the local or way traffic, compared with the whole business of the road. While they show, as derived from this source, nearly 63 per cent. of our entire receipts, the proportion of the net gain in income from passengers and freight for the year, from the same source, is 93.35 per cent. It is almost needless to say, with the history before us of the errors of railroad management in this country and in England, and the disastrous results that have flowed from them, that it is this department of its operations to which every railroad corporation must look for its main and most reliable resources in the present, and the only stable foundation of its prosperity in the future.

No managers, having control of one of these quasi public corporations, established by the govment for the promotion of the public interests in the increased facilities of transit and transportation, as well as for those of its stockholders in the earning of dividends, can afford, nor indeed have the right, to ignore, or be indifferent to, the claims of the people living and transacting their business on the line of its road, to the largest and most liberal accommodations which a just and reasonable reference to the interests of its stockholders will permit. This is not only a proper recognition of the true relation it bears to the public, but it is the wisest policy for the corporation itself. By a constant advance in this direction, multiplying the number of its trains, improving its station houses and equipment, and maintaining a rate of commutation fare between the suburban towns through which the road passes and its terminus in Boston, ranging from nineteen to forty-nine per cent. less than that of any other railroad leading from the metropolis, this corporation has helped to build up villages along its line with marvellous rapidity, and thereby largely increased its prospective and permanent sources of income. With enlarged depot accommodations, which the condition of many of our ancient and dilapidated structures demand should be renewed, and the erection of new ones in localities where the increase of business and population require them, there can be no reasonable fear that every well considered expenditure in this direction will be as remunerative to the stockholders, as will be promotive of the prosperity and comfort of these growing and thriving communities.

To carry out this policy in the most effective manner, and give to those who are in daily use of the road in passing between their places of business and their suburban homes every practicable accommodation, without subjecting the through passengers to the delay and annoyance of stopping at every station in the vicinity of Boston, the directors have determined upon the construction of a third track for the convenience of this short travel. They accordingly applied to, and received from, the legislature, at its last session, the requisite authority to take a sufficient quantity of land for this purpose, and were further authorized, in the same act, to increase the capital stock to an amount sufficient for this object, as well as for all expenditures for depot purposes that the needs of the corporation may require. A portion of the land for this improvement has already been purchased, and negotiations are in progress for other parcels, which, it is hoped, will be satisfactorily concluded at an early day, without the necessity of resorting to the legal tribunals to determine its value. The rails, which it is proposed shall be of steel, as being subject to the most constant wear, have been contracted for deliverable in season to be laid the coming year, and when the work is consummated, and all the advantages it offers to the residents on the line shall be realized, it cannot be doubted that the eligible building sites in that direction, as salubrious and inviting as any in the vicinity of Boston, now unimproved, will soon be as rapidly occupied by an enterprising population, who will become our daily passengers, as those of which the thriving town of Hyde Park is so notable an example.

While thus fostering the local business of the road, which is sure to give it a constantly increasing and a self-sustaining value, the directors believe they are reflecting the judgment, as they feel confident they are advancing the interests, of the stockholders. They believe that a resolute adherence to this general policy, of giving assiduous attention to the building up of a legitimate business between its own termini, although it may attract less public notice, and be regarded with less favor by speculative operators in railroad property, than the attept to carry out imposing schemes of what is termed railroad enterprise, many of which are apt to leave the property of the stockholders with no value at all, will approve and justify itself to those who hold its shares as a permanent and reliable investment.

At the same time, the directors have not been unmindful of the importance of their connections for the through freight and passenger business, which constitutes so valuable a source of our revenue. By an arrangement made with the several railroad and steamboat companies, comprising the "Sound Lines," so-called, between Boston and New York, which was rendered indispensable as a means of terminating the ruinous competition from which they all suffered so severely the previous year, the eastern terminus of the steamers "Bristol" and "Providence" was changed from Bristol to Fall River at the commencement of the season. The terms of this arrangement, while it left to us our long-established connection by the "Stonington Line," whose excellent equipment and management, with its staunch and commodious steamers, commend it to the favor both of the traveling public and the shippers of freight, together with our land line by the "Shore Route," which is fast growing in importance by the construction of the bridge across the Connecticut River, soon to be completed, secured to us also for a series of years a remunerative interest in all the through passenger business of the "Fall River Line." The experience we have had of its results during this, the first season of its operation, satisfactorily shows that it was a wise and judicious adjusment of long-continued controversies and competitions, whose fruits could only be disastrous to all the parties engaged in them.

In addition to the regular dividends from the earnings of the year, the directors have voted to distribute to the stockholders at par one additional share of the new capital stock, to each ten shares held by them of the old, the payments for which to be made on the first day of March next, of which due notice will be given them by the treasurer.

Superintendent.—A. A. FOLSOM.

Memphis, El Paso, and Pacific Railroad.

OFFICE, No. 90 BROADWAY,
NEW YORK, January 7, 1870.

To the Editor of the Railroad Journal.

SIR:—An editorial in the *Evening Post* of the 5th instant, attacking this company, obliges me to ask space in your columns for a reply.

The accusations it makes were all put forward vehemently throughout the past year, in Paris. They were met there legally and officially, by suits against their authors. The result of strict investigation there by parties interested in knowing the exact truth, is the best answer to put now before our public here. These parties are our bondholders, contractors, and the government which authorized the admission of our bonds to the French Exchange, and the circulation of our securities among the French people.

The *Post* is right in its statement that no American company had hitherto been admitted to quotation on the French Bourse. It is not right in its statement of the means used to obtain this admission. Nor was it a sudden movement, originated last spring. Persistent, steady, thorough work, through resident agents, had been in progress for more than two years, during which every possible information had been laid before the government and parties interested.

Its charter and franchises, and laws enacted in regard to them, everything relating to the country through which the road lies, and the great commercial results which would follow on its building, were made fully known to the persons with whom they were negotiating. The permission to admit our securities was finally obtained upon the understanding and agreement, that this admission should accrue to the advantage of French industry by applying the greater part of the money obtained from French people to the purchase of iron and engines for the building and operation of the road.

This opening out of new channels to French trade was thought worthy of the fostering care of the government. This was the reason, and it was upon this understanding, that our land grant bonds—which show what they are upon their face—were admitted to quotation and sale. And contracts were accordingly made for 45,000 tons of iron and a corresponding number of engines.

Our bondholders, who were necessarily alarmed by those attacks, had the fullest means of information given them. Their confidence is shown by their continuing to hold their bonds, and draw the interest, which they received in July last and now in January.

My dates from Paris are to the 22d of Decem-

ber. Up to that time, no suit whatever had been instituted against the company, except one by a person claiming damages for refusing to let him have bonds to sell, under an alleged contract which the company repudiates.

Our bonds were never withdrawn, nor was there a thought of doing so. On the contrary, an additional sale for 10,000,000 francs has just been made, and other negotiations are in progress with parties having full knowledge of the condition of the company, and all the assaults upon it.

The last official act of the French government, which was the admitting to payment of the taxes on the bonds, and the accepting of the security of Mallet Freres for their continued payment, was not made until August last. This recognition is the direct act of the government, and was done through M. Magne himself (the Minister of Finance referred to by the *Post*), long after all these discussions had been made familiar by the French newspapers.

The only real trouble to the company came from a source which it could not have foreseen, and for which it was not in any way responsible. We had been for two years applying to Congress, with a fair prospect of success, for its authority and aid in establishing our line. In the Congress preceding the present, our bill asking for subsidy had been amended by one asking for guarantee of interest. On account of the indisposition of Congress to grant moneyed aid, this bill was again amended by one asking simply the right of way. This bill passed the House twice by large majorities at the close of one Congress and at the beginning of another. It was mistaken in Paris for the bill, also pending in the House, which granted guarantee of interest for our construction bonds. This mistake first reached the knowledge of the company here by the French newspapers, which had already spread it through France. It was announced by them that this bill gave to our construction bonds a guarantee of 6 per cent. But these bonds were not in the market and have not been offered for sale. The bonds sold on the French market were land grant bonds of the company, which say what they are on their face. Neither journals nor brokers ever said that these had a guarantee of interest. The error was confined to the construction bonds, and this was from an error of accident, and not from intention.

When I reached Paris immediately afterwards, I found that this, which could have been a situation easily explained and corrected without difficulty, had been magnified and envenomed by rival and hostile interests. Under the best legal advice, I adopted such measures as in my judgment would adjust affairs, with the least injury to the company, its bondholders or contractors, and preserve for the company the strong position it had acquired. All the explanations needed for the information of the public were given, and a semi-monthly newspaper was established, with the object of keeping up full information concerning the condition of the company and the progress of its road.

In my efforts to protect this really national work, I was chiefly obstructed by the active and malignant hostility of rival railway interests, and of certain financial agencies which the company had omitted to employ, and by the unusual conduct of the American Legation, which became a recognized bureau of information against our company. A Legation represents its government, and its official position cannot be personally used. This conduct of our Legation, which never in any way referred for information to the company's office in Paris, but constituted itself the partisan of our opponents, was accepted as expressing, in the usual way, the views of our government towards the Memphis-Pacific as a national road, and the standing and information in which it was held at home. Among other acts, I will at this time only cite, that I was given to read a letter from the Legation to the representative of an adverse railway interest, to the effect that the Memphis and El Paso road was a speculative enterprise without foundation.

In respect to the right of way which we are asking, there only remains now for Congress to grant a strip across the Territory of New Mexico 150 miles in length, the rest having been acquired from private corporations.

We own and control in Arkansas, the Memphis and Little Rock Railroad. In Texas, the Memphis and El Paso Company has fully complied with the conditions of its charter, giving us the ownership and control of the line through that State. In Arizona we have purchased and own the charter of the Arizona Company, of which the line traverses that territory, and have complied with the conditions of its charter.

In California, we have purchased and own the charter, franchises and property of the San Diego and Gila Southern Pacific and Atlantic Railroad Company, which traverses that State—including 9,000 acres of land in the harbor of San Diego. In the harbor of Norfolk, we own over 1,000 acres. In addition to these, contracts and arrangements have been made by the company with other roads.

We have contracted with the Western Union Telegraph Company, to put up a line of telegraph along our road. Arrangements are partly completed for establishing a steam freight and emigrant line between Anvers and Norfolk, in connection with the company. We have a corps of engineers engaged in locating the San Diego and Gila line. We are indebted to the War Department for military protection to our surveying parties, and for permission to purchase their supplies from the government depots in that quarter.

Under actual circumstances it is not too much to say that the future of the road may be regarded as secured, notwithstanding the strength of the combination against it. Our contracts are in the course of uninterrupted execution. Shipments of rails have begun to reach New Orleans, and the first ten engines will be ready for delivery at the end of February. We are about to lay the rails on the Texas division. The Memphis and Little Rock Road, of which 100 miles are now in operation, will be fully completed by the 1st of July. With the work in progress we are expecting to have, at least, 250 miles of road in operation before the close of this year, with an estimated net income of over a million of dollars.

I regret to have to ask so much space, but even this is only sufficient for the brief and rapid summary, that does not do justice to the value of the work accomplished. It is barely sufficient to give the public an opportunity to compare a statement of facts with the charges which the *Post* has lent its editorial authority to send out broad-caste over the country against our work, a work that has twice received the approval of the House of Representatives, and which, otherwise unaided, is making its own way through a country impoverished by war, and which offers the quickest and best means for a true reconstruction in restored and extended industries, and in the prosperity and content these will carry with them.

Respectfully your obedient servant,
J. C. FREMONT, President.

Coal Trade of Baltimore.

We learn from the Baltimore *Price Current* that the amount of coal brought to Baltimore by the Baltimore and Ohio Railroad Company, from the Cumberland and other mines along which it runs, in 1869, was 1,888,157 tons, against 815,506 tons in 1868—an increase of 573,651 tons. The amount brought down by the Chesapeake and Ohio Canal in 1869, was 663,491 tons, against 465,070 tons in 1868—an increase of 198,421 tons. The total amount brought down in 1869 was therefore 2,041,648 tons, against 1,300,576 tons in 1868. These figures show an increase in the development of the Maryland and West Virginia mines for the past year amounting to 741,062 tons. Of the receipts per Baltimore and Ohio Railroad for 1869, amounting as above to 1,888,157 tons, there were shipped to foreign ports and California 23,000 tons, and to Northern home ports 785,240 tons—making the aggregate shipments hence for the year 808,240 tons. Included in the shipments to northern ports were 113,378 tons of gas coal from the mines in West Virginia.

Anthracite Coal Trade.

The coal trade statistics for the past and preceding years show the business of the leading carrying lines as follows:

	1868. Tons. Cwt.	1869. Tons. Cwt.
Philadelphia & Reading Railroad	3,574,873 14	4,239,456 18
Schuylkill Canal	987,627 30	696,793 01
Lehigh Valley R. R.	2,603,102 11	2,331,407 08
Lehigh Canal	989,970 09	605,143 16
Lehigh & Susquehanna Railroad	520,157 19	967,470 08
Delaware, Lackawanna & Western R. R.	1,728,785 07	1,563,987 19
Delaware and Hudson Canal	1,611,118 00	1,187,635 00
Pennsylvania Coal Co.	953,854 14	966,636 19
Total	12,969,485 04	12,558,531 09

This shows an increase in the amount carried by the Philadelphia and Reading Railroad of 664,583 04; Lehigh and Susquehanna Railroad, 447,312 09; and Pennsylvania Coal Co., 12,782 06—an aggregate increase by these three lines of 1,124,677 19. The decrease is in Schuylkill Canal, 290,834 09; Lehigh Valley Railroad, 271,695 03; Lehigh Canal, 384,826 13; Delaware, Lackawanna and Western Railroad, 164,797 08; Delaware and Hudson Canal, 423,478—an aggregate decrease of 1,535,630 03; making the net decrease, 419,053 15. For the last five years the tonnage carried by these companies was as follows:

	Tons.
For the year 1869	12,558,531
For the year 1868	12,969,485
For the year 1867	11,519,531
For the year 1866	11,251,269
For the year 1865	8,801,254

During the year 1869, the Delaware and Hudson Canal Company forwarded over the new railroad, opened in that year, from Honesdale to Hawley, (where it connects with the Erie system of roads,) an unascertained quantity of anthracite, perhaps a number of tons sufficient to reduce the deficit of 1869, compared with 1868, to about 250,000 tons. The significant fact remains, nevertheless, that the quantity of coal carried by the seven great companies was less in 1869 than in 1868; whereas, anterior to 1869, each calendar year exhibited an aggregate tonnage largely in excess of its next immediate predecessor.

Thus, as a glance at the figures given above will verify, the quantity for 1868, was 4,168,231 tons over 1865, showing in three years an increase of forty-seven per cent. And if we assume that, for 1870, the market east of the Susquehanna River and Chesapeake Bay, which is supplied by the seven companies that own the eight lines aforesaid, will require as large a percentage of increase over 1868, as that year exhibited over 1866, then will the aggregate tonnage of said companies, for the current year, approximate 15,000,000 tons.

This grand total, which can be distributed among the eight lines, on the basis of the quantity carried by each in 1869, or on a basis of the average of the last three or four years, will assuredly furnish abundant business to each and all the eight lines which supply the great market east of the Susquehanna and the Chesapeake.

Metropolitan (Mass.) Railroad.

The income of this company for the year ending November 30, 1869, was as follows:

From passengers, and tickets sold		$797,371 14
From other roads, as tolls or rent for use of road		6,386 23
From other sources		17,574 68
Total earnings		$821,332 05
The total expenses have been		686,745 20
Net earnings		$134,586 85
Add surplus of 1868		74,794 95
Total		$209,381 80
From which paid dividends, January and July	$125,000 00	
U. S. internal revenue tax on same	6,578 94	
		131,578 94
Leaving a surplus of		$77,802 86

The cars and other vehicles of the company have run, during the year ending November 30, 1869, 346,714 round trips, a total distance of 2,102,644 miles, and have carried in all 14,193,298 passengers, being an average of 5,769 miles run, and 38,885 passengers carried, for each day in the year. The increase in cost of road has been $33,342 38. Five new cars have been built in the company's shops, and 14 cars and 123 horses purchased.

The assets and liabilities of the company November 30, 1869, were as follows:

ASSETS.

Road		$963,987 06
Real estate and buildings		259,498 41
170 cars		153,165 94
914 horses		113,669 69
Sleighs and coaches		58,423 35
General equipment, consisting of engines, machinery, grist mill, tools, snow plows, harnesses, etc		46,248 71
Hay, straw and grain		15,179 85
Cash and sundry accounts		24,044 87
Tremont street land account		75,425 14
		$1,709,642 52

LIABILITIES.

Capital stock	$1,250,000 00	
Notes & bills payable	219,149 59	
Outstanding tickets	14,305 02	
		1,483,454 61
Assets over liabilities		$226,187 91

Philadelphia and Reading Railroad.

The receipts of this company for the fiscal years ending November 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$987,606	$1,184,006
" merchandize	1,415,723	1,579,623
" coal	6,252,224	8,346,240
" mail	29,150	29,170
" miscellaneous	107,234	69,342
	$8,791,937	$11,208,381
Gross expenses	6,162,511	6,876,313
Net profits	$2,629,426	$4,332,068
	1868.	1869.
Number of passengers	330,835	435,754
Tons of mdze	1,220,596	1,422,738
Tons of coal	3,574,874	4,239,457

This shows an increase in gross receipts of $2,416,444, with an increase in gross expenses of $713,802—making the increase in net profits, $1,702,642. The increase in the number of passengers carried was 104,919; in tons of mdze., 202,142; and in tons of coal, 664,583.

The gross expenses, including renewal fund, rents of lateral roads, taxes, etc., in the year 1869, were 61.35 per cent. of gross receipts, against 70.9 per cent. in 1868. The receipts per passenger were $2 71.7; and the cost of transporting the same, $1 44. The receipts per ton of mdze., $1 11; and the cost, $0 59.7. The receipts per ton of coal, $1 96.9; and the cost, $0 85.8.

The result of the year's business, as condensed from transportation and income account may be stated thus:

Receipts over cost of working the road			$4,332,068 51
Add balance of interest account, &c		$246,085 03	
Less loss in working the Mahanoy and Broad Mountain and Enterprise Railroads in '68 and 1869		179,225 54	
			66,859 49
			$4,398,928 00
From which deduct:			
Interest on bonded debt		$433,380 50	
Interest on bonds and mortgages		50,922 53	
Sinking funds		68,600 00

There has been declared a dividend payable in cash on the 17th January, 1870, of 5 per cent. on the preferred and common stock, $29,023,100 28		$1,451,155 01	
U. S. and State taxes on dividend and on excess of net profits over dividends declared		183,386 23	
			1,634,541 24
Balance of reserved fund			$623,743 32

Finances of Maine.

The whole amount of receipts into the State Treasury during the year ending December 31, 1869, (including $215,725 93 from the previous year,) were $1,155,540 43; the whole amount of payments during the same time were $919,609 80—leaving a cash balance in the Treasury at the close of the year of $235,930 63.

The aggregate amount due on account of municipal war debts is $3,105,183 33. Bonds for the payment of this amount are now ready for delivery. These bonds are payable in 20 years, interest semi-annually.

On the 1st of January, 1861, the funded debt of the State was $699,500. Of this debt there has been paid since that date $315,500, leaving outstanding of the old debt $384,000. Added to this is the war loan of 1861, $800,000; war loan of 1863, $525,000; bounty loan of 1863, $475,000; war loan of 1864, $2,832,500; municipal war debt, loan of 1869, $3,084,400; and the present funded debt is $8,100,900. Thus it appears that, as the result of the war, the funded debt has been increased $7,716,900.

The maturing obligations of the State for 1870 are the balance of the 1855 loan of $8,000, and the seventeenth yearly instalment due on notes given to Massachusetts in 1863 for purchase of lands—$25,000.

The "Funds" held in trust by the State amount to $1,691,283 81.

The sinking fund, established for the payment of the funded debt, will be ample to meet it as it matures. The act creating this fund provides for the raising, by taxation, each year, a sum equal to three-quarters of one mill on every dollar of the valuation of 1865. In addition to this a subsequent act provides for the payment of the war loan of 1861 of $800,000. The sinking fund now amounts to $972,530, and is invested in State bonds to the amount of $942,500, and in registered U. S. 5-20s to the amount of $30,000. To meet the payment of these bonds at maturity a tax of one-half mill on the dollar of the present valuation was included in the tax levy for 1869.

Debt of Boston, Mass.

The consolidated funded debt of the city of Boston, December 29, 1869, was $16,607,500 91; to which add loans authorized but not negotiated, $6,553,500, also amount advanced by the Treasurer on account of Oliver street, $272,937 93—making a total funded and unfunded debt of $23,433,938 84. This debt the Auditor of Accounts classifies as follows:

Water debt, (net cost of works)	$9,481,887 71
City of Boston debt proper	11,272,101 13
City of Boston war loan	1,916,500 00
Roxbury loans	764,450 00
Total debt, Dec. 29, 1869	$23,433,938 84

The total means on hand for the redemption of the same is $7,521,814 55—leaving the net debt December 29, 1869, $15,912,124 29. On the 30th of December, 1868, the consolidated debt of the city, funded and unfunded, was $18,428,502 76, and the means on hand for the payment of the same $5,618,309 75—leaving the net debt at that date, $12,810,193. Thus it will be seen that while the *gross* debt has been increased during the year, $5,005,436 09, that the means for its redemption increased during the same time $1,903,504 80; and that the net increase of the debt during 1869, was $3,101,931 29.

American Railroad Journal.

Saturday, January 15, 1870.

Stock Exchange and Money Market.

A notable increase in speculative dealings in Gold, Bonds, and Stocks, with an improvement in several branches of mercantile business, led to an active inquiry for money; and to the best class of street borrowers, the prevailing price of accommodation was 7 per cent. on call; while in the discount line, the range was from 8@15 per cent. per annum, on strictly choice to good grades of commercial paper. The city banks, during the week, added over three millions to their loans, while they reported a gain of over eleven millions of deposits, 3½ millions of legal tender notes, and about 4½ millions of specie. The U. S. Sub-Treasury, last week, reduced their specie balance about 6¼ millions, and their currency balance, about 1⅜ millions. The Office has since increased its specie reserve, about 1¾ millions, and its currency balance about a million.

The number of mercantile failures in the United States, last year, was 2,608, involving liabilities to the amount of $75,054,000, against 2,608, with liabilities of $63,744,000 in 1868. The failures in New York and Brooklyn, however, were more than ten million dollars less in 1869 than in 1868.

The specie reserve of the city banks according to the latest return is $35,664,830, against $27,384,780 same time last year. The city bank deposits are now $190,169,262, against $187,908,539 week ending Jan. 9, 1869. The legal tender reserve amounts to $48,537,734, against $51,141,128 same time last year. The circulation now stands at $34,182,280, against $34,844,156 same time last year. The loans are now $253,475,453, against $258,792,562 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $98,861,686 a day, against a daily average of $79,871,075 the preceding week, and $82,244,289 the week ending with Dec. 25, 1869. The current week's exchanges average about $108,889,679 a day. The city banks, last week, reported a gain of $4,497,922 of specie, $11,039,868 of deposits, and $3,503,126 of legal tender notes. They increased their loans, $3,069,066; and reduced their circulation, $18,607.

The city bank exchanges on Wednesday were $106,783,204.

National Bank notes to the amount of $238,840 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,702,671, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $20,021,614, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,680,957. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,425,050; and for the public deposits, $19,041,000—making a total of $361,466,050. The Treasury Department last week redeemed and destroyed $538,000 of worn and mutilated fractional currency, and issued $617,618 of new. The outstanding amount of fractional currency on the 1st of Jan., 1870, was $39,762,665, against $38,885,565 on the 1st of December, 1869.

The U. S. Sub-Treasury receipts, week ending with Jan. 9, were $6,194,439 in coin, (including $2,361,000 from customs duties,) and $4,489,535 in currency; payments, $12,475,598 in coin, (including $10,194,506 of coin interest,) and $5,864,078 in currency; balance at the close of the week, $93,703,872 (including $75,065,728, of coin, and $3,876,023 of currency,) against $90,057,420 at the close of the preceding week, showing an increase of $3,646,452. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $990,350 in coin, (including $287,849 from customs,) and $1,576,048 in currency; payments, $790,909 in coin, (including $761,749 of coin interest,) and $678,342 in currency. On Tuesday, receipts, $2,232,560 in coin, (including $275,094 from customs,) and $223,469 in currency; and payments $763,850 in coin, (including $743,449 of coin interest,) and $248,859 in currency. The balance at the close of business on Tuesday stood at $83,820,053, (including $4,748,249 of currency, and $76,733,879 of coin,) against $92,206,272 a week previous; and $88,802,947 on Dec. 28, 1869. The aggregate receipts of the office in Dec. were $51,554,741, including $6,969,667 from customs; aggregate payments, $48,729,064, including $2,430,597 of coin interest.

The outstanding amount of coin certificates on the 1st of Jan. 1870 was $40,170,380, against $36,862,940 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $2,062,510 of coin certificates through the receipts for customs.

Government revenues have been yielding moderately since our last. The excises yielded about 3¼ millions; customs at the port of New York, $2,199,510, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $6,936,850 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 90 millions.

The Gold speculation has been decidedly brisk and buoyant, since our last, influenced by various political reports, and by an active purchasing demand, largely to cover outstanding obligations. The price has ranged from 120⅛@123¼, the higher figure having been made on Monday, on which day, the dealings were unusually extensive. The later transactions in Gold showed a less confident temper. The closing quotation on Wednesday was 122. Government sold a million of Gold on the 6th inst., at from 120.25@120.35, and $1,670,000 on the 10th inst., at from 122.16@122.39. The latter was the dividend which U. S. Treasurer Spinner had received from the Sinking Fund interest of $1,693,000 in gold, which he at once decided to invest in the principal of the Sinking Fund. He accordingly ordered Assistant Treasurer Folger to sell the gold either privately or publicly, in his discretion, and with the proceeds to purchase bonds. On Wednesday, another million of Government gold was marketed at from 122.02@122.23. The general market closed tame and weak.

The customs revenue of the port on Wednesday was $421,454.

The coin balances of the Government at this port on Wednesday morning, amounted to about 76¾ millions.

The coin interest disbursements on Wednesday were $531,507.

The customs demand for Gold last week, averaged $393,500 a day; thus far, this week, it has averaged $281,424 a day, or equal to a weekly aggregate of $1,688,544. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $63,496; and in all 1869, $14,918,725, against $7,163,071 same time in 1868. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $66,921,093, against $62,016,536 in 1868–'69. At San Francisco, from Jan. 1, to Dec. 31, 1869, $8,332,806, against $8,546,548 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Jan. were about 87½ millions.

The exports of specie, from this port, last week, were $482,670, against $645,628 same week last year; total, since July 1, 1869, $17,168,130, against $22,335,424 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $10,194,506, and since July 1, 1869, $53,943,975, against $53,678,049 in 1868–'69. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1869, were $37,285,118, against $35,444,395 same time in 1868.

There has been a moderate movement in foreign exchange at about previous rates. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108½@108¾, and on Paris to 5.22½@5.17½; sight bills on London to 109⅛@109⅜, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been on a more liberal scale this week. The week's exports of domestic produce have been to the currency value of $3,518,756, making the total since July 1, 1869, $111,939,097, against $84,229,924 same time preceding fiscal year.

The reported auction sales of improved real estate in New York, last year, reached $16,021,681, and of unimproved $11,725,029.

Government securities have been in lively request at decidedly higher prices. The demand has been largely for the 1862 and 1867 Five-twenties for export, and for the 1867 and 1868 Five-twenties, the Ten-forties and the six per cent. currency bonds, for home investment and speculative purposes. The offerings of bonds have been limited at the going rates. On Tuesday, Government bought in, on account of the Sinking Fund, $1,780,000 of Five-twenties at from 114.42 @114.87, out of an aggregate offering of $3,625,000. On Wednesday, the market exhibited less animation and less firmness.

U. S. sixes of 1881 closed here buoyantly at 118⅛@118¼; U. S. Five-twenties of 1862, 116@116⅛; U. S. Five twenties of 1864 at 115⅝@115¾; U.S. Five-twenties of 1865 at 115⅝@115⅞; U. S. Five-twenties of 1865, consolidated, 114⅜@114½; U. S. Five-twenties of 1867, 114⅝@114¾; U. S. Five-twenties of 1868, 114⅝@114⅞; U. S. Ten-forties at 113@113⅛; U. S. Six per cent. currency bonds, 109¾@109⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 29.	Jan. 5.	Jan. 12.
Consols	92	92⅝	92⅝
U.S. 5-20's of 1862	85⅞	87¼	87
U. S. 5-20s, 1865	84⅞	86¼	86¼
" 1867	84⅛	85¾	85⅞
" 10-40s	82⅞	84¾	84¾
Erie	18½	18	17½
Ill. Central	99¾	....	103
At. and Gt. West	25½	....	25

State bonds have been in much better request and generally stronger in price, the main exception having been the North Carolina Sixes, which have been depressed to 24@24½ for the new issue. Railroad bonds have been more sought after at advanced figures, including the Central Pacific Sixes at 90@91½; Western Pacific Sixes at 90 per cent. and interest, at which five-sixths of the whole loan have already been marketed, leaving only about $490,000 yet to be disposed of, Union Pacific Sixes at 81@81⅛.

The total sales at the Stock Exchange, last year, were only 10,573,058 shares of stock, against 19,713,402 shares in 1868. The transactions for the month of December were only 189,840 shares, against 1,093,730 shares for the same month of 1868.

General business has shown more animation in leading articles, including Breadstuffs and Provisions at, however, lower and irregular figures, and Naval Stores and Petroleum at advanced prices. Middling upland cotton closed heavily on Wednesday at 25@25⅛ cts. per lb. The stock of cotton now here is given at about 56,500 bales. The receipts at the port this week, have averaged about 3,900 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,415,400 bales, against 1,111,900 bales in 1868–'9; exports, same time 748,000 bales, against 700,600 bales same time in 1868–'9; stock on hand at latest dates, 415,000 bales, against 291,000 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 140 pkgs., against 88 pkgs., same time in 1869. From Boston, 55 pkgs., in 1870, against 696 pkgs. same time in 1869.

Foreign goods have been in rather better demand, but have been irregular in price. The week's imports reached a specie value of $4,552,395.

At the Live Stock markets, this week, Beeves have been in more demand, at from 10@17¾c., per lb.; week's receipts, 5,859. Milch cows inactive, at $40@$100 each, receipts, 77. Veal calves in fair request at from 8@12½c. per lb.; receipts, 445. Sheep and lambs in less demand at from 5@8¼c., and 7@8½c. per lb.; receipts, 37,246. Swine in less request at 10¼@10¾c. per lb., all live weight; receipts, 9,758.

Ocean freights have been rather more active, and quoted somewhat stronger. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 3d.@1s. 6d. by steamer, per bbl.; grain at 4½d. by sail, and 4½d.@4¾d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@22s. 6d. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 464.

The balance in the Sub-Treasury on Wednesday was $82,774,731 62.

The New York exports, exclusive of specie, for the week ending Jan. 11, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$3,376,680	$3,518,756
Previously reported	1,926,240	2,174,516
Since Jan. 1	$5,302,920	$5,698,272

The imports for the week ending January 8, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,037,193	$1,297,855
Gen. merchandise	2,500,320	3,255,040
Total for the week	$3,537,513	$4,552,895
Previously reported	....	....
Since January 1	$3,537,513	$4,552,895

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Central of New Jersey new bonds, 98½; do., 2d mort., 94; Long Dock bonds, 82; Pacific 7s, guar. by Mo., 91½; Col., Chic. and Ind. Central 2d mort., 65; Buffalo, New York and Erie 1st mort., 84; Mil. and St. Paul 1st mort., Iowa Div., 82; Great Western 1st mort., 1888, 84½; St. Louis and Iron Mt. 1st mort., 81¾; Toledo, Peoria and Warsaw 1st mort., W. ☞ FIRST CLASS SECURITIES. TANNER & CO., BANKERS, No. 49 Wall st., New York, have for sale a line of investment securities of the highest order. Among them,

6 Per Cent. First Mortgage Gold Bonds St. Louis and St. Joseph R. R. Co., May and November.

8 Per Cent. First Mortgage Gold Bonds St. Joseph and Denver City R. R. Co., February and August.

10 Per Cent. Bonds of Marion County, Missouri, May and November.

10 Per Cent. Bonds of Monroe County, Missouri, January and July.

All of which we can recommend with the utmost confidence.

TANNER & CO.,
No. 49 Wall street, New York.

☞ An extensive vein of bituminous coal has been discovered twenty-eight miles above Chico and seven miles from the California and Oregon Railroad. The vein is thirty feet thick. The coal is free from sulphur. The discovery is regarded of great importance to Northern California.

Maryland Railroads.

The Governer of the State of Maryland, who is also President of the Baltimore and Potomac Railroad Company, says in his message, that work upon his road is rapidly progressing. Forty miles of it were graded during the last year; the rest of the grading is already under contract or will be immediately. Much heavy bridging has been constructed; many cross ties have been purchased and delivered along the line, and he confidently predicts the completion of the whole road from Baltimore to the Potomac River in Charles County within two years. The importance of this road to the State, opening as it does another communication between Washington and Baltimore, and establishing direct railway, and the shortest connection between Baltimore and the South and Southwest, cannot be over-estimated.

The Metropolitan road has been commenced. The Southern Maryland Railroad has been surveyed, its Board of Directors organized, and it is said the road will soon be placed under contract; the Drum Point road has also been surveyed and favorably reported on; the Maryland Central road is in active and interested hands, and the Governor looks hopefully to the speedy construction of all these, and still other roads tending to the advancement of the State's prosperity and growth.

New Bedford and Taunton Railroad.

The gross receipts of this road for the year ending November 30, 1869, were $200,162 54; total expenditures, $148,723 96; net income, $51,438 58. The above does not include receipts and expenses of the Fairhaven road which are as follows: Gross receipts, $55,069 42; expenses, $50,301 96; net income, $4,767 46; making the total net income of the N. B. & T. R. R. Company, $56,206 04. The company has paid as dividends, during the year, $40,000; and its surplus now is, $119,163 41.

☞ The Belair *Record* says that Engineer Fuller has completed the survey of the "Plum Tree Branch" line of the Harford County Railroad, and reached Magnolia, on the Philadelphia, Wilmington and Baltimore Railroad, on an average grade of less than fifty feet per mile. The length of this route is under ten miles.

☞ The Board of County Commissioners of Washington County, Md., have made provision for the payment of the interest on the bonds of the Western Maryland Railroad endorsed by the county, and not on the bonds of Washington County, as stated in our last; that interest has always been met promptly at maturity.

☞ The Richmond, Virginia, *Dispatch* says that the amount of money in the State Treasury on the 4th inst., was $756,000, of which $250,000, has been paid over to the Second Auditor, with which that officer will pay the January interest on the State debt. The July interest on the foreign debt will also be paid at once.

☞ The Utah Central Railway has been completed. The last rail was laid at the depot grounds in Salt Lake City on the 10th inst., with imposing ceremonies.

☞ The stockholders of the Lexington and Arlington Railroad have ratified the action of the Directors in selling the road to the Boston and Lowell Railroad Corporation for $140,000.

Two-Feet Gauge Railway.

The Festiniog Railway was first brought under the notice of the public in a paper read by Captain Tyler at the Institution of Civil Engineers in 1865. Its construction was authorized by an act passed in 1832. It was originally designed as a tramway for the conveyance of slate, coal and stone from the quarries in the hilly districts of Merionetshire to the various ports of shipment. The conditions attached to the making of the road were of a very unusual character. The lands to be taken for the purposes of the road were in no case to exceed twelve feet in width, except where necessary for station purposes, cuttings or embankments, and the gauge on the road was in no case to exceed three feet. The difference in level between the terminus at Portmadoc and the top of the mountain at Dinas was 700 feet, the distance traversed 12½ miles, so that a continuous gradient of 1 in 92 had to be surmounted. The steepest gradient is 1 in 60, and the curves are in some cases as sharp as two chains radius, and in two instances only 116 feet. The line is a succession of curves, and so close do they follow each other that an ordinary train on some parts of the line is on three separate curves at the same time; at one part the curve is so sharp that the engine is abreast of the last carriage in the train. The gauge of the line, instead of being three, is only two feet. Three lines of this gauge may be laid within the seven feet of the Great Western, and leave one foot to spare, or three of these could be laid in the six feet usually left between lines on the narrow gauge roads. Strange things indeed have come to pass in the railway world since Brunel sent to the Directors of the Great Western that famous report of his which recommended the adoption of the seven feet gauge as the best, and in the end the most economical, that could be adopted. That seven feet gauge has all but disappeared, and at the moment when the Directors of the Great Western are congratulating themselves upon the rapidity with which the conversion of a section of their road into the 4 feet 8½ inch gauge was carried out, we have to record the remarkable success of the two feet gauge. Starting from London on the broad gauge, we changed on the narrow at one portion of our journey into Wales, and at last found ourselves in the presence of the miniature line at Festiniog. These several gauges may be taken to represent the past, present and future of the railway system of the country. We do not mean to be understood as supposing that the two feet will be the future gauge of all the railways, but it is one which sooner or later will be extensively adopted on the score of its economy and efficiency, and because of the practical solution which it will afford of the great question of reducing the proportions of dead weight to paying loads on our railways.

A few words on the practical question of the financial results of the working of the Festiniog Railway will awaken the interest of the holders of railway stock to the subject. This little wonder of a railway, then, pays 30 per cent. upon its original capital. Yes, positively 30 per cent. upon its original capital. The line was originally constructed for £36,000, or less than £3,000 per mile, including a tunnel of something like half a mile in length, and a series of shelf-like cuttings on the side of the syenite mountains up which it winds its way, resting in some parts on breast walls of more than fifty feet in height, and a goodly proportion of it under and over bridges. Since the line was made, about £50,000 has been expended upon improvements, additions to the rolling stock, and other matters, which, paid out of revenue, has since been capitalized, and the total capital now is £86,000, or say a little over £6,000 per mile. For the half year just ended the shareholders have received their usual dividend of 6 per cent., or 12 per cent. per year upon the whole capital, or as we have just stated, 30 per cent. upon the sum originally expended.

"How is it," we may be asked, "that such results as these can be obtained?" The answer is a very simple one. It is because the proportion between the dead weight and paying weight is so much less than upon other railroads. The engine and tender upon this line weigh about 10 tons as against 40 tons upon the wider gauge of other lines. Instead of a first class carriage weighing 7½ tons, to carry 32 passengers, and representing nearly 5 cwt. of dead weight for each passenger, the carriages on the Festiniog weigh only 30 cwt. for 12 passengers, or 2½ cwt. for each person carried. On this miniature line a truck weighing 17 cwt. is made to carry a load of nearly four times its own weight; while on the ordinary gauge a truck will not carry more than twice, and in many instances a load not greater than its own weight. Here, therefore, is the great secret of success, and the lesson which the experience of the working of this small Welsh line teaches is that the nearer we can approximate to the paying load the greater will be the profitable results obtained. The amount of business done on the line, from which this satisfactory dividend was obtained, is small compared with the figures to which we are accustomed in the reports of other railways. The quantity of slates carried was 112,051 tons, and merchandise 14,693 tons. The train miles run were 46,732. The total receipts were £22,852, and the money value of increased stock £5,655. Total expenditure was £17,871, or including tolls, rates and taxes, about 42 per cent.

The line is worked by a class of engines designed by Mr. Fairlie, C. F., of which the seventh —the "Little Wonder," constructed by the Fairlie Engine and Steam Carriage Company at New Cross, is a fair type. It has four cylinders, 8⅞ in. in diameter, with 13 in. stroke and 2 ft. 4 in. (28 in.) coupled wheels. The tanks contain 1,000 gallons of water, and the whole weight, in steam, is estimated at about 20 tons. The total wheel base is 19 feet, each bogie having its wheel centres spaced 5 feet apart. For each pound average effective pressure on the piston sixty pounds of tractive force are exerted at the periphery of the driving wheels, or with 100 pounds mean effective pressure, a total force of 6,000 pounds. The "Little Wonder" is worked at a boiler pressure of 160 pounds to 200 pounds; the boiler, of Sir John Brown's steel, being 2 feet 4 inches in diameter, ⅜ inch thick, and double riveted in the longitudinal seams. The engine easily hauls from 100 to 150 empty slate trucks up the line, or, say 100 to 150 tons, including its own weight, on a line rising, on the average, 1 in 92, and occasionally 1 in 80.

On a recent trip made over the line, at which Lord Alfred Paget, Mr. Moon, the Chairman of the London and Western Railway, and a number of other gentlemen interested in railway matters were present, the load taken by the engine was made up of the following:

	Weight. Tons.	cwt.	Length. Yards.
111 slate wagons	74	0	287
6 carriages	9	0	22
60 passengers	4	10	...
12 goods wagons	26	6	30
	113	16	339
Add the engine	20	0	9
	133	16	348

Making together a total load of 133 tons 16 cwt., and a total of length of train, 348 yards. *The Engineer*, in its account of this trip, says:

Over the new portion of the road a speed of over 16 miles an hour was attained with ease, and on one occasion a velocity of about 35 miles an hour was reached, the bogie engine swinging round the curves with graceful ease and a total absence of strain or jerk. During each minute the train passed over a distance 1,760 feet, and as the wheels were 2 feet 6 inches in diameter, they made 240 revolutions per minute, a velocity increased during many portions of the run to as much as 360 revolutions per minute; but even at this tremendous speed—corresponding to a velocity of about 90 miles per hour for a 7 feet wheel—the engine run with an almost total absence of oscillation, nor did the bearings heat in the slightest degree. A speed of 90 miles has never yet been attained on any railway, and up to the present moment it follows that the narrow gauge has beaten the ordinary gauge in its relative power of transporting passengers at high velocities. Nor is to be assumed that 35 miles an hour is a limit which cannot be exceeded. It is to be borne in mind that the Festiniog engines are really good engines in relation to the road on which they run. The "Little Giant," with 2 feet wheels, works under just the same relative conditions as a 4 feet 8½ inches engine, with 4 feet 8½ inches wheels. No one expects an express speed from such engines; but there is no good reason why the Festiniog line should not be worked with 3 feet wheels, that is to say a gauge and a half high—a proportion adopted in many of the best engines of the day which have driving wheels 7 ft. 1 in. in diameter.—*London Railway News.*

Journal of Railroad Law.

PASSENGERS OF RAILROAD COMPANIES FOR VIOLATIONS OF ITS RULES CAN BE EXPELLED AT STATIONS—STATUTORY CONSTRUCTION—LAW OF EVIDENCE.

The facts in the late case of The Illinois Central Railroad Company *vs.* Sutton, (42 Ill., p. 438,) are fully and clearly stated in the following by

LAWRENCE, J.—We held in the case of the Chicago and Alton R. R. *vs.* Flagg, that when a railway company carries passengers in a car attached to a freight train, and adopts a regulation requiring tickets to be purchased before entering the train, and a passenger disregards the rule, he can only be expelled from the train at a regular station. It is urged that this provision of the statute, forbidding passengers to be elsewhere expelled, applies only to the case of refusal to pay the fare and not to a violation of any other reasonable rule. But the wilful neglect to buy a ticket at the time and place required by the rules, and the refusal to pay the fares, are substantially the same offense against rights of the road, and the former can be visited by no heavier penalty than the latter. But in this case, as in the other above referred to, there was no satisfactory proof that the plaintiff was cognizant of the rule, and he offered to pay his fare to the conductor, who refused to receive it, and compelled him to leave the train at some distance from a station. He was, indeed, informed of the rule just before the train started, and then sought to buy a ticket, but the office was closed. Under these circumstances he was clearly entitled to his action.

He claims to have been suffering from disease, and that it was aggravated by the walk incident to his expulsion from the cars. To prove this, a physician was examined, who testified he visited the plaintiff and found him suffering much pain; that he had been attending him for two years, and had cautioned him against severe exercise, and that the plaintiff informed him his present condition was caused by over exertion in walking. The defendant moved the Court to exclude so much of this evidence as related to what the plaintiff said of the cause of his condition. This the Court refused to do, and in this decision there is error. A physician, when asked to give his opinion as to the cause of a patient's condition at a particular time, must necessarily, in forming his opinion, be to some extent guided by what the sick person may have told him, in detailing his pains and sufferings. This is unavoidable, and not only the opinion of the expert, founded in part upon such data, is receivable in evidence, but he may state what his patient said, in describ-

ing his bodily condition, if said under circumstances which free it from all suspicion of being spoken with reference to future litigation, and give it the character of *res gestæ*. But to permit a party to prove what he himself stated to his physician, not in regard to the character and manifestations of his malady, but in reference to its specific cause, when that is one of the issues before the jury, would be carrying an acknowledged departure from the ordinary rules of evidence having its origin in necessity, to a most dangerous extent. State of Vermont *vs.* Davidson, 30 Vt., 377.

The propriety of enforcing this rule in the present case is manifest from a careful consideration of the evidence. The physician was asked as to his professional opinion of the cause of the plaintiff's illness. This opinion he gives nowhere in his testimony, but instead thereof, he states that the plaintiff said his sickness was caused by over exercise in walking. True, the physician says he had cautioned the plaintiff against over exercise in walking, and that walking would injure him, but he does not give his professional opinion, that the illness which confined the plaintiff for several weeks, was due specifically to that cause, although that impression is allowed to be made upon the minds of the jury. It seems to us not impossible the physician may have been unwilling to state as his own belief, that the plaintiff's long confinement was due to the walk taken by him after having been expelled from the railway train. That expulsion occurred only between one and two miles from the station. It appears in the testimony that plaintiff "was walking about the premises," while waiting for the train at the station. He was engaged in the tin and hardware business, and two of his witnesses swear his time was worth fifty dollars per day. If that was true he must have been leading a life of great activity. We can well see, therefore, that the physician may have been in doubt as to whether the walk of that day caused his illness, and whether in doubt or not, he should not have been permitted, against the objection of the defendant, to give to the jury the statement of the plaintiff in lieu of his own professional opinion. It is urged by counsel for appellee, that the fact of his having been obliged to walk from one to two miles is proved by other witnesses. That is true, but the question was, whether his illness was attributable to that walk, and on that point the only direct evidence in the record was the statement of the plaintiff himself. Perhaps the jury would have presumed this from the fact, that the illness immediately followed the walk, and from the statement of the physician, that the plaintiff had for a long time been suffering from a disease which would be aggravated by severe exercise. But we cannot tell how far the jury may have been influenced in fixing the damages by this statement of the plaintiff, given to them through the physician, and as it was illegal evidence, we must reverse the judgment, and remand the cause for another trial.

Judgment reversed.

☞ The East Tennessee and Virginia and the East Tennessee and Georgia Railroads have been consolidated. The new company has assumed the name of the "East Tennessee, Virginia and Georgia Railroad Company.

Cleveland and Pittsburg Railroad.

The receipts of this road for the year ending November 30, 1869, were $2,430,675 96, and the expenses, $1,456,649 67, leaving as net earnings, $954,027 10. Out of the net earnings, $413,601 79 was paid on mortgage interest, lease of track, sinking fund and mortgage bonds of 1900, leaving a surplus of $540,425 40 as net income from the business proper of the road. To this must be added the amount due from the Pittsburg, Fort Wayne and Chicago Railroad for the four quarters ending September 30, 1869, which as now settled, is $196,459 98. The settlements since January 1, 1869, are subject to revision and alteration under the existing contract and amendments; therefore this amount is not included in the statement above.

There have been paid out of the above surplus three dividends free of Government tax, as follows

April 13, (tax included)	$125,466 12
July 10, (tax included	128,580 53
October 20, (tax included)	132,648 42

Compared with the previous year the gross receipts show an increase of $107,316 06, with a decrease in expenses of $13,775 87, making an increase in the net earnings of $121,091 93.

Of the expenditures the following are the items pertaining to the cost of equipment. Five new engines, $61,300; one new passenger coach, $3,781 95; five new caboose cars, $5,653 38; three hundred gondolas, $184,131 53; fifty new box cars, $40,000; machinery and personal property, $1,562 81. Total, $296,459 17.

In October, the directors ordered an increase of capital stock of fifteen per cent. to be distributed to the stockholders on and after November 6th, 1869, amounting to $945,071 25. The total capital stock outstanding at the close of the year is $7,241,475, an increase since the close of last year of $1,282,700, which is accounted for as follows:

Increase of November, 1869	$940,750 00
Conversion mortgage bonds	340,500 00
Exchange of fractional scrip, &c	1,450 00
Total	$1,282,700 00

North Pennsylvania Railroad.

The earnings of this road for the fiscal year ending October 31, 1869, were $1,132,731 14, the expenses, including renewals and repairs, $640,262 31, and the net earnings, $492,468 83. The charges for interest, United States and State taxes, &c., were $275,769 76—leaving $216,699 07 as the net profit for the year, being a fraction under seven per cent. on the capital stock of the company.

Out of the profits of the past year a scrip dividend of five per cent. (convertible into 7 per cent. bonds of the company) has been declared. Five first-class locomotives, four first-class passenger cars, and one hundred and ten freight cars have been added to the rolling stock. The road is now in a better condition than ever before.

☞ The receipts of the Cambridge Horse Railroad Company for the year ending November 30, 1869, were $427,047 17, and the expenses, $417,692 74, showing an excess of receipts of $9,354 43. No dividend will be declared. An increase in the capital stock of the company to the amount of $200,000 was recommended.

Finances of Rhode Island.

The funded indebtedness of the State at the close of the rebellion was $4,000 000, of which there has subsequently been redeemed $1,072,500, leaving outstanding $2,927,500 in State bonds, bearing interest at six per cent. per annum, payable semi-annually. None of the bonds are payable previous to 1882.

At the end of the fiscal year, April 30 1868, the Treasury was overdrawn $61,574 62.

The receipts from the ordinary sources of revenue for the fiscal year ending April 30, 1869, were	$688,503 99
Payments during the same period, exclusive of $61,474 62 for overdrafts, and $132,000 for redemption of State bonds, were	440,590 71
Being an excess in receipts of	$247,912 38

Deducting the last two items above named, for overdrafts and bonds redeemed, and adding receipts from other sources, there remained in the Treasury on the 30th April, 1869, $123,224 48.

The estimated receipts of the fiscal year ending April 30, 1870, are	$650,000 00
Estimated payments	580,000 00
Excess of receipts	$70,000 00
To which add the balance in the Treasury on the 30th April, 1869	123,224 48
Will leave in the Treasury	$193,224 48

Finances of New Jersey.

The receipts of the treasury on account of State fund during the year ending November 30, 1869, were $678,908, and the disbursements (including $93,270 refunded to war fund,) $676,147—leaving balance in bank, $2,761. The receipts on account of the war fund, (including $93 270 from State fund, and $27,549 from the United States,) were $415,883, and the disbursements (including $290,000 to Commissioners of the sinking fund,) $415,397—leaving balance November 30, 1869, $1,436.

The war debt has been decreased $99,900 within the year by bonds taken up by the Commissioners, leaving the balance of war bonds outstanding November 30, 1869, $3,096,200, and at this date $100,000 less, being amount due and paid January 1, 1870.

The outstanding indebtedness of the State (war fund) on the 30th of November, 1869 was	$3,096,200
From which deduct assets in hands of Commissioners	1,044,929
Leaving an indebtedness beyond assets of the sinking fund	$2,051,270

The receipts of the school fund have been $137,681, of which $100,000 have been distributed to public schools, and $27,393 invested for the fund, leaving balance in bank, $9,287. The aggregate of the school fund is $570,391.

☞ The receipts of the South Boston Railroad Company for the year ending November 30, 1869, (including $314 54 from the previous year,) were $232,391 06; and the expenditures, $190,591 62—leaving a balance of $41,799 44; out of which dividends have been declared amounting to $33,684 20, leaving a balance on hand at the close of the year of $8,115 24.

☞ The Directors of the proposed Rochester and State Line Railroad have adopted the West or Warsaw route.

Finances of Missouri.

From the message of the Governor we learn that the debt of Missouri in 1869, was $3,000,000. The interest on the bonds for July is already provided for; that of January following can easily be arranged. There is now in the Treasury nearly $600,000 which belongs to the interest fund. The principal of the bonds maturing in 1872, amounts to $477,000, and that of 1873, of $680,000, can also be promptly met. During the past year 360 miles of railroad were built, and 1,035 miles are now in course of construction. The public school fund amounts to over $1,600,000, and the schools throughout the State are prosperous.

☞ Of the five railroads which have their termini at Sacramento, the Central Pacific Company has control of four. The only exception is the California Pacific, which is extending its line northward toward Oregon, and will contend with the Central Pacific for the control of the business of transportation in Northwestern California.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

CEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

IRON RAILS.

IRON RAILS OF SUPERIOR QUALITY FROM THE CELEBRATED PARK GATE IRON COMPANY, OF ROTHERHAM, ENGLAND. For sale by

WM. BAILEY LANG & CO.,
No. 54 Cliff Street.

Novel Improvements for R. R.

Novel devices, keeping cinders, sparks, dust, etc., out of railroad cars and other windows; slats are made vertical, with raised centres of any material, to move or remain stationary as required, so that the velocity of the car current of air will reverse them, and glide the dust, cinders, etc., away. Ventilators, removing foul air, replacing it with pure air in cars, etc., by drum, two conical tubes by the pressure of air through the small tube into a larger tube, creating vacuum to draw the air through the deck into the larger; the drum revolves bringing the larger end of the tube to receive the air by velocity of the car, the pure air is replaced at the bottom of the car by use of wire cloth, conical shape small end open and downwards. Rails to prevent sliding or movement either way, and the use of fish joints, etc.; they have Vs rolled under them and about half circular on the sides of the rise, and bolted in the middle of the rail where there is no expansion or contraction. Notes from car builders and others will be attended to. Models, etc., may be seen at the office of the inventor.

A. BEEBE,
98 Cedar st., N. Y.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

INTEREST ON CITY STOCKS.—The interest on the Bonds and Stocks of the Corporation of the City of New York, due February 1st, 1870, will be paid on that day, by PETER B. SWEENY, Esq., Chamberlain of the City, at his office, in the New Court House.

The transfer books will be closed TUESDAY, January 4, 1870.

RICHARD B. CONNOLLY, Comptroller.
DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, NEW YORK, Dec. 30, 1869. 4t2

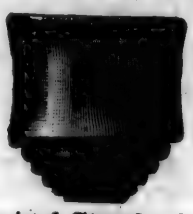
OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, January 4, 1870. A dividend of FIVE PER CENT. in cash, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 1st day of February next, to the holders of full paid shares registered at the close of the seventeenth day of January instant, after which date and until the fifth day of February next, the transfer books will be closed.

THOMAS E. WALKER,
4t2 Treasurer.

RAILROAD CAR MANUFACTORY FOR SALE.

THE SUBSCRIBERS, EXECUTORS OF WM. CUMMINGS, deceased, will expose to sale at public vendue, on Thursday, the 20th day of January, 1870, at two o'clock in the afternoon, at Taylor's Hotel in Jersey City, (if not previously disposed of at private sale,) all of the following described lots of land and premises at Jersey City, in the County of Hudson and State of New Jersey, consisting of the RAILROAD CAR MANUFACTORY of the deceased, viz:

Lots Nos. 121, 123, 125, 127, 129, 131, 133, and 135, fronting on Washington street.
Lots Nos. 42, 44, 46, and 48 Steuben street: and
Lots Nos. 45 and 47 on Morgan street.
Together with the buildings, factories, shops, and improvements thereon erected.
Dated Jersey City, November 6th, 1869.



THOMAS W. JAMES
ISAAC I. VANDERBEEK,
Executors.

N. B.—The executors will consider any offer to dispose of the above at private sale, made before the vendue.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

TAYLOR MFG. CO.,

Exclusive Manufacturers, 73 Beekman St., N. Y.

PACIFIC MAIL
Steamship Company's
THROUGH LINE TO
California and China.

FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$125 to $170.	**$60**

according to location of berth.

These rates include berths, board and all necessaries for the trip.

Steamers of the above line leave Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON 5TH AND 21ST OF EACH MONTH,

except when those days fall on Sunday, then the day previous.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Jan. 21, ALASKA, CAPT. GRAY, connecting with GOLDEN CITY, CAPT. LAPIDGE.

Steamer AMERICA, will leave San Francisco Feb. 1, 1870, for China and Japan.

NOTICE TO SHIPPERS.

For reduced rates of freight apply on wharf. Freight for steamer ALASKA, received until 4 P. M. on THURSDAY, Jan. 20. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

The Commerce of Cincinnati.

The report of the Cincinnati Chamber of Commerce and Merchants' Exchange, for the year ended August 31, 1869, just published, shows that although the trade of that city may not have been quite as profitable as it was in 1865 and 1866, a much larger business was done; and that, though the value of the leading articles imported and exported in those years was greater than during the past year, there was a large increase in the volume of trade flowing through that city—the increase in the value of those years being chiefly consequent upon the inflation in prices. It has been so often stated that the trade and commerce of Cincinnati had reached its culminating point and begun to retrograde, and unless something was done to arrest this its commercial importance would forever depart, that many have believed it. A comparison of the several departments of trade, item by item, extending back over the past fifteen years, proves that these fears are wholly unfounded, as the increase of the commerce of Cincinnati has been very large—in some respects, indeed, surprisingly so. Not only do statistics show the great progress made during the past decade, but the total value of all the principal imports indicates it in even a more decided manner. The total value of the imports in 1859-'60, was $103,347,216; whilst the currency value of the same articles for the past year, was $283,927,903; which, being reduced to the gold standard, is $213,045,927, showing an increase of over 100 per cent. in nine years.

It is not in the development of its trade, however, that the prosperity of Cincinnati is alone to be looked for, but in her great factories and the skill and enterprise of her artisans. In this department she occupies the foremost position among the cities of the West, and must always continue to occupy it. An examination of trustworthy statistics shows a wonderful progress in the manufacture of wood and iron within the past few years; and yet this progress has been made so silently and with so little ostentation that those who do not understand the power of silence imagine that all things in Cincinnati are at a stand still.

During the past year the trade of the city has been comparatively free from disturbing influences. All departments have been more settled and, with the exception of flour and wheat, the changes in prices have not been important. Compared with the previous year, there has been a marked increase in the receipt of apples, bagging, barley, bran and ship stuffs, cotton, corn, coffee, cooperage, cattle, eggs, flour, glassware, hides, hardware; in all kinds of iron; lard, leather, lemons; all kinds of merchandise, including dry goods, nails, oats, rye, foreign fruit, rope and twine, sugar, shot, starch, sheep, tallow, turpentine, wheat, wool, whiskey, coal and lumber. The general increase is shown in the river trade, the total number of arrivals of steamers being 3,026, against 2,694 the previous year. There was, however, a decrease in the tonnage and number of steamers and barges; the tonnage being 69,774, against 83,264 the previous year, and the number 294, against 366 in 1868. The war increased the number of steamers running to and from Cincinnati from 225 to 464, and the tonnage from 11,642 to 92,742. The number of steamers and amount of tonnage were then far beyond the legitimate wants of commerce, and the decline was therefore inevitable; but notwithstanding this decrease, the increase in the number of arrivals and departures shows an increase in the trade, though the business to steamboat owners has not been profitable, owing to the oversupply of boats. For these reasons, steamboat building has been neglected during the past year, but the steamboat interest has now settled down to its normal condition, and, owing to the abundant crops and the increased tendency of Western agricultural produce to seek the ocean *via* New Orleans, the prospects are more favorable.

There can be little doubt that Cincinnati is entering upon a new era in her progress as the great Western manufacturing centre. A movement has begun in good earnest to secure railway accommodations with the Southern section of the country. This is a movement in the right direction, for it is in those districts that the market for her manufactures must be sought. When the resources of the South are contemplated, and the rich mineral and agricultural treasures to be found in that region, only here and there developed, the value of such a road may be more fully appreciated. It has been demonstrated that no other country can compete successfully with the Southern States in raising cotton; and when it is remembered that there is cotton land enough in the Gulf States, if cultivated, to produce twenty million bales annually, the future wealth of the country cannot be justly computed. This is the trade now opening to Cincinnati.

During the past year there has been more activity in railway transportation, and an increase in the tonnage passed over some of the roads terminating in Cincinnati. The consolidation of the Atlantic and Great Western Railway with the Erie has placed the great broad gauge route from that city to New York under the control of one powerful corporation, which will ultimately largely increase the railway business, as there can be no doubt that the broad gauge route will eventually be extended to the cotton States, if not to the Gulf. A bill was passed last winter by the Ohio Legislature, authorizing the construction of the road before mentioned to connect Cincinnati with the railroad system of the Southern States, in case the citizens should vote in favor of it. The question was submitted to the vote of the electors of the city, and it was decided in the affirmative

by a large majority. Accordingly, measures have been taken in conformity with the law, and surveys are being made in order to ascertain the best route to Chattanooga, in Tennessee—the terminus decided upon by the City Council. Should this railway be built, a great need of Cincinnati will be supplied, and a highway opened to the district of country where she will extend her trade rapidly, and to an extent which cannot be well estimated.

The extension of the Baltimore and Ohio road, by the purchase and consolidation of the Marietta and Cincinnati road, has also been of great advantage to the city. The cars have been running into the city over the Cincinnati, Hamilton and Dayton Railway from Loveland, pending the completion of a few miles of railway into the city, which is now nearly done. This is the shortest railway route to the coast; and as the company has a line of steamers running between Baltimore and Liverpool, with arrangements for transferring freight from the cars to the steamers at the company's wharf, in Baltimore, without expense to the shipper, it is expected that shipments of flour and grain and other Western produce to England, and of foreign goods back to the West, which has already become extensive, will in a few years become a business of great magnitude, and that this railway will become the leading highway for the European trade with the West; and when Cincinnati becomes a port of entry, these foreign goods can be delivered without delay to the purchaser, all the vexatious delays of the coast custom houses being avoided. The Louisville and Covington Railway has been completed within the year, which gives Cincinnati a more direct route to Louisville, and, indeed, all Southern markets, and already a large business is being done upon it; so that the highways to the South are being increased from year to year.

Fitchburg Railroad.

The receipts from operations of this road for the years ending November 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$447,610 83	$485,246 70
" freight	693,592 54	736.796 24
" mails	10,000 00	10,000 00
" rents	8,134 70	14,188 59
" interest	32,130 44	21,394 08
" expresses	17,790 81	22,968 21
	$1,155,259 32	$1,290,593 82
Expenses, viz:		
Repairs of road	$181,666 62	$187,322 40
" locomotives.	63,153 31	95,233 38
" structures	68,680 92	68,916 29
" bridges	22,644 84	32,803 83
" cars	87,984 75	102,542 88
Fuel	90,221 03	96,731 26
Oil and waste	9,254 26	11,892 55
Freight expenses	105,447 42	129,484 93
Passenger "	57,264 45	80,961 71
Switchmen, etc.	19,457 83	22,272 42
Removing ice and snow	4,166 30	3,354 60
Taxes and insurance	72,520 25	82,876 88
Gratuities and damages	6,636 70	16,865 81
Salaries and office exp.	21,910 02	17,455 17
	$810,958 70	$948,714 06
Net earnings	$344,300 62	$341,879 76

Compared with the previous year the gross earnings show an increase of $135,334 50, with an increase in expenses of $137,755 36, making the decrease in net earnings, $2,420 86.

The following statement will show the number of passengers carried, tons transported and miles run in 1869, as compared with the year 1868:

	1868.	1869.
Number of passengers carried in the cars	1,622,156	1,767,249
Do. carried one mile	20,619,491	22,134,414
Number of tons of merchandize carried	559,368	670,439
Do. carried one mile	15,659,371	16,941,140
Number of miles run	556,594	614,525

The increase in number of passengers carried is 145,093; in passengers carried one mile, 1,514,923; and in receipts from passengers, $37,635 87. The increase in tons carried is 111,071; in tons carried one mile, 1,281,269; and in receipts from freight, $97,203 70. Increase in miles run, 57,931.

The company have 32 locomotives, 40 passenger cars, 11 baggage cars, 355 eight-wheel and 331 four-wheel merchandise cars, and 36 gravel cars.

The assets of the corporation on the 30th of November last were as follows:

Notes receivable		$184,825 54
Cash and cash funds		153,407 45
United States for mail service		1,188 45
		$339,421 44
And the liabilities were:		
Balances due connecting railroads	$82,700 16	
Unclaimed dividends	3,612 00	
Unclaimed State tax	2 81	
		86,314 97
Excess of assets Nov. 30, 1869		$253,106 47

This sum less $149,052 65, the amount of the present January dividend and the United States tax thereon, will leave $104,053 82 in cash or funds equivalent thereto. The company has also real estate purchased during the past year at a cost of $190,219 09, and other real estate valued at $10,344; likewise fuel, iron, lumber and other materials necessary for renewals and repairs which are worth $109,130 88.

The road and its equipment have been maintained in excellent condition; many additions and improvements have been made during the year; and, taking, the whole property together, it was never in better order than at the present time.

The trunk road was but little effected by the freshet of last fall; but the repairs to the Peterboro' and Shirley Railroad made necessary from this cause, have cost several thousand dollars. The principal loss of the company, however, was from the interruption of business from some of the upper connecting roads, which business for nearly a month was almost entirely lost.

A considerable portion of the extensive freight yard wharves in Charlestown have been rebuilt. A section of the railroad bridge over Charles river, including the draw, has been renewed. The improvements in the locomotive and car shops, and in the engine house at Charlestown, have been completed. A new passenger depot has been erected at Cambridge station; and wide and convenient passenger platforms have also been built. A connecting track has been built between the trunk road and the Watertown Branch in Waltham. Over 2½ miles of new side tracks have been laid down, requiring 217 tons of iron rails in their construction. Large expenditures have been made for renewals and additional facilities for passenger and freight business, and, a portion of such expenses as were not applicable to the past year have been taken from the renewal and reserved fund. The property in Charlestown, known as Caswell's Wharves, containing about 140,000 square feet has been bought for $120,000. Other parcels of land have also been purchased in Boston, Charlestown, Belmont, Watertown, Waltham, Mason and Fitchburg, which have unitedly cost $65,219 09.

Trial Balance, Nov. 30, 1869.

Construction		$3,540,000 00
Cash and cash funds		153,407 45

Treasurer.—M. D. Benson.

Superintendent.—C. L. Heywood.

Mexican Railway.

The half-yearly meeting of this company was held in London on the 30th of December. From the report which was presented we learn that the line to Puebla was formally opened for traffic on the 16th of September last. The gross receipts on the upper line from Mexico to Apixaco, 86 miles, from 1st January to May, its further extension of 10 miles to Santa Ana from June, and to Puebla, 19 miles more, in September, making together 115 miles from Mexico to Puebla open from 12th September last, amounted in the aggregate for the ten months ending on 31st October to 81,497*l*. On the lower line, from Vera Cruz to Paso del Macho, 47 miles, the receipts for the nine months ending 30th September amounted to 19,772*l*. The receipts on this portion of the line had not recovered the great falling off, as compared with former years, caused by the defective condition of the line, and the stagnation in the general trade of the country. In the meantime the line had been repaired and was again in fair working order. It was therefore hoped that a considerable improvement would be effected in the traffic receipts. But it was to the further extension of this part of the line through the difficult and often impassable country between Paso del Macho and Orizava, a distance of about 32 miles, that the company must look as a means of securing the traffic between the capital and the coast at Vera Cruz. Already a considerable portion of the earthworks on the line and some part of the masonry had been completed, and provision made in the form of iron-bridge work for passing the largest of the watercourses. Mr. Samuel, the company's consulting engineer, was of opinion that the lower line could be opened to Fortin by the end of the year 1870. The collection of the sums due to the company under the assignment upon the Customs duties, and the Mejoras Materiales subvention, proceeded with re-

gularity, having produced under the two heads, since the resumption of payments on 1st January last, the gross sums of 90,577*l.* and 46,390*l.* respectively to the end of September. The line to Puebla having been opened, the company was now at liberty to concentrate its available resources on the important work of carrying on the lower line to Fortin. The directors had entered upon preliminary arrangements for issuing class B mortgage bonds to be charged upon the profits of the lower line from Vera Cruz to Fortin, which they trusted would enable them to proceed with the works on the line in accordance with the contract. The Government of Mexico had the right to nominate four directors, two of whom would act in London, and two in Mexico. The report of Mr. Samuel, the consulting engineer, after describing various details respecting the works and shipment of materials for the bridge and permanent way, states that the total length of the line from Vera Cruz to Mexico, with branch to Puebla, was 290 miles. Of this, 47 of the lower section and 115 of the upper section were open for traffic and in working order, making together 162 miles, leaving 128 miles to be completed, in three sections. The first of those sections, from Paso del Macho to Orizava, 32 miles, included the 24 miles to Fortin, the works on which had been recommended, and he believed, if ample funds were provided, it might be opened for traffic in 12 months from this time. 30 per cent. of the earthworks and 17 per cent. of the masonry had been completed previous to the suspension of the works. A ravine beyond Fortin would have to be crossed by an iron viaduct more than 900 ft. in length, the *maximum* height of which from the bottom of the ravine to the level of the rails would be about 375 ft. This work would occupy two years in its execution, and be the key to the completion of the entire line. On the second section, from Orizava to Boca del Monte, 26 miles in length, 54 per cent. of the earthworks and 15 per cent. of the masonry were executed. On the third section, from the latter place to Apixaco, 70 miles in length, 90 per cent. of the earthworks and 15 per cent. of the masonry were executed. No ballasting had been laid or any work of importance executed on those sections.

From a San Francisco paper.

Chinese Labor on the Texas Railroad.

We have great pleasure in noticing the fact that Mr. B. JOHNSON DORSEY, Consul for the Republic of Salvador, and a well-known commission merchant of this city, succeeded last Saturday in dispatching some three hundred Chinaman by the Union Pacific Railroad. This pioneer gang of laborers is destined to work on a section of the Great Southern line in Texas, and a contract was made with them for a term of years, which was read over and fully explained to them by an interpreter chosen out of their body. Every precaution for their comfort *in transitu* was secured, a car being especially fitted up for their cooking and other conveniences. This is a move in the right direction, and Mr. Dorsey is just the man for the occasion, and enjoys peculiar facilities for carrying out such an undertaking, as he is extensively known both in San Francisco and China, as well as possessing the entire confidence of the Chinese in our midst by reason of extensive dealings with them for many years past.

We like this quiet, prompt way of doing business, and cannot but contrast it with the manner in which the same matter has been approached by another party. Mr. Koopmanschap may have a thorough knowledge of China and the Chinese, but after all his talk and contracts he has done absolutely nothing. Spite of Memphis demonstrations, and much going to and fro, and telegraphing north, east, south and west, with newspaper paragraphs detailing the movements of the man who was to bring a small army of workmen to the fields where they were so much needed, not a single pigtail has been forwarded as promised, whilst Mr. Dorsey has stolen a march on Koopmanschap, who rubs his eyes, and before he is quite awake three hundred Chinaman are being whirled over the Sierra Nevadas, supplying that which was so imperatively called for, and with a promptness that is most valuable. Our only regret is that the terms of the negotiation prevented Mr. Dorsey from forwarding the Chinese laborers by the steamers of the Pacific Mail Steamship Company, but that is of small importance to the fact of their departure by means of the energy and business-like character of the gentleman who undertook the expedition. Mr. Dorsey is, we are glad to state, now fully prepared to enter into contract for an unlimited supply of Celestials, either from the East or from China.

St. Louis—Its Commerce and Railroads.

The annual review of the commerce of St. Louis, published at great length in the columns of the *Missouri Republican*, shows that the trade of that city has nearly doubled during the year 1869; and, if figures and statistics are trustworthy, St. Louis may now claim to be the most prosperous city, relatively speaking, in the United States. Ordinarily, seasons characterized by a shrinkage of values show marks of retrogression, rather than of advancement. There are many reasons assigned, however, for the large increase in the commerce of St. Louis. During the year its railroad connections have opened up in the West and South new consuming and producing regions tributary in either capacity to its markets. As a consequence of this opening of new fields of enterprise, of produce and of consumption, the city has increased in population, in resources and in wealth, and its merchants now supply regions widely separated, embracing a sweep of country from Minnesota to Georgia, and including Utah, Colorado and Wyoming.

In attempting a summary of this vast trade which has grown up within the memory of the present generation of business men, it is impossible to do more than glance at a few of the principal items. From the statistics before us we learn that the direct imports of foreign goods at St. Louis during the year, were valued at $3,463,920 82, on which duties were collected to the amount of $1,822,894 21. The value of foreign goods withdrawn from bond during the year, was $3,268,348 63, on which $1,711,256 61 was paid in duties. Of the total imports, the most important items ran as follows: Sugars, $780,229; coffees, $307,168; earthenware, $45,429; tin, $62,775; railroad iron, $215,964; pig iron, $50,637; manufactured iron, $25,148; liquors, $46,411.

The most important feature of the trade of St. Louis, and certainly that possessing most interest for the general reader, is the grain trade of that city. The receipts of grain and flour at that point have largely increased during the past year, a large proportion of which increase may be attributed to the attention called to St. Louis as a grain market by the discussions preceding and accompanying the formation of the grain dealers' association; and it is creditable to its managers that, with a limited capital, their purchases have exceeded 500,000 bushels of wheat during the season. By sending an agent to Europe they have attracted attention to St. Louis and the Mississippi Valley as a source of supply, and have prepared the way for such a reduction of freights from the mouth of the river as will eventually turn a large portion of the exporting and importing trade of the West into the Mississippi Valley. The increase in the receipts of wheat alone during the year exceeded two and one quarter millions of bushels, on which the dealers and exporters have gained a profit of not far from a quarter of a million dollars. Many valuable public and private improvements have been made to facilitate the handling and movement of breadstuffs at this point, but much yet remains to be accomplished in this direction, especially in providing improved facilities of water transportation and inducing a closer identification of the interests of the shippers and consumers of the States bordering on the Upper Mississippi.

Of the general trade of the city, both local and with the sections of country which draw their supplies mainly, if not wholly, from St. Louis, it is impossible to give even a summary, so many and widely various are the items to be included. Some idea of its extent, however, may be gained from the total receipts of leading articles of commerce, exclusive of textile fabrics, of which no statistics are at hand. From a table of articles not already mentioned, we learn that the total receipts at St. Louis during 1869, were as follows: Flour, 1,119,044 bbls.; wheat, 6,298,717 bushels; corn, 2,320,711 bushels; oats, 3,109,702 bushels; rye, 257,056 bushels; barley, 748,847 bushels; hemp, 24,468 bales; cotton, 18,978 bales; tobacco, 10,128 hhds.; hay, 181,149 bales; whiskey, 48,603 bbls.; lard, 23,535 tcs. and bbls., and 6,327 kgs.; bacon, 5,929 casks; lead, 221,817 pigs; pork, 78,236 bbls.; cattle, 124,565 head; sheep, 96,626 head; hogs, 344,848 head. These figures show a large increase over those of 1868, and indicate that the trade of the city will expand from year to year in a ratio proportionate to the growth of the Northwest in population and material wealth. In reference to the Railroads centreing at St. Louis, the *Republican* says:

Not the least important advancement made during the past year has been in added length of the railroads centering at St. Louis, by the extension of main lines, the construction of branch feeders and forming of connections with lines traversing other States. The year, characterized by the completion of the Union Pacific road, and the connection of the Atlantic and Pacific coasts by iron bands of intercommunication, has also been noted by the practical connection of the Southeastern Atlantic cotton growing States with the food producing regions of the Southwest and practically by the construction of unbroken rail communication between the Gulf of Mexico and the headwaters of the Missouri; and it is no insignificant indication of the future prosperity of St. Louis, that occupying a midway position on these great lines extending from the extreme east to the extreme west, and from the farther north to the farther south, our merchants and our citizens will share alike in the prosperity of every section of the Union. Appropriate, therefore, to a review of the commerce of our city, we give place to the following resume of the business and extent of our railroads:

THE NORTH MISSOURI.

This road, which in the future will form the most important northern feeder of St. Louis trade, has an entire length, including branches, of, in

round numbers, 405 miles; 383 miles in this State, and 22 miles in Iowa. There have been 113 miles of new line of communication opened in the past year by connection with the Missouri Valley road from Harlem, opposite Kansas City, to Marysville, but the North Missouri Railroad Company has built only one mile of new track during the year, viz: from North Market street to the elevator in St. Louis. The track of the West Branch of the road was completed to Kansas City at the close of the year 1868, but not operated its whole length, 126 miles, until the present year.

Nothing remains of the North Missouri Railroad to be completed. In Iowa 20 miles remain to complete the Cedar Rapids road to Ottumwa, effecting connection there with the Des Moines Valley Railroad, the Burlington and Missouri River Railroad and other projected lines. Also (in Missouri and Iowa) the St. Louis, Chillicothe and Omaha Railroad about 209 miles, forming a direct route from St. Louis to Omaha. The Chillicothe and Des Moines road is being graded, and at Chillicothe will connect with the St. Louis, Chillicothe and Omaha road, and also with the Hannibal and St. Joseph Railroad. The Louisiana and Missouri River road is being graded, and will strike the North Missouri road at Mexico. Some work is being done between Salisbury (a station on the West Branch) and Glasgow, and this road when completed to Glasgow will be a feeder to the North Missouri road. The St. Louis and St. Joseph Railroad, which crosses the North Missouri Railroad near Lexington, on the north side of the river, is fast being constructed, and will soon be completed. The Hannibal and Moberly road is also being graded, and assurances are given that it will be completed within a year.

The relation of this road to the grain interests of St. Louis is shown by the fact that there have been built during the year, on the line of the railroad, twelve warehouses and elevators, and there will doubtless be many more erected during the coming year. The amount of grain transported over the North Missouri Railroad to St. Louis during the year, was 829,245 bushels in sacks, and 296,200 bushels in bulk.

There were transported, during the year, over the road to St. Louis, 38,574 head of cattle, 4,842 of which were Texas cattle; 42,988 sheep, and 3,130 horses and mules.

The total freight carried over the road during the year 1869, inclusive of the foregoing, amounts to 132,298,144 pounds, against 69,503,275 pounds during 1868. The total number of passengers carried during the year, was 403,608, against 252,008 in 1868. The estimated receipts of the company for freight and passenger traffic for the year 1869 show an increase of about 60 per cent. over 1868.

ST. LOUIS AND IRON MOUNTAIN RAILROAD.

Under the excellent management of Thos. Allen, Esq., of this city, who became the purchaser of the old road between St. Louis and Pilot Knob, a distance of 86½ miles from the city, this important road has been pushed to a successful completion at Belmont, Missouri, opposite Columbus, Kentucky. Mr. Allen became the purchaser of the road in January, 1867, and completed its extension of 120 miles to Belmont so as to open it for business throughout its entire length on the 19th of August last, at a cost of about five millions of dollars. But for the interference of the State Executive in January, 1868, the road would have been opened for business some six months sooner. As it is, however, we have the road in time for the winter business of our shippers. The total length of the main line from St. Louis is:

	Miles.
Belmont	196
Potosi Branch	4
Pilot Knob Branch	11
Total length main line and branch	210

The road has earned during the year 1869 about $900,000, a very flattering exhibit, considering that it has been opened through its entire length but little over four months.

The quantity of iron ore transported over this road from Pilot Knob and Iron Mountain is steadily increasing. During 1869 there was transported over the road from these vast deposits of iron ore the following amounts: Iron ore, 155,000 tons; pig iron, 32,000 tons. The extension of the road is opening up some fine beds of hematite ore, and developing new lead diggings, running, as it does, through some six miles of the famous lead tract known as Mine La Motte, and its opening has infused new life into these mines, as well as into the whole country traversed. About fifteen new saw mills have been erected on and near the line of the road, which will afford to our cabinet manufacturers and others large quantities of oak, poplar, walnut and cypress from the almost inexhaustible forests in the flats of Southeast Minnesota.

The entire road is laid with the five feet, or Southern gauge, to facilitate transportation over connecting roads. These connections at present are made through the Mobile and Ohio Railroad, that terminates at Columbus, Ky., the cars being ferried over the river between Belmont and Columbus on a boat built for that purpose, and without breaking bulk. The distances from St. Louis by the Iron Mountain road, by rail, over roads now in operation, are as follows:

	Miles.
To New Orleans	723
To Mobile	667
To Savannah	960
To Charleston	970
To Richmond	1,095
To Norfolk	1,175
To Washington City	1,150
To Nashville	376
To Memphis	345
To Atlanta, Ga	663

These distances to the seaboard cities of the South compare favorably with distances to more northern ports by the older traveled rail routes, as will be seen by the following rail distances from St. Louis to—

	Miles.
Baltimore	929
Philadelphia	1,007
New York	1,074
Boston	1,225
Washington City	969

It should be added in this connection that lines now being constructed in the Southern States will reduce the distance by the Iron Mountain Railroad from St. Louis to Southern ports over 100 miles, and that the whole route is exempt from dangers of frost and blockades from snow.

Thus far we have only considered the connections of this important road with the lower river and the railroads east of the Mississippi River. But there are connections west of the Mississippi and new lines yet to be built, projected, and of no less importance to St. Louis. The lines projected are the following: Cape Girardeau Branch 16 miles long, now under contract for construction, intersecting the Iron Mountain road about 148 miles from St. Louis. By this branch the ore of the Iron Mountain will be carried to Cape Girardeau on a rail distance of 92 miles. Second: A road down the west bank of the Mississippi River to Memphis. This line will leave the constructed road at the town of Morley, about 160 miles from St. Louis, and will be 140 miles in length, making the distance from St. Louis to Hopefield, on the west bank of the river, opposite Memphis, 300 miles, or 45 miles shorter than the present line, *via* Columbus and Humboldt. This line will be easy to construct, and cheap to operate, being practically straight line and level grades the whole distance. In fact it can be made in connection with the Iron Mountain road, to carry freights between St. Louis and Memphis at average river rates, and pay a fine dividend on its cost of construction and equipment. Mr. Allen had nearly perfected a plan for building this line when the late gold bubble burst in New York. It is the intention to so construct this line to Memphis as to make the road useful as a levee, and thus reclaim over a million of acres of land subject to overflow of the Mississippi in the high floods. A large portion of this land will be subscribed to the road, and, as the building of the road will reclaim it, the road will in a short time develop a large local business, proving not only a useful line to the commercial interests of St. Louis with the South, but a great gain to Arkansas, by reclaiming over a million of acres of fertile land now a waste.

Looking a few years to the future there is another projected line more desirable to be controlled in the interests of St. Louis than any other connection of the St. Louis and Iron Mountain Railroad—the Cairo and Fulton Railroad, of Arkansas. This line starts from the boundary line between the States of Missouri and Arkansas, about seven miles west of Chalk Bluffs, and pursues a very generally direct course to Fulton, on Red River, and thence to the boundary line between Arkansas and Texas, where it will connect with the railroads of the latter State. The distance on the line through Arkansas is 301 miles. The connection with this line would be best made by building a line from the town of Marquand to the State line, a distance of 74 miles. The route would pass by the old Indian ford, thence through Butler County.

Distances on this line are as follows:

	Miles.
St. Louis to Marquand	118
Marquand to State line	74
State line to Texas boundary	301
St. Louis to Texas boundary	493

The construction of this line in the interests of St. Louis would give our city a controlling influence in the railroads of Arkansas. It should be added that this line has a munificent donation of lands from the general Government which, with proper management, would nearly if not quite build the entire line. Let St. Louis grasp this trunk line of Arkansas through the Iron Mountain road before it is too late.

Through the old Cairo and Fulton Railroad of Missouri connection is given with Cairo. The Iron Mountain road crosses this old line in the town of Charleston, one hundred and seventy-eight miles from St. Louis; thence to Cairo is about ten miles. The old Cairo and Fulton road was abandoned during the war, and has not yet been repaired, but it is the intention of the Iron Mountain Railroad Company to place this ten miles in running order to give St. Louis a direct connection with Cairo.

MISSOURI PACIFIC.

This road, of great importance to St. Louis, has been so long in operation throughout its entire length, that it would be mere repetition to give extended notice of its connections beyond the State, destined ultimately to give St. Louis direct communication with Colorado on the west, and Indian Territory and Texas on the south; yet though less spoken of than others, this road has developed new interests in Missouri by the construction of branch feeders during the year. The most important of these is the Osage Valley and Southern Kansas road, running from Tipton to Boonville, a distance of twenty-five miles, which was finished in November, 1868, but virtually placed in active operation about the commencement of 1869, and which is leased to the Pacific Company for thirty years. The company is also constructing and has thirty years lease of the Lexington and St. Louis Railroad, from Sedalia to Lexington—a distance of 55 miles. This road will be completed and placed in active operation in August next, and, in connection with the St. Joseph and St. Louis Railroad also in course of construction on the north side of the Missouri river, will give a new and direct line of communication with St. Joseph and points beyond. There is also in course of construction, a road from Lawrence to Bergen Hill (the L. and P. H. R. R.), a distance of 58 miles, which will probably be completed before the 1st of January next. The Tebo and Neosho Railroad, to run southwest from Sedalia to Fort Scott, a

distance of 103 miles, will probably be commenced during the present year.

We are without full statistics of the freight and passenger business of the Pacific road; but owing to the change of gauge during the year, and consequent difficulty in obtaining cars, it is estimated there has been no material increase. In common, however, with the North Missouri Railroad, the Pacific has accommodated itself to the changed methods of handling grain, and has induced the erection of elevators at one or more points on its line, and has projected others to be constructed during the coming year. The amount of bulk grain transported last year over this line from points west of St. Louis was 843 cars or in round figures 280,000 bushels. During the year there was also brought to the city 4,800 cars of cattle of which 675 were Texan.

SOUTHWEST PACIFIC.

This road which is destined within the near future to become a most important feeder to St. Louis commerce, has been pushed vigorously forward during the past year. Within that time the road has been extended, and placed in active operation from "Little Piney," twelve miles beyond Rolla, Phelps county, to Lebanon, a distance of fifty-eight and a half miles, and there has been graded a further distance of 59 miles from Lebanon to Springfield, which will be ironed and in running order by the 1st of April. The road is also being rapidly graded beyond Springfield, and will be opened to a point within 41 miles of the State line, before the 1st of July. This latter extension will bring the vast lead deposits of "Granby" within ready communication of St. Louis. We have no statistics of the passenger or freight business of the road for the past year; but are informed by its officers that the former has doubled and the latter has been increased fully 50 per cent.

THE RAILROADS EAST OF THE MISSISSIPPI.

Turning to the eastern side of the Mississippi river we find similar proof of progress in the desire for connection with and a share in the commerce of St. Louis. But a few years since there was only one railroad terminating opposite our city, and communication in other directions inland from the Mississippi were made by stage, and produce grown one hundred miles eastward of St. Louis either sought other markets or was brought here at great expense of time and labor. Now there are five distinct roads centering there, to which have been added by leases new connections, etc. In order to give a correct idea of the magnitude of these connections and those contemplated we give the following resume of the roads now completed, and those projected as Eastern connections, and which within two years—when the bridge is completed—will run trains directly into this city.

Chicago and Alton Railroad, 281 miles of main line, with the Jacksonville division of 150 miles additional, from Bloomington to Monticello Junction, operated under a perpetual lease; also an extension of the Jacksonville division, from Hopedale to Dwight, by way of Lacon, a distance of 112 miles, in course of construction, thus giving the Chicago and Alton Railroad, a total length of about 550 miles. This road, as mentioned elsewhere, has not only lengthened its line and projected still further extensions to be completed during the present year, but has within the same period constructed approaches to the river on either side, and now crosses its cars with freight in bulk, delivering grain at the elevator, merchandise in the package warehouse, and forwarding cattle without transhipment.

The Illinois Central Railroad may now be considered a St. Louis Railroad, having effected direct connections with the city during the past year by means of the St. Louis, Terre Haute and Vandalia Railroad, over which it runs freight direct from St. Louis to Chicago, Cairo and Dubuque, without breaking bulk or changing cars. This road has a length of seven hundred and eight miles in Illinois, and in Iowa has leased in perpetuity the Dubuque and Sioux City Railroad to Waterloo, one hundred miles; the Iowa Falls and Sioux City Railroad, 191 miles; the Iowa Falls and Minnesota Valley Railroad to Austin, Minnesota, about 70 miles, and has placed in operation the past year from Dubuque to Fort Dodge, 193 miles, and from Waterloo to St. Augurs, on the Minnesota State line, 66 miles, thus opening to our commerce the rich and fertile country of upper Iowa and lower Minnesota.

The St. Louis, Vandalia and Terre Haute road is an entirely new line, of 163 miles in length, which will eventually form an important link in our Eastern connections. It has been completed within the past year to Effingham, the county-site of Effingham county, Illinois, 90 miles from St. Louis, forming at that point a junction with the Illinois Central Railroad. From Effingham eastward the grading is being pushed forward with considerable rapidity, and it is expected that the entire line will be completed to Terre Haute and in running order by July 1st of the present year. Ohio and Mississippi Railroad to Cincinnati, 340 miles. During the past year the Louisville division from North Vernon to Louisville, 40 miles, has been completed and trains are now run direct from St. Louis to Louisville without change of cars, thus giving a new and important through Southern connection.

Belleville and Illinoistown Railroad, 14 miles, with a projected extension southward and southeastward of over one hundred miles, called the Belleville and Southern Illinois Railroad, now finished to Athens, 16 miles from Belleville, and rapidly completed toward Du Quoin, Ill., which point it is expected to reach by June next, thus giving a new connection to Cairo, Columbus, Ky., and the South generally. This line will be 35 miles shorter than the Iron Mountain Railroad, but will lack the facility of unbroken gauge with roads south of the Ohio river, and consequent direct transfer of cars.

Cairo and East St. Louis Railroad organized and construction expected to be commenced in the interests of the Chicago and Alton Railroad early in 1870, and pushed to completion, about 145 miles. This road will pass through a country rich in farming and mining products, and beside, as forming a short and direct connection with Cairo, will be of great importance to St. Louis.

Indianapolis and St. Louis Railroad: From St. Louis to Terre Haute, 186 miles. This is the old Terre Haute and Alton road under its new name as leased to a company with above title. This company is now engaged in building a road from Terre Haute to Indianapolis (75 miles), hence its name. It is expected that this new line will be completed by July next.

Decatur and East St. Louis Railroad: In course of construction from Decatur southward, connecting at the last named city with the Toledo, Wabash and Western Railroad.

Depot grounds have been purchased at East St. Louis, and the road is being pushed rapidly toward completion. Distance from Decatur to St. Louis, about one hundred and thirty miles. Some twenty miles of the iron is already laid, and judging from the energy with which the work has been pushed hitherto, but few months will elapse before the line is ready for business.

Peoria, Pekin and Jacksonville Railroad: This road intersects St. Louis in the fact that it opens up Pekin, Peoria and the Illinois river towns to St. Louis by the way of the Jacksonville division of the Chicago and Alton Railroad. Length of line from Peoria to Jacksonville, 83 miles.

Rockford, Rock Island and St. Louis Railroad: This road is finished and cars running over the line from Rockford to Rock Island. From Rock Island towards St. Louis, several sections of several miles each are completed, and in one or two instances, cars are running over these isolated sections. It is now expected that this line will be through to St. Louis by January 1871, and will be of vast importance to St. Louis, as it will then open up a new route to the upper Mississippi river country, as well as to the Lake at Racine, Wis.

Taxes on Interest and Dividends.

Commissioner Delano decides that the tax imposed upon dividends, undistributed sums, &c., by section 120 of the Internal Revenue law, upon dividends, interest, coupons, amounts used for construction, &c., by section 122, and upon salaries by section 123, did not expire on the 31st ult., but should hereafter be withheld and paid as heretofore.

☞ The Pittsburgh Cast Steel Spring Company, on the first of January changed their firm name to A. FRENCH & Co. Mr. French, the senior pastner, has for some time been the superintendent of their works at Pittsburgh, and has built up an enviable reputation among railroad managers for their Elliptic Steel Springs for cars and locomotives.

☞ The Railway Commissioners have resolved shortly to call for tenders for four additional sections of the Intercolonial Railway, and for rolling stock. The present tenders have to be completed by July, 1871; the next ones a year later.

☞ The Superintendent of a wooden railway in operation in Clinton, N. Y., reports that a new style of wooden road can be constructed complete, ready for twenty ton engines, to run at the rate of eighteen miles per hour, at a cost of seventeen hundred and sixty dollars per mile. This is exclusive of grading. On these wooden railways but little grading is done. The roads do not need to be much more level than ordinary highways, especially in a country where the hills are only moderate.

☞ Trains on the Boston, Concord and Montreal Railroad are now running regularly to the Wing road, six miles north of Littleton, and iron is laid as far as the south line of Whitefield, one mile further on. The grading to Burns's Mill, nine and a half miles from Lancaster, is nearly completed, and the iron will be laid the present month to that point. The Directors have determined to push the road on to Lancaster, *via* Dalton, as fast as practicable, and grading to the Dalton line has been contracted for.

☞ The following gentlemen have been elected directors of the Sharpsburg, Butler and New Castle Railroad: S. M. Hartman, William Smith, Samuel Riddle, John Brown, Jr., William Tomlinson, B. W. Morgan, John Scott, Jr., George C. Reese, Andrew Lyons, H. L. Bollman, N. P. Sawyer, D. O'Niel, Jared M. Brush. President, Jared M. Brush; Secretary, Wm. Tomlinson, Treasurer, Samuel Riddle.

☞ The Wilmington and Manchester Railroad has been sold under foreclosure of mortgage, and purchased by W. T. Walters, of Baltimore, for $525,000—the sum of $250,000 being paid for the South Carolina end, and $265,000 for the North Carolina end. The sale was for cash, but certain preferred bonds will be received in payment. Of these preferred securities the purchaser holds $1,975,828 06.

☞ Ground was broken on the Frederick and Pennsylvania Line Railroad on the 12th inst., about midway between Littlestown, Pa., and Taneytown, Md. The contractors are pushing on their work with an energy that betokens an early completion of the road.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 22, 1870.

Stock Exchange and Money Market.

Money has been in much better supply, since our last. National bank currency has been particularly abundant, and complaint has been made in banking circles of the heavy recumulation in this line, for which it has been difficult to find employment, even at exceptionally low rates. Call loans have been quoted at 5@6 per cent. to the Government houses, and 6@7 per cent. to the Stock Exchange firms. At these rates the offerings to prominent street borrowers have been unusually liberal. There has been more inquiry for prime grades of business paper, and the prevailing rates have been from 8@10 per cent. per annum. Some further mercantile failures have been reported, but they have been of little importance. The city banks, in their last week's report, show a further addition of about 12¼ millions to their deposit item, 3¾ millions to their legal tender reserve, and 1⅞ millions to their specie average. They added about 5⅝ millions to their loan and discount item. The specie and legal tender reserves now exceed, by over 30½ millions, the 25 per cent. of the liabilities of the banks, on account of circulation and deposits, required by the national banking act. On the preceding weekly statement, the excess was about 28½ millions. The U. S. Sub Treasury, last week, reduced its coin balance about a quarter of a million, while it increased its currency balance, nearly ⅞ths of a million. Its currency balance on Wednesday morning was nearly 4⅜ millions, and its coin balance, nearly 75 millions. Washington advices made the currency balance of the Treasury, on that day, about seven millions; and the aggregate coin reserve, about 105 millions. At the close of business Wednesday, Money was reported unusually plenty at 5@6 per cent. on call, with a very moderate inquiry for accommodation.

The specie reserve of the city banks according to the latest return is $37,510,467, against $29,258,536 same time last year. The city bank deposits are now $202,396,331, against $195,484,843 week ending Jan. 16, 1869. The legal tender reserve amounts to $52,248,475, against $52,927,083 same time last year. The circulation now stands at $33,966,823, against $34,279,153 same time last year. The loans are now $259,101,106, against $262,238,831 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $99,455,614 a day, against a daily average of $98,861,686 the preceding week, and $79,871,075 the week ending with Jan. 2, 1870. The current week's exchanges average about $95,643,244 a day. The city banks, last week, reported a gain of $1,845,687 of specie, $12,227,069 of deposits, and $3,710,741 of legal tender notes. They increased their loans, $5,625,653; and reduced their circulation, $165,457.

The city bank exchanges on Wednesday were $86,548,821.

National Bank notes to the amount of $216,110 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,918,781 against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $20,167,944, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,750,837. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,425,050; and for the public deposits, $18,991,000—making a total of $361,416,050. The Treasury Department last week redeemed and destroyed $631,000 of worn and mutilated fractional currency, and issued $588,435 of new. The outstanding amount of fractional currency on the 1st of Jan., 1870, was $39,762,665, against $38,885,565 on the 1st of December, 1869.

The U. S. Sub-Treasury receipts, week ending with Jan. 16, were $7,454,862 in coin, (including $2,003,000 from customs duties,) and $4,366,541 in currency; payments, $7,697,744 in coin, (including $3,533,831 of coin interest,) and $3,515,298 in currency; balance at the close of the week, $83,893,435 (including $74,822,846, of coin, and $4,727,267 of currency,) against $93,703,872 at the close of the preceding week, showing a decrease of $9,810,437. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $748,245 in coin, (including $517,155 from customs,) and $1,275,745 in cur-

rency; payments, $428,894 in coin, (including $410,269 of coin interest,) and $669,958 in currency. On Tuesday, receipts, $1,275,745 in coin, (including $546,742 from customs,) and $151,778 in currency; and payments $1,420,730 in coin, (including $406,231 of coin interest,) and $330,839 in currency. The balance at the close of business on Tuesday stood at $80,547,078, (including $4 317,156 of currency, and $74,997,213 of coin,) against $83,820,053 a week previous; and $92,206,272 on Jan. 4, 1870. The aggregate receipts of the office in Dec. were $51,554,741, including $6,969,667 from customs; aggregate payments, $48.729,064, including $2,430,597 of coin interest.

The outstanding amount of coin certificates on the 1st of Jan. 1870 was $40,170,380, against $36,862,940 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,819,249 of coin certificates through the receipts for customs.

Government revenues have been more liberal in the customs line, but quite moderate in the excise form, since our last. The customs are yielding very satisfactorily at this port, the current week, the daily average being over half a million. The excises yielded about three millions; customs at the port of New York, $1,917,250, and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to about $6,080,700 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 92½ millions.

Gold has been moving more steadily as to price, since our last, on a lighter business, especially on speculative account. The range has been from 121⅛@121⅞ and the closing quotation on Wednesday was 121½. The customs drain is increasing, and is now in excess of half a million a day. The export call is on a limited scale, notwithstanding the increasing firmness in foreign exchange. The latest dealings on Wednesday indicated a steady, but quiet market.

The aggregate export of silver from Southampton, to India, China, and the Straits, last year, was £2,362,943, against £1,635,642 in 1868.

The customs revenue of the port on Wednesday was $304,129.

The coin balances of the Government at this port on Wednesday morning, amounted to about 75 millions.

The coin interest disbursements on Wednesday were $419,354.

The customs demand for Gold last week, averaged $333,833 a day; thus far, this week, it has averaged $540,734 a day, or equal to a weekly aggregate of $3,244,404. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $200,286; and since Jan. 1 1870, $263,782, against $58,972 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $68,925,986, against $64,541,040 in 1868–'69. At San Francisco, from Jan. 1, to Dec. 31, 1869, $8,832,806, against $8,546,543 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Jan. were about 91 millions.

The exports of specie, from this port, last week, were $282,923, against $405,700 same week last year; total, since July 1, 1869, $17,401,058, against $22,741,124 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $3,533,831, and since July 1, 1869, $57,477,806, against $57,130,477 in 1868–'69. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1869, were $37,285,118, against $35,444,395 same time in 1868.

Foreign Exchange has been in reduced supply and fair request at advanced and buoyant prices, especially for sterling bills. Bankers' prime sixty day bills on London closed firmly on Wednesday at 108⅞@109, and on Paris to 5.22½@5.17½; sight bills on London to 109½@109⅝, and on Paris to 5.16¾c.@5.15. The offering of produce bills has been on a restricted scale this week. The week's exports of domestic produce have been to the currency value of $2,462,778, making the total since July 1, 1869, $114,401,875, against $86,918,020 same time preceding fiscal year.

Government securities have been more freely sought after, since our last, particularly by home buyers for investment purposes, and, though there has been considerable irregularity in prices, the market has been, in the main, strong and buoyant. The offerings of all issues of the funded obligations have been on a reduced scale, and the leading local holders have not been eager to realize at the going rate, as an early and notable rise has been quite confidently looked for. The business in the 1867 Five Twenties has been unusually extensive, the issue having become the prominent feature and the governing loan of the market. On Wednesday, Government bought in two millions of Five Twenties at from 113.97@114.12, out of an aggregate offering of $6,710,000.

U. S. sixes of 1881 closed here firmly at 117¾@117⅞; U. S. Five-twenties of 1862, 115⅛@115¾; U. S. Five twenties of 1864 at 115¼@115½; U.S. Five-twenties of 1865 at 115¼@115½; U. S. Five-twenties of 1865, consolidated, 114¼@114½; U. S. Five-twenties of 1867, 114⅜@114½; U. S. Five-twenties of 1868, 114¼@114½; U. S. Ten-forties at 112⅜@112⅝; U. S. Six per cent. currency bonds, 109⅞@110.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 5.	Jan. 12.	Jan. 19.
Consols	92⅝	92⅝	92⅝
U.S. 5-20's of 1862	87¼	87	86⅞
U. S. 5-20s, 1865	86¼	86½	86¾
" 1867	85¾	85⅞	85¾
" 10-40s	84¾	84¾	84¾
Erie	18	17½	18
Ill. Central	....	103	104¾
At. and Gt. West	....	25	25¼

A more general call has been reported for State and Railway bonds at, on the whole, buoyant prices. Central Pacific six per cents have been quite freely purchased, and close strong at 91⅝@91¾; Western Pacific sixes at 90 and interest; Union Pacific at 81½@81¾. Of the Western Pacific First Mortgage Bonds, less than $350,000 now remain to be disposed of, out of an aggregate offering of nearly $2,800,000.

Railway and miscellaneous stocks have been more confidently dealt in, and prices show a substantial improvement nearly all through the list. The later transactions indicated a tamer movement.

On Tuesday, it was reported that terms of consolidation had been agreed on, between the representative Committee of the Cumberland Coal, and the Consolidation Coal Companies. The share capital of each of these companies was given at $5,000,000. Each company was to put into the common stock all its property (railroads, &c.) and privileges, with the exception of the iron furnaces of each. The consolidation was to take effect the first of March next.

General business shows rather more activity, with more steadiness in values. Breadstuffs, Petroleum, Provisions, and Naval Stores have been most saleable. Middling upland cotton closed steadily on Wednesday at 25⅜ cts. per lb. The stock of cotton now here is given at about 61,000 bales. The receipts at the port this week, have averaged about 3,450 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,501,800 bales, against 1,184,150 bales in 1868–'9; exports, same time 792,250 bales, against 629,500 bales same time in 1868–'9; stock on hand at latest dates, 437,000 bales, against 304,250 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 246 pkgs., against 342 pkgs., same time in 1869. From Boston, 102 pkgs., in 1870, against 795 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in less demand, at from 9@17c., per lb.; week's receipts, 6,303. Milch cows have been very dull, at $40@$100 each, receipts, 103. Veal calves in moderate request at from 8@12½c. per lb.; receipts, 569. Sheep and lambs in limited demand at from 4½@8c., and 6½@8½c. per lb.; receipts, 34,035. Swine in limited request at 9½@10c. per lb., all live weight; receipts, 118,115.

Foreign goods have been in moderate demand, and irregular in price. The week's imports reached a specie value of $4,357,518 against $5,748,838 same week last year.

Ocean freights have been rather brisker and generally firmer. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 5½d. by sail, and 5½d.@6d. by steamer, per bushel; cotton at 3/16d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 554.

The balance in the Sub-Treasury on Wednesday was $80,508,235 38.

The New York exports, exclusive of specie, for the week ending Jan. 18, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$2,688,096	$2,462,778
Previously reported	5,302,920	5,693,272
Since Jan. 1	$7,991,016	$8,156,050

The imports for the week ending January 15, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,869,336	$1,571,194
Gen. merchandise	4,379,002	2,786,324
Total for the week	$5,748,338	$4,357.518
Previously reported	3,537,513	4,552,895
Since January 1	$9,285,851	$8,910,413

☞ Railroad Contractors and Bridge Builders will find notices of interest to them in our Advertising columns.

☞ Washington County (Md.) has assumed the payment of the January interest on the *endorsed bonds* of the Western Maryland Railroad. Payments of this interest commenced on the 17th inst.

☞ The stock in Pacific Railroad of Missouri, owned by the city of St. Louis has been sold to Joseph Brown and William Tanssig, of St. Louis, for $356,000, equal to 60¾, the highest price ever paid for Pacific stock.

Western Pacific Railroad.

OUR SALES OF THE FIRST MORTGAGE BONDS OF THE WESTERN PACIFIC RAILROAD COMPANY having been more rapid than the preparation of the Bonds for issue, owing to the temporary illness of Mr. William E. Barron, one of the Trustees of the Mortgage, the supply of Bonds for delivery was exhausted about Jan. 1, since which time we have been unable to fill orders except by subscription for subsequent delivery.

The Bonds for the remainder of the Loan, amounting to $765,000, have now come to hand.

Of this amount, $270,000 have already been sold by subscription, leaving but $495,000 of the entire Loan of $2,735,000 now to be disposed of.

The rapidity with which nearly $2,500,000 of the Loan have been taken, during the short period since it was first introduced on the market, affords gratifying evidence of the favor with which it has been received, and the rank which it has assumed among first-class investments.

The balance of the Loan will be sold upon the orders first received, at the original price, viz., 90 and accrued interest from Jan. 1, in currency.

Remittances reaching us after the closing of the Loan, or in excess of the amount of Bonds for sale, will be promptly returned, or otherwise invested, as the parties may direct.

The full market rates will be allowed for Government Securities, in exchange, as heretofore.

FISK & HATCH,
Bankers, &c.

No. 5 Nassau st., New York, Jan., 1870.

☞ FIRST CLASS SECURITIES. TANNER & CO., BANKERS, No. 49 Wall st., New York, have for sale a line of investment securities of the highest order. Among them,

6 Per Cent. First Mortgage Gold Bonds St. Louis and St. Joseph R. R. Co., May and November.

8 Per Cent. First Mortgage Gold Bonds St. Joseph and Denver City R. R. Co., February and August.

10 Per Cent. Bonds of Marion County, Missouri, May and November.

10 Per Cent. Bonds of Monroe County, Missouri, January and July.

All of which we can recommend with the utmost confidence.

TANNER & CO.,
No. 49 Wall street, New York.

Atlantic and Great Western Railway.

We learn that an arrangement has been concluded between the Atlantic and Great Western and Erie Railway Companies which places the former road, by the direct sanction of the Courts of three States, (New York, Pennsylvania and Ohio,) under the control of the Erie Company, thereby giving the latter an unbroken line between Cincinnati, Cleveland and New York. The Erie Company pay as rent thirty per cent. of the gross earnings. In other respects the lease is similar to that of last Spring, with the exception that the thirty per cent. shall be applied for the benefit of the bondholders.

☞ A resolution suspending the payment of the interest on the special tax bonds passed both branches of the North Carolina Legislature on the 18th inst.

Portland, Rutland, Oswego and Chicago Railroad.

The Executive Committee of the Corporators of the Portland and Rutland Railroad Company, of Maine, have deemed it expedient to lay before the public a brief statement of the present condition and prospects of the enterprise, and the grounds of their belief, in the early completion of a connected line of railway from the deep waters of Portland harbor to the city of Chicago.

The arrangements for the organization of a railroad company across northern New York, recently made at the Saratoga Convention, and the success which has attended the labors of Mr. Thompson and his friends, in securing the charter for the Canada Southern Railroad between the Niagara and St. Clair rivers, have relieved the friends of the Portland, Rutland, Oswego and Chicago Railroad, from the uncertainty which in the minds of many had hung over the enterprise, and the friends of this direct route, from Chicago to Portland, are now diligently at work, to carry out every section of the line.

At Portland, arrangements are all but consummated, for the extension of Commercial street, from the line of the Grand Trunk railway, at the Eastern end of Munjoy Hill around into Back Cove, along side the Harbor Commissioner's line to Deering's Bridge, thence north of Deering's Oaks, west, as far as Congress street, for the use of its line with other companies, the owners of lands and flats having mostly agreed to charge no damages for lands or flats so taken, for the width of 100 feet—and it only awaits the action of the City Council, to have this important improvement established.

From Portland west, as far as desired, by agreement with the Portland and Rochester Railroad Company, their track is to be used for both companies. The line will pass in convenient proximity to villages and water power, the people along the route having signified their readiness to do their share of the work of raising the money to construct it to the State line. The route is so level and favorable, that Mr. George Leonard, a reliable and accomplished engineer, estimated the line from Conway to Meredith at $13,151 per mile in 1848, and recent surveys tend to confirm the correctness of his judgment. Mr. Leonard's survey was from Meredith to Conway, keeping south of Chocorua pond, in Tamworth, from which point to the State line the route is comparatively level, and less expensive than the section from Chocorua pond to Meredith. From Meredith to Bristol there is a rise of 109 feet from Lake Winnipisiogee which is 501 feet above tide water to an elevation of 610 feet at Bristol, above the level of the sea. From Bristol to Danbury on the line of the Northern Railroad, there is a rise of 200 feet more, following up by easy grades the valley of Smith's river. From Danbury to White River Junction is 31 miles over the line of the Northern Railroad connecting with the Woodstock Railroad, 14 miles in Vermont, now in process of construction. The distance from Woodstock to Rutland takes the line across the Green Mountains, the means for doing which are now reasonably assured.

From Rutland, west, 32 miles of the Rensselaer and Saratoga Railroad are to be used to reach Fort Ann, between which point and Richland surveys will be made the present winter, by the recently formed New England and Oswego Railroad company, estimated at 150 miles by railway, although the exact distance is but 120 miles. The information laid before the Committee at Saratoga was calculated to lead to the belief that the line would not exceed at most 140 miles from Richland station to Fort Ann. Richland is 29 miles east of Oswego, by the line of the Oswego and Rome Railroad, under lease to the Rome, Watertown and Ogdensburg Railroad Company, with the right of purchase, and they have recently given notice of their intention to take it in fee. The Rome, Watertown and Ogdensburg Railroad is the one upon which the friends of the Portland and Ogdensburg Railroad relied as their means of outlet from the West. The distance from Richland station to Ogdensburg being 100 miles, it was desirable on the part of the Oswego people to secure the good will of this prosperous company, in favor of the route from Oswego to Portland, the line from Richland to Portland by way of Fort Ann being 100 miles shorter in point of distance, with vastly more favorable grades.

Mr. Pierpont, President, and Mr. Massey, Vice President of the company, both signed the call for the Oswego Convention in October last, and Mr. Massey took active part in its proceedings and made an elaborate speech in the convention.

Some attempts have been made to raise a presumption that Mr. Massey still favored the Ogdensburg route, as by this line it would give them 100 miles more of transportation than by turning east at Richland for Rutland and Portland. But we are now authorized to say that the fact is otherwise. Mr. Massey was at Portland in 1867, before the Portland and Oswego line was developed, and recent correspondence shows his sympathy with the Oswego and Portland line, in which he says "that when the surveys are completed, and the point of connection with our line decided upon, we will be quite ready to conclude an agreement," &c., with the New England and Oswego Railway Co.

The Oswego Committee at Saratoga expressed their entire confidence that the section from Richland to Oswego would form a portion of the through, or Trans continental line.

Intelligent railroad men, therefore, will perceive that all difficulties in the way of a railroad from Portland to Oswego are now overcome, except the mere question of money. On this point the way is clear, also.

The State of New York, by general statute, has authorized every city, village and town corporation to subscribe twenty per cent. of its valuation for the building of railroads. A population and a valuation larger than the State of Vermont is found in the several counties on this line from Fort Ann to Oswego in New York, including the county of Oswego. Municipalities in Vermont are allowed to subscribe 8 per cent., and in New Hampshire and Maine 5 per cent. of their valuation.

From Oswego west, the line is comparatively level and very straight to Chicago. The Lake Ontario Shore Railroad, 145 miles from Oswego to the Niagara River, is secured; for the building of it means have been raised, mainly by municipal subscriptions. The sections across Canada, and from the St. Clair River to Chicago, will no doubt be completed in due time.

The papers of Buffalo, speak with entire confidence of ability to extend this line to Buffalo, across the Peninsula of Canada since the passage of the act, incorporating the Canada Southern Railroad Company, which can run its line to a point opposite Buffalo, and cross the Niagara River at that city, at the head of the rapids, under a charter already obtained, to aid the building of which, the city of Buffalo has voted a large sum of money.

A line from Buffalo to Oswego passing through a rich and thriving country, including the prosperous city of Rochester, will be as direct as by way of the suspension bridge, or the proposed crossing at the whirlpool.

The city of Buffalo has only to favor this line, so essential to her prosperity, to become established in her position, not only as a great city but forever retain her place as the greatest on Lake Erie now being strongly contested for, by the rising cities of Cleveland and Toledo.

The Board of Trade of Buffalo in May last, adopted resolutions favoring the building of a direct line from the navigable waters of Lake Erie at Buffalo to the head of Lake Champlain and to the shipping docks of Portland harbor.

The Michigan Air Line company has ensured the success of their railroad from Chicago, to the St. Clair River by the wisdom of its location, over the most direct practicable route from Chicago to Portland, Boston, New York and other Atlantic ports.

The agreement of union, or of co-operate action agreed upon at the Oswego convention, has been faithfully adhered to, so that our labors can now be devoted to the construction of that portion of the line that has been assigned to us, in New Hampshire and in Maine, the completion of the section from Portland to Meredith, a distance of 75 miles by the way of Buxton, of which 60 miles remain to be completed.

The friends of this section in New Hampshire and Maine, work in complete sympathy and harmony, and we have every assurance that the completion of this section will ensure the early construction and cotemporaneously in point of time, the various sections of the great line to Chicago; and it is now publicly announced that the construction of the Northern Pacific Railway will be immediately entered upon—from the head of Lake Superior to the west, and east to the Straits of Mackinaw, connecting with the line proposed if not already in progress, from the Straits of Mackinaw through the northern peninsula of Michigan to East Saginaw city, and thence to a point of junction and connection at the St. Clair River, with the line of the Canada Southern Railway—so that that portion of the Transcontinental Railway lying between St. Clair River and Portland, will form a common trunk for both the Northern and Central line, from the Pacific.

The Committee therefore have determined to enter at once upon the work of raising subscriptions for commencing the work in Maine—having been delayed until they could ascertain what route and what line of policy the Portland and Ogdensburg Railroad Company would take, that company having priority of charter, and right of location over any route from Portland to the western line of the State. Having determined upon their location and entered upon the construction of their line, without availing themselves of any portion of the Portland and Rochester road, but crossing the same on a route to the Notch of the White Mountains without approaching the valley of the great Ossipee River by a direct line, or the most direct route, the committee of the Portland and Rutland Railroad Company have deemed it prudent to make use as far as possible of the Portland and Rochester road, as built, in order to avoid that waste of capital which comes of disregard of the rights and interests of railroad companies already existing.

The friends of the Portland and Rutland Railroad accept the only alternative measure which is open to them, of uniting with the friends of the Portland and Rochester Railroad in building a line by the most direct route from some point on the line of the Portland and Rochester Railroad to Meredith, to a point of junction and connection with the line of the Boston, Concord and Montreal, giving a direct route to St. Johnsbury and to Montpelier by the line of the Montpelier and Wells River Railroad recently entered upon, which, when completed, will form a direct line from Portland to Rouse's Point to Montreal and to Ogdensburg, while its extension west, from Meredith to Rutland as its main trunk line, ensures for it a volume of business that will justify the investment of capital for its construction.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLECT IN MAINTAINING AND KEEPING IN REPAIR FENCES—WHEN NOT LIABLE FOR NEGLIGENTLY LEAVING OPEN A GATE.

The facts in the late case of The Illinios Central Railroad Company *vs.* McKee (43 Ill. 119) are clearly and fully stated in the following opinion by

Breese, J.—This was an action on the case in the Coles Circuit Court, brought by Thomas Mc Kee against The Illinois Central Railroad Company, for killing a horse, the property of the plaintiff, by the defendant's locomotive, the horse having got upon the track by means of a gate at a farm crossing being negligently left open, as alleged.

The court gave to the jury this instruction for the plaintiff:

"If the jury believe from the evidence, that the horse of the plaintiff got upon the defendant's railroad at a gate erected at a farm crossing by the defendant, and while so on said road was killed by the locomotive and train of the defendant, and such gate through which said horse entered, at the time and for a long time previously thereto, was left open continuously, or so large a portion of the time that the employees of the road whose duty it was to keep up and maintain the fence must have known the fact, that at the time the gate was not left open without the fault or negligence of the defendant, and that the place where said horse got upon said road was not within the limits of any city, town or village, nor at the crossing of any public highway, and was within five miles of a settlement and at a place where the proprietors of adjoining lands to the defendant's right of way had not fenced or agreed to fence, and that said road had been open and the defendant had run upon it locomotives and trains more than six months previous to the killing of said horse, then the jury will find for the plaintiff and assess his damages at the value of said horse."

The defendant asked these instructions which were refused:

"When the railroad makes and maintains a gate at a farm crossing for the accommodation of the owner of a farm, the duty devolves on the owner or proprietor of the farm, and not on the railroad company, to keep the gate closed, and if the death of the horse in controversy was occasioned by the negligence of such proprietor, the company is not liable.

"As there is no allegation in the declaration that defendant has failed or neglected to keep the gates closed at the farm crossing near where the horse was killed, all evidence touching that question is excluded from the jury."

The only questions made here arise out of these instructions, and involve the point, whose duty it is to see that gates so placed at farm crossings are kept closed, and upon the admission of certain testimony.

There was no count in the declaration that this gate, at this farm crossing, was not kept closed, the only averments are as to the duty of the company to erect, maintain and keep in repair the fences on their roadway, and that, by reason of neglect in keeping them in repair, the horse strayed upon the track and was killed.

When proof was offered by the plaintiff that the gate was left open, the defendant objected, on the ground of the want of such an allegation n the declaration.

Was the testimony on this point properly admitted? We think not. The plaintiff in every case must state the facts in his declaration so plainly that the defendant may meet them. Neglect in maintaining and keeping in repair a fence, in general terms is one ground of action, that a gate on the line of the fence was carelessly left open is another. A fence of which a gate is part, may be in perfect repair, and therefore the allegation that a gate was left open is necessary to give notice to the defendant of what he is to defend against. There being no allegation of negligence in this respect, the testimony should not have been received, and this is in accordance with the familiar principle that a plaintiff can only be permitted to prove what he alleges. The gravamen of the action was, neglecting to keep the fence in repair, and it is not maintained by proof that a gate was carelessly left open. Gates are made to be opened, and opening them, and carelessly leaving them so, is a good cause of action, entirely different from that of neglecting the duty of erecting and keeping in repair the fence, and of which a defendant should be apprised by the pleading. A fence is not out of repair, nor can it be so alleged, merely because the gate is carelessly left open. The plaintiff should have stated his case according to the facts he intended to prove. On this point we are with the appellants.

We would have no difficulty about the instructions, had the declaration been in proper shape. As it is, there being no allegation in the declaration embracing this matter, any instruction in relation to it was out of place. On the abstract question presented, it is as much the duty of the owner of the farm at the crossing to keep the gates closed as it is that of the company, for, as this court said in the case of the Illinois Central R. R. Co., *vs.* Dickerson 27, Ill. 55, it is not the duty of the company to keep a patrol the whole length of their road to see that the fence is not broken down by breachy cattle, by men, or by a whirlwind, and by the same reasoning it would follow they are not obliged to patrol the line of their road to see if the gates at farm crossings are left open. Still they are liable, if their employees, seeing such a gate open, neglect to close it, and an injury results, unless the same be left open by the carelessness of the former. If the gate is left open by the owner of the land, the company would not be responsible, if by the company's agents it would be, and a neglect to shut it when it should be closed, by the agents or employees of the company, would be negligence for which the company would be liable.

The evidence, therefore, offered on this point, and admitted by the court, should have been rejected, there being no allegation in the delaration to which it was applicable.

The judgment of the circuit court is reversed, and the cause remanded with leave to planitiff to amend his declaration.

Judgment reversed.

☞ The Belfast and Moosehead Lake Railroad Company have voted unanimously to issue first mortgage bonds for $150,000 on a road bed costing $850,000, and second mortgage bonds for the remainder.

THE

First Mortgage Bonds

OF THE

CHICAGO, DANVILLE & VINCENNES RAILROAD.

Total amount to be issued	$2,500,000
Capital stock paid in	2,100,000
Estimated cost of road (140 miles)	4,500,000
Estimated earnings per annum	2,639,306
Net earnings per annum	879,768
Interest on the loan per annum	175,000
Amount of bonds per mile of road	18,000
Amount of interest per mile	1,260
Amount of net earnings per mile	6,284

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y., as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.

They bear examination and comparison, better, it is believed, than any other now before the public, in the fixed and unchangeable elements of *Safety, Security and Profit.*

They bear good interest—Seven per cent. Gold for forty years—and are secured by a *Sinking Fund*, and First Mortgage upon the road, its outfit, and net income, the Franchises, and all present and future acquired property of the Company.

They depend upon no new or half-settled territory for business to pay their interest, but upon an old, well settled, and productive country;—assuming that a railroad *built* through the heart of such a region offers better security for both *Interest* and *Principal* than a road *to be built* through the most highly extolled wilderness or sparsely settled territory.

This Railroad possesses special advantages, in running into and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and old farming settlements in the richest portion of the State of Illinois: in running near to deposits of Iron Ore of great extent and value, and over broad fields of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the Lakes to the Gulf;" as with its Southern Connections it forms a Trunk line 45 miles shorter than any other route from Chicago to Nashville.

These Bonds are therefore based upon a Realty and a Business that a few years must inevitably double—and competent judges say treble—in value.

Governments selling while the price is high pay well if put into these Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.

Pamphlets, with Maps, &c., on hand for distribution.

Bonds may be had directly of us, or of our Agents.

W. BAILEY LANG & CO., Merchants,
54 Cliff Street, New York,
Agents for the sale of the Bonds.

☞ The Baton Rouge and Vicksburg Railroad Company was organized at New Orleans on the 6th inst., by electing a board of directors, with Thomas C. Bates as President, and Geo. W. Cochrane as General Superintendent. This road is regarded as very important, passing, as it will, through a rich agricultural section almost its entire length.

☞ The length of the Penobscot Bay and River Railroad, from Rockford to Winterport, is fifty miles.

Notice to Contractors.

CHESAPEAKE AND OHIO RAILROAD

SEALED PROPOSALS will be received at the Engineer's office at Charleston, W. Va., until 12 M. March 1, 1870, for the GRADUATION, MASONRY and the SUPERSTRUCTURE OF BRIDGES on the Chesapeake and Ohio Railroad between the Falls of Kanawha and the Ohio River, including THREE MILLIONS CUBIC YARDS OF EXCAVATION, and SEVENTY THOUSAND CUBIC YARDS OF MASONRY.

Also, at the Engineer's office at Richmond, Va., until 12 M. March 10, 1870, for several heavy sections east of the Falls of Kanawha, including the unfinished work near Millboro', and that eight miles east of the White Sulphur Springs, the Great Bend tunnel, 6,400 feet; Lewis tunnel, 3,800 feet; five other tunnels from 500 to 1,700 feet long; several sections in rock cutting; and about 70,000 cubic yards of masonry.

Profiles and specifications can be found at the office of the company, 54 William street, New York, on and after February 1; at Richmond, Va., and at Charleston, W. Va., on and after January 15, 1870. The company reserves the right to reject any or all the bids offered, and to make private contracts for the work.

Information as to time, etc., will be given at the letting. For further information apply to H. D. Whitcomb, Chief Engineer, Richmond, Va., or to W. A. Kuper, Principal Assistant Engineer, Charleston, West Virginia.

C. P. HUNTINGTON,
President.

4t4

TO BRIDGE BUILDERS.

OFFICE OF SOUTH STREET BRIDGE COMMISSION, No. 224 South FIFTH Street.
PHILADELPHIA, Jan. 17, 1870.

SEALED PROPOSALS for erecting a bridge over the River Schuylkill at South street will be received at the office of the Commission, in the Department of Surveys, No. 224 South FIFTH Street, until 12 o'clock M. of the FIRST DAY OF MARCH, 1870, for the construction of a wrought iron drawbridge, with Murphy's modification of the Pratt truss. To have cast iron piers in river, and stone abutments, with approaches of retaining walls; arches of brick, and iron I girders, as described in the specification. The entire length of structure to be 2,419 feet, the truss spans to be 185 feet each, with pivot draw, giving an opening of 77 feet on each side.

The proposal to be for an aggregate bid, to be accompanied by a bond with two approved sureties to an amount of $50,000. Fifteen per cent. to be retained as the work proceeds until the same, inclusive of the $50,000 noted in bond, shall amount to fifteen per cent. of the contract price, after which the current estimates will be paid in full.

Plans may be seen and specifications obtained at the office of the Commission on and after the 29th instant.

MOSES A. DROPSIE,
President of the Commission.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

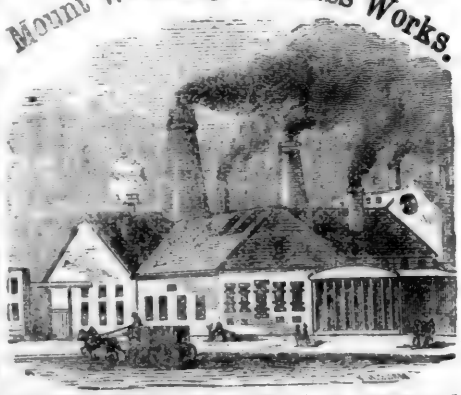
THE WHARTON Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜



This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

From the Milwaukee Wisconsin, Jan. 15.

West Wisconsin Railroad.

The opening of the Second Division of the West Wisconsin Railroad, from Black River Falls to Augusta, took place last week, and adds another link to the great railway system of Milwaukee. There are few roads in the country that are being built more quietly, yet at the same time more surely and more substantially, than the West Wisconsin. The road is to run from Tomah on the La Crosse Division of the St. Paul Road, to St. Paul, giving us an air line route to the latter city, and there connecting with the great chain of railroads being built from St. Paul in all directions. What is also of great importance to our city, the West Wisconsin is opening up to us a large portion of the Northwestern section of the state heretofore untouched by railroads, and will be the means of bringing to our door a large amount of business that we have never had before. This is plainly seen already. The road is built and running to Augusta a distance of sixty-six miles from Tomah and the business which comes over it is already large, exceeding the estimates made by, as well as the anticipations of those even well posted in the section. The road is now completed to within twenty-five miles of Eau Claire, one of the most important towns in Northwestern Wisconsin, and the contract for this division has been let through, with assurances that by the first day of July next the cars will run to Eau Claire, when it will give an all-rail outlet to Milwaukee for the immense lumber and general business resources of the Northwest.

Our business men and our Chamber of Commerce have felt a deep interest in the welfare of the West Wisconsin Railroad, for they have seen in it one of our most important feeders, and they have watched with no little interest the progress made and the energy displayed by President BALDWIN and his assistants in crowding it through as they have.

The West Wisconsin Railroad has heretofore received attention in the columns of the *Wisconsin*, and on the occasion of the opening of the second division of the road, we may be excused for referring to so important an enterprise once more. The road, leaving Tomah, where it connects with the St. Paul road, runs in a northwesterly—air line—direction to St. Paul, a distance of one hundred and fifty miles. Already it has opened up the flourishing places of Snow's Mills, Warren's Mills, Rudd's Mills, Black River Falls, Wright's Station, Humbird and Augusta, and by July next will bring Eau Claire to us.

Black River Falls is thirty miles north of Tomah, sixty miles from Eau Claire and one hundred and ninety miles from Milwaukee. Four years ago it was incorporated a village and now it has a population of over 3,000. At this place are to be found the most extensive iron ore beds in the West, with ore of the best quality. There is every prospect that within a year or two there will be many blast furnaces in full operation. With the development of these iron mines added to the immense lumbering interests of the Black River country, there is nothing that can prevent the place from becoming one of the largest and most prosperous cities in Northwestern Wisconsin, and giving to the road a vast amount of business yearly. The immediate stations referred to are new towns that have grown up since railroad facilities have been afforded them, and all of them give promise of being lively towns.

Augusta is located on Bridge Creek, twenty-five miles from Eau Claire, thirty-five miles from Black River Falls, and is at present the terminus of the West Wisconsin Railroad, over which the first train passed on Monday morning last. It is a town of over two thousand inhabitants, and in the midst of a fine lumbering and agricultural region is enjoying a healthy growth. From Augusta stages now run daily on the arrival of the trains to Eau Claire, a distance of twenty-five miles, and these stages are carrying large numbers of passengers.

The managers of the West Wisconsin Railroad have done what no other line in the country, we believe, has. They have built and own and run their telegraph line along the road. Like everything they own, it is the best, with all the improvements, and in every detail substantial. Aside from the running of their own trains they do a private business which yields them a handsome income from the line.

The Land Grant of the road embraces 1,004,000 acres of the finest agricultural and timber lands on each side of the road through its entire length. These lands are very valuable and there is little doubt that now they will be taken up rapidly. In addition to this grant the counties through which the road runs have donated $50,000 each to the road.

The bonds of the road have thus an excellent security. Aside from the large sums invested of the private means of the projectors, there is the road, sixty-six miles already completed, the land grant, the telegraph line, and all the property upon which this is a first mortgage to the bondholders. These bonds are sold at par in currency and pay an interest of seven per cent. in gold. The bonds are free from United States taxation, and are receivable at par for lands bought of the company and for shares taken in the stock of the Black River Iron Co.

The Chamber of Commerce of Milwaukee, have, as we have stated, ever felt a deep interest in the West Wisconsin Railroad, and looking upon it as one our most important feeders, have extended to it on every occasion their countenance and support. On the occasion of the opening of the second division a delegation from the Chamber

made a trip over the road and to-day submitted the following report to the body.

To the President of the Milwaukee Chamber of Commerce:

Your committee having visited the West Wisconsin Railroad and passed over it from Tomah to Augusta, and thence by stage to Eau Claire, take great pleasure in saying that they found everything progressing satisfactorily. The project was inaugurated a few months since by Mr. D. A. BALDWIN and his associates, and before any appeal was made to the public they invested in it largely of their private means, not only making the entire surveys, but building the first division of the road from Tomah to Black River Falls, ironing and equipping it. They were thus enabled to show that they had the fullest confidence in the enterprise—that it would be one of profit, as well as of importance to the country and to our city. After reaching Black River Falls it was found that the business of the road was larger even than the most sanguine had anticipated, and the road has been built to Augusta almost entirely by private enterprise, and without soliciting city or town aid to any extent, and also without throwing upon the market any notable amount of the company's bonds. We were glad to note that the road is substantially built.

Of JACOB HUMBIRD, who has had the building of the road in charge, it is sufficient to say that he is evidently an experienced railroad man. Extensively engaged in the construction of roads in South America, he brought to this a practical experience of great benefit, and he seems to have taken pride in making this work thorough in every detail. The road bed is level, and while economically constructed is strong and smooth, and the iron the well known Fish joint rail. Although a new road, we have never seen a smoother one, and the care taken in building is such that no ordinary circumstances will cause breaks. In the culverts and bridges the engineering shows the practical good sense as well as the established skill of the builder. We examined somewhat at length the cost of building the road, and were certainly pleased at the economical manner in which it has been done, when compared with the work accomplished. In addition to the road, the company have built a substantial telegraph line along its way, which they own and run, and which will add materially to their receipts, from private business.

The statistics of the counties of Monroe, Jackson, Eau Claire, Dunn, Pierce, Buffalo, and St. Croix, through which the road runs, with their business, have been before presented to this body, and the figures are not unfamiliar to you. In this report we shall only call your attention to the immense iron resources of Black River Falls, and to the lumbering interests of the Northwest, which this road is opening up to us. It is a section which has long needed an outlet to Milwaukee, and through the efforts of President BALDWIN and his associates we are glad that we are so soon to have it. There are few sections of our state that show a more healthy growth and prosperity than the Northwest, and particularly is this the case on the line of and in the vicinity of this road. New towns are springing up, and agricultural lands, of which there are an abundance, are being rapidly settled. Our immigration statistics show that adopted citizens who are seeking a home in the new world, find lands in this section of our state that are admirably suited to their tastes, and which, under their energy and skill, will ere long make Northwestern Wisconsin as noted for her agricultural as she has been for her lumbering resources.

The West Wisconsin Road is not dependent solely upon the country through which it passes for its business. Great as this business must be, we have only to look forward to the few months when the road shall reach St. Paul, its northern terminus, to find that important connections await it. Among the roads waiting for such connections are the St. Paul and Pacific, now being rapidly built to the Pacific coast, and in the hands of capitalists who will not let it linger. As soon as this connection is made much of the business of the Pacific road will naturally seek this air line route to Milwaukee and the East. The Lake Superior, and Mississippi road now being built from St. Paul to Lake Superior, will also make a most important connection, and so with the Valley, and other important roads, of which St. Paul is the centre, and all of which will give the West Wisconsin a share of their Milwaukee and Eastern business.

The West Wisconsin Road has a most extensive land grant which adds to its importance. This grant embraces much of the valuable agricultural and timber land of the Northwest. The company have wisely determined not to throw these lands into the market until they can realize a fair sum for them; but it appears to us that they must soon be taken up. Already arrangements have been made for settling a colony of some five thousand Swedes upon the lands, and this will form a nucleus which will be the means of bringing the lands into market, and realizing for the company a handsome sum for them. When properly managed, land grants are deemed sufficient to build a road, and in this case there seems the best of management.

To finish this road from Eau Claire to St. Paul, the company will throw upon the foreign market bonds to raise the necessary money. They do this in the fullest confidence that those investing will be fully secured. Aside from the valuable and well managed land grant, all of the private means invested, with so much of the road as is already built and to be built, is mortgaged, and upon this the bonds will have the first choice. It appears to us that this investment is one of the best that any railroad can offer, and is one that should meet a willing response from those who are looking for a good investment. Our State Legislature have been most liberal in their legislation for the road, and have given it all the aid and assistance in their power. Its business, already large, is rapidly increasing, and as the line penetrates the almost boundless wealth of the northwest, it cannot fail to open up a traffic that will be profitable to the road, and of great benefit to our city and state.

Signed: T. MOWER,
Chairman of Com.

The report after being read was unanimously adopted as well as the following resolutions:

WHEREAS, This body has official information of the opening of the second division of the West Wisconsin Railroad, from Black River Falls to Augusta, and that the road is now opened and running trains regularly from Tomah to Augusta, a distance of sixty-six miles; and

WHEREAS, We have watched with no little interest the progress of a road which is opening to our city a section of the state heretofore not reached by our railroad system; therefore be it

Resolved, That the energy of President D. A. BALDWIN of the West Wisconsin Railroad, and his associates in carrying forward so important an enterprise for our state and city, entitles them to our confidence and respect.

Resolved, That the economical manner in which Mr. BALDWIN and his associates have built this road, and managed it and its large land grant, investing their private means until a solid and substantial basis has been gained, assures us that in appealing to capitalists for aid in the further construction they do so with every assurance that the investment will be a safe and profitable one.

Resolved, That the managers of the West Wisconsin Road in this enterprise of so great importance to our State and city, have the confidence of this body, and that we will extend to them all the aid in our power.

Resolved, That this report, with the resolutions attached, be entered upon our record, and that the newspapers of our city and the section of country interested be respectfully requested to publish the same.

Elkton and Massey's Railroad.

It is said that the Legislature of Maryland, now in session, will have before them a bill to incorporate the Elkton and Massey's Railroad, which will connect by a link of less than twenty miles the Philadelphia, Wilmington and Baltimore Railroad at Elkton, with the Kent Railroad and the Queen Anne's Railroad, at their junction at Massey's. From this place, running down the Queen Anne's Road, a point may be reached from which a branch road of seven miles will connect with the Maryland and Delaware Railroad—thus connecting Clayton, Delaware, and Easton and Oxford. Another short road will connect with the Dorchester Railroad. A strong effort is now being made through Cecil and Upper Kent county, in behalf of this project.

Providence and Worcester Railroad.

The earnings of this road for the years ending November 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$287,473 25	$324,224 40
" merchandise	419,537 98	451,852 23
" mails	5,157 50	8,745 68
" rents	4,793 71	3,188 87
" express	6,425 57	10,295 74
	$723,388 01	$793,301 42
Expenses, viz:		
Maintenance of way	$190,993 85	$159,270 89
Repairs of locomotives.	37,800 00	43,800 00
" cars	50,800 00	39,300 00
Fuel	73,688 28	75,923 71
Oil	7,126 83	7,895 41
Passenger department.	43,215 02	47,580 24
Freight "	82,188 68	97,398 17
Local taxes	26,497 69	26,779 26
U. S. revenue taxes	18,224 19	19,061 26
Interest	2,273 25	1,452 89
Rent to Milford and Woonsocket R. R. Co. (15 months)	.....	6,250 00
All other expenses	51,533 44	63,522 09
	$564,391 23	$588,183 42
Net earnings	$168,996 78	$205,118 00

Compared with the previous year the gross earnings of 1869 show an increase of $69,913 41; with an increase in expenses of $23,792 19—making the increase in net earnings, $46,121 22.

The roadbed, superstructure and equipment are all now in such excellent condition that but a moderate sum will be required to keep them in repair for the next few years, compared with the last few. The double track has been extended to Blackstone, and has been in use for several months. Grading is now being done from Worcester towards Providence, and it is expected that some eight or ten miles will be in readiness for the superstructure in the course of the coming spring. The road will then have a double track about two-thirds its length, and will be operated with much greater facility and economy. The abutments of the bridges, and other masonry, are now being rebuilt throughout the entire line. About $35,000 have been expended in the construction of passenger and freight stations, car house, etc. Three new locomotives have been added to the equipment, to re-place three old ones sold; also sixty freight and two passenger cars. Two passenger, one box and thirteen coal cars have been rebuilt. Two dividends of five per cent. each, have been declared. One thousand shares of the capital stock have been sold, carrying the capital up to $2,000,000, its authorized limit, and the proceeds

applied to building the second track and additional equipment.

The items to be accounted for since last report are as follows

Net earnings as above	$205,118 00
Cash received for sales of 1,000 shares of the stock of the company	128,898 00
Materials on hand Nov. 30, 1868	144,639 36
Cash on hand Nov. 30, 1868	21,945 82
Dividends unpaid	1,029 00
Total	$501,625 18

Accounted for as follows:

Materials and labor for second track		$101,126 45
New depot at Waterford		8,900 00
New freight house at Lonesdale		1,841 86
New engine house at Woonsocket		944 91
Land purchased		3,805 62
Locomotives and cars		57,550 00
Dividend paid Jan. 1, 1869		76,000 00
" July 1, 1869		100,000 00
Materials on hand Nov. 30, 1869		104,439 80
Cash in bank	$116,043 19	
Note on hand	280 00	
	$116,323 19	
Less due connecting lines	69,306 15	
		47,017 04
Total, as above		$501,625 18

The company have 21 locomotives, 24 first-class, and 5 second-class passenger cars, 175 eight-wheel, and 76 four-wheel merchandise cars, 101 eight-wheel lumber cars, and 460 four-wheel coal cars.

Miles run by passenger trains, 166,710; by freight trains, 208,845; by other trains, 32,610—total, 408,165. Number of passengers carried, 1,379,960; do., carried one mile, 12,258,435. Tons of merchandise carried, 393,558; do., carried one mile, 12,300,450. Length of road in Massachusetts, 25.51 miles; do., in Rhode Island, 17.90 miles—total, 43.41 miles. Length of single track, 26 miles; do., double track, 17.41 miles. Length of branch, 1 mile. Length of sidings, 12 miles. Length of roads belonging to other companies operated by this company, 3.877 miles. Total miles of road operated by this company, 47.287 miles.

BALANCE SHEET, Nov. 30, 1869.

Construction	$1,558,297 20
Equipment	476,474 98
Materials on hand	104,439 80
Cash, etc., on hand	47,017 04

	$2,185,229 02

President.—EARL P. MASON.

Directors.—Earl P. Mason, James Y. Smith, Alexander DeWitt, Paul Whitin, Harvey Chace, Isaac Davis, Isaac H. Southwick, Henry Chapin, William S. Slater, John Carter Brown, Gideon L. Spencer, Elijah B. Stoddard, Horatio N. Slater, Jr., Lyman A. Cook, Estus Lamb.

Treasurer and Clerk.—JOHN R. BALCH.

Superintendent.—WILLIAM D. HILTON.

☞ Thomas K. Proctor of Barnstead has been chosen President of the Suncook Valley Railroad Company. The proposed road will be about 15 miles in length, extending from Pittsfield, *via* Barnstead and Gilmanton, to Alton. The work of construction will soon be commenced.

Erie Railway.

REPORT OF THE PRESIDENT.

To the Stockholders of the Erie Railway Company:

So much has been written and said, both for and against the present management of the Erie Railway, that I deem it proper, in presenting a summary of the business of the last fiscal year, to take the opportunity of giving to the stockholders the following account of what has been accomplished in the way of improvement to their property and the establishment of a reliable and profitable business for the future.

It is something over a year since the present management came into power.

The condition of the road at that time was not such as to attract the confidence of the traveling public, nor of the shippers of the products of Eastern manufactories and of importers to the Western States, and of the products of the West to the Eastern markets. The iron used in the track had been of an inferior quality, and was much of it worn out and unsafe: this, coupled with the accident at Carr's Rock the previous Spring, was injuring the business of the road, both passenger and freight, to such an extent that I felt it my duty to adopt the most effective measures at once.

By careful inquiry into the experience of European railways in the use of steel rails, and of the operations of the few tons that had been laid on this railway the previous year, I fully satisfied myself as to their great durability and strength, and of the necessity of our using them on the eastern portion of the road, where the very heavy traffic and the nature of the road bed operates so disastrously to the iron rails. We have laid on the Eastern and Delaware Divisions nearly 100 miles of solid steel rails—ten miles of American manufacture, and the remainder procured from the best experienced manufacturers of England. The very great first cost of these solid steel rails—being more than twice the cost of iron rails—constrained me to inves igate whether a middle course could not be adopted with advantage and economy: and while on this subject I was brought in communication with Abram S. Hewitt of the firm of Cooper & Hewitt, who had just returned from Europe, where he went as one of the U. S. Commissioners to the "Exposition Universelle," and was then preparing to manufacture at the Trenton Mill

STEEL-HEADED RAILS.

While in Europe Mr. Hewett had superior facilities for the investigation of the subject of steel-headed rails at the various places of manufacture as regards the process, and at the places where they were used as regards their service, and their relative value as compared with iron and with solid steel rails, and I availed myself of the favorable opportunity to secure the advantages to be derived from his valuable information and experience, by making a contract with his firm, by which we became joint owners with them in the Trenton Mill, where, during the past year, they have been rolling these rails for us, in all about 12,000 tons, or 120 miles, and so far the results of the wear are eminently satisfactory. We have laid in all during the past year, including the steel and steel-headed rails, about 400 miles of new track. The present condition of our track is equal, if not superior, to any in the country, and the reputation of the road in this respect is fully established, as is fully demonstrated by our large and constantly increasing passenger traffic. By Dec. 31, 1870, we hope to get the Eastern and Delaware Divisions, which have the heavy coal traffic of the Pennsylvania Coal Company and the Delaware and Hudson Canal Company entirely relaid with steel, which, though of greater cost in the first instance, is safest, and cheapest in the end, and will enable us to largely reduce the expenses of keeping up our track.

IRON BRIDGES.

My attention at the same time has been called to the matter of the bridges which, being of wood, require frequent renewals, and the increasing scarcity of suitable timber along our line enhances their cost from year to year, and we have concluded to adopt iron bridges for all future renewals, where the proper foundations for permanent piers and abutments can be obtained.

During the past season, in addition to several small bridges, we have had built an iron bridge 650 feet long—four spans—for the crossing of the Susquehanna River, just west of Susquehanna Depot, which is now being placed in position.

With steel rails and iron bridges for a permanent way, we can safely predict large reduction of expenses, even with an increasing business.

LOCOMOTIVES.

The present management found the locomotive equipment in a very worn and unserviceable condition, many of the engines having been run for years and maintained by patching, so that a large proportion required new boilers and fire boxes, and many, entire rebuilding—the old machines being worth only the old scrap, but standing on the books and records of the company as so many engines. These old engines have received the necessary attention as fast as possible for our shops to take them in, and they have been overhauled, and entire new engines in many cases turned out, with the same designating number, the whole expense being charged to repairs.

As additional equipment we have purchased from Paterson locomotive manufactories fifty new engines, ten of which have yet to be delivered on present contracts, and they are coming along at the rate of about four per week.

PASSENGER TRAFFIC.

During the fiscal year ending Sept. 30:

	1869.	1868.
Number of passengers carried in cars	2,497,113	2,194,348
Number of passengers carried one mile	128,445,158	124,312,884
Earnings from passengers	$4,043,048 82	$3,531,503 88

To accommodate the increasing passenger business of the road, and also to keep pace with our competitors, we are rapidly replacing our old passenger equipment by new coaches of the best approved style of construction. We are also adding palace or drawing room coaches to our day trains, and have found them to be a popular feature of the road:

FREIGHT TRAFFIC.

	1869.	1868.
Number of tons of freight carried in cars	4,312,209	3,906,243
Total number of tons carried one mile	817,829,190	595,699,225
Revenue fr. freight	$12,583,793 73	$10,780,975 66

To accommodate this large business we have made extensive additions to our equipment, and endeavored to keep up to the wants and requirements of our local business as well as the through business. A very important feature of our freight business is the

COAL TRAFFIC.

The Erie Railway will, I hope, in a short time, become one of the most important coal-carrying roads in the country. This business is very desirable—it is given to us in full trains, and the rates are good.

During the year we have renewed the contract with the Pennsylvania Coal Company, and increased the quantity to be transported for them annually from 900,000 to 1,200,000 tons, commencing Dec. 1, 1869.

We have also concluded a contract with the Lehigh and Susquehanna Coal Company for a period of twenty years, with a gradually increasing tonnage, commencing at 150,000 and running up to 500,000 tons annually, from Honesdale to New York.

Under the present management this company has obtained control, by a perpetual lease, of the

Jefferson Railroad, extending from Hawley to Honesdale, where it connects the Erie system of roads with those of the Delaware and Hudson Canal Company. This road was completed and opened for coal traffic in January last, since which time we have received from that company a large and constantly increasing business. We are now loading at Honesdale from 200 to 300 cars per day. I estimate that in the year 1870 we ought to take from 2,000,000 to 2,500,000 tons of anthracite coal from Hawley and Honesdale to tide water. We certainly can do so if we can provide the cars and engines, and I hope not to default on that account.

Early in my connection with this company I became convinced, that from the geographical position of our road and the many advantages offered by it to that end, it should do the carrying of the largest part of the anthracite coal consumed in the western part of this State, as well as that sent to the Western States by the Lakes. On assuming the Presidency of the company, I at once commenced action to secure that trade, which I considered so very desirable, as it would be reliable, constant and increasing, and the haul would be long and the revenue large. Negotiations were opened with the Delaware, Lackawanna and Western Railroad Company, whose road connects with ours at Great Bend, and the terms of a contract to run a number of years, for the transportation of a large amount of coal to Buffalo, a distance of 222 miles, were all agreed upon. And, though the agreement was not executed, negotiations had proceeded so far that shipments were commenced, and we had constructed more than one hundred cars of the large number we were to build and mark "D., L. & W.," for that line, when that company concluded an arrangement with the Syracuse and Binghamton Railroad, and the agreement with us was not executed nor carried out.

It then became necessary for us, in order to secure any of this trade, and assume the position to which we are entitled by reason of our line, to form some other connection, and to tap the very heart of the coal region. Negotiations were accordingly opened with the Delaware and Hudson Canal Company, which, for the magnificence of its coal estate and the magnitude of its annual production, stands first among all the anthracite coal companies of the country, and an arrangement was made with them by which we agreed to construct a railroad from Carbondale to Susquehanna, a distance of 40 miles, over which, and thence 231 miles further on our main line to Buffalo, they are to ship annually a large amount of coal, commencing at 150,000 and running up to at least 500,000 tons by 1873, at favorable and remunerative rates. To make up for the time lost in the fruitless negotiations with the Delaware, Lackawanna and Western Railroad, the construction of this road has been pushed forward with all possible dispatch, and will be completed before the next Summer months. By this Carbondale road we have the shortest line from the anthracite coal fields to Central and Western New York and the Lakes.

The Lehigh Valley Railroad having been extended to form a connection with us at Waverly, gives us another coal traffic feeder from which we are already receiving an average of about 75 car loads of coal per day. The coal from this road, at present, is loaded in our returning freight cars which would otherwise go through to Buffalo, 167 miles, empty. The time is but short when this Waverly connection will be of very great importance to us as a connection for coal and other freight.

PAVONIA FERRY.

We found the Pavonia Ferry running from the foot of Chamber street, New York, to the passenger depot at Long Dock, Jersey City, for the accommodation of the passengers by our trains and the few people living near Pavonia avenue, in Jersey City. We constructed the ferry houses and slips at Twenty-third street, New York, and built two large fine boats to run on that line. By this new line of ferry we have established a new depot in New York convenient to all the up-town hotels and residences.

To increase the travel over our ferry beyond the train passengers, we have loaned our substantial aid to the construction of a horse railroad through the streets of Jersey City to Hudson City. This street road already promises to be a very profitable investment—it has assisted in building up that part of Jersey City and Hudson City through which it runs, and has brought larger increase to the revenue of our ferry as it connects with other street roads in Jersey City, running thence to Hoboken and Bergen; and it has been of further advantage to this company, as it runs through our property on the hill, at Hudson City over the tunnel, and has enhanced its value by making it more marketable and desirable.

To further increase the ferry revenue we made an equitable contract with the Northern Railroad Railroad of New Jersey, then running their trains over the New Jersey Railroad to the Cortlandt street Ferry, for operating their road, by which we brought their trains to our ferry. So far under that contract we have averaged for that road about 800 car loads of passengers per month each way over the ferry, all of which is new business, and the contract for operating the road, which has so far paid its way, must eventually be profitable of itself.

We have also made the same kind of an operating contract with the Hackensack and New York Railroad, which has averaged about 500 car loads of passengers each way per month for the ferry.

The quantity and character of our freighting business has been expanded to such an extent as to prove the comparatively large property at Long Dock altogether inadequate for the purposes of the company, and we have deemed it absolutely necessary to procure more property fronting Hudson River.

We have purchased, at a cost of $1,600,000, the property of the Weehawken Docks Company, situated just north of Hoboken, of about 60 acres, giving a river frontage of 2,000 feet, where we have constructed a large pier for the handling of coal in transferring it from cars to boats. This pier has the best working arrangements, and is one of the largest on the river—capable of handling about 400 cars per day.

This property is also used as the depot for handling refined oil in barrels, and crude oil in bulk. We have also concluded arrangements for the construction here of a large and commodious grain elevator, which will be the means of very largely increasing our transportation of bulk grain, and facilitate the unloading and prompt return of grain cars, thus enabling us to get much more service out of them.

We have also purchased the "Gregory Farm," situated about two miles north of the Weehawken Docks, of 80 acres, giving a river frontage of 1,600 feet. Here we have established our depot for the unloading of live stock, and built large and commodious barns and pens, affording all the facilities for making it a Live Stock Market. It is already very popular with the stock men, and will undoubtedly become the Live Stock Market of this city. The river frontage of this property we have improved by the construction of a strong and substantial bulkhead the whole length, making it available and desirable for the erection of warehouses, abattoirs, or other similar structures and for a lumber depot.

Between the Weehawken Docks and the Stock Yards is the property of the Delaware and Hudson Canal Company, where they have large facilities for unloading and storing coal transported over our road.

Access is had to this property over the road of the Hoboken Land and Improvement Company, running north from the east end of Bergen Tunnel to the Canal Company's property, thence over the Fort Lee Railroad. With both of these companies we have fair and equitable arrangements for use of their tracks. So much of the Fort Lee Railroad as is completed was built by us, which enabled us to obtain much more favorable terms for its use to our stock yards.

At Long Dock we have built two new piers, for the accommodation of our freight business, and added to and improved the old piers. We have also built a new passenger depot on an enlarged plan, to enable us to provide accommodation for the trains of the Northern Railroad of New Jersey, and the Hackensack Railroad, and we are now rebuilding and adding to the number of the ferry slips.

JERSEY CITY SHOPS.

We have commenced the construction of a large machine shop which we found to be necessary on account of large additions to our motive power—the walls, of brick, were all up when Winter set in and stopped the work—soon as the Spring weather will admit we shall resume work, and hope to shortly after complete it, when we shall have one of the largest and best appointed shops in the country. We have also built an extensive car shop, where, in addition to our repairs of coaches and freight cars, we are now turning out twenty new coal cars per day. We are also building several new coaches, with all the modern improvements, at this shop.

At Pen Horn we have made extensive purchases of real estate for the handling of crude oil in bulk, as we found the hauling of tank oil cars east of the tunnel was considered as endangering property and increasing rates of insurance, while it was too valuable a traffic for us not to work for, and give it all necessary accommodations. The oil is conveyed from here in pipes to Weehawken, and is only pumped through as vessels may be there to take it. All of this property will be in demand in a few years for refineries and warehouses of various kinds, as it is accessible by vessels *via* the Hackensack River. Already one refinery has been established there with a capacity of 1,200 barrels per week, all the oil for which is transported over our road.

The Paterson and Newark Railroad, which connects with us at Paterson, was built with our aid, and we have entered into a contract with that company for operating the road.

We found this railroad being constructed with a narrow gauge, and intended to connect at Newark with the narrow gauge roads running thence in connection with the Pennsylvania roads for the West, and they were also promising to make such connections as would enable them to compete with us for passengers and freight between Newark and Paterson. Rather than allow a rival to reach the carrying business of our line we concluded it would be better to control the instrument, and by making it of the Erie broad gauge, enable us to tap the business of the extensive manufactories of the City of Newark, and compete with the other roads for Western trade from that point, and also extend the market for coal and lumber from our main line. By the charter of that company they will construct their road from Newark to make another connection with us at the West end of the tunnel, and such extension will make the road a profitable one and bring a large business to our ferry.

The Newburgh and New York Railroad was constructed by us from the Junction near Greenwood to a point on the Newburgh Branch, five miles from Newburgh, a distance of 13 miles, thus giving us a direct line between New York and Newburgh (sixty-two miles), and enabling us to compete with the River, and with the Hudson River Railroad for the Newburgh and Cornwall travel.

The double track has been extended by us by the construction of the second track on the Delaware Division from Turnout to Middaugh, nine miles, and from Hancock to Deposit, thirteen miles; and on the Susquehanna Division from Painted Post to Erwin, four miles, and from Canisteo to Hornellsville, four miles. In all we have completed and opened 80 miles of double track, beside which we have done a large amount of work for the second track on other parts of the Delaware Division, and have done the grading and

masonry for second track on Buffalo Division from Lancaster to Buffalo, 10 miles, which is now all ready for the ties and iron.

Additional side tracks have been put in on all parts of the road as rendered necessary by the increased number of trains. At Buffalo, alone, within the past year, more than two miles have been laid; Jersey City, two miles; Millville, Waverley, Hornellsville, and Castile, about one mile each, and other stations in proportion.

At Buffalo we have also erected a large and well-appointed car-shop for the construction and repairs of coaches and freight cars at that end of the road. We have also erected an engine-house and machine-shop at Rochester.

The improvements at other stations, in the way of new freight depots, &c., as at Binghamton and Hornellsville, have been commensurate with the business requirements.

The increase in the tonnage and mileage of trains has made a corresponding increase in the quantity of fuel consumed, which is one of the very important items of operating expenses. Considering that the use of wood as locomotive fuel, besides being more expensive in the first cost per mile run, requires a very large amount of capital invested all the time, to keep a year's supply of properly seasoned wood ahead, we concluded to change our locomotives to coal-burners as fast as possible, and but a comparative small number are now burning wood. We are now using about 85,000 tons of anthracite coal and 150,000 tons of bituminous coal per year; and in order that this large amount shall be procured at the lowest possible price, we have for the bituminous coal secured Barclay Railroad and Towanda coal mines.

The railroad runs from Towanda, Bradford Co., Penn., 20 miles from Waverly by the extension of the Lehigh Valley Railroad, to the coal mines, a distance of 16 miles, and the coal is delivered on our road at Waverly to the transportation department at cost—at the present writing this coal is costing us about four cents per mile run less than in former years for the same kind of fuel. We have also made a proportionately good arrangement for our supply of anthracite coal, and we confidently expect that future statements will show a large reduction in this item of our operating expenses.

GENERAL OFFICES, TWENTY-THIRD ST.

The old offices of the company, in Erie Buildings, West street, were constructed nearly 20 years ago, when the requirements of the road for office room for the accommodation of the officers and clerks were not one-fourth of what they now are, and this old building had been so enlarged and altered over to meet the increased wants from time to time, that by many it was considered unsafe to make any more alterations to it. It had also arrived at that condition on account of its various changes, as to be incapable of being properly heated in Winter, and the ventilation was so bad as to be destructive to the health of the many persons employed in it. We, therefore, considered it necessary to make a change, inasmuch as we required more room, and as there was no necessity of the offices being on the dock, we thought best to move up town, where it would be more convenient for all persons connected with the company in going to and from their homes. The building where we now are was the only one large enough for the purpose that we could secure, and here we have arranged offices to suit the wants of the several departments; and in fitting them up it was considered the best economy to make them not only comfortable and convenient, but attractive for the many persons necessarily employed on the premises, as well as for the large number of officers of other railroads, and the business public, whom we have to receive from time to time.

The foregoing is a brief statement of the principal operations of the present management on the line of the road; the object in all cases, as will clearly appear, has been for the permanent improvement and lasting benefit of the company; if mistakes have been made in any, time alone will show them. In my judgment they were all entered into on correct principles, and on reviewing the work at this time I am clearly of the opinion that it is but a few months before that fact will be clearly demonstrated to all.

FOREIGN RELATIONS.

Having treated so far of our domestic arrangements and policy, I have a few words to say in regard to our foreign relations.

When we assumed the management we found combinations being formed all around us by the New York Central and the Pennsylvania Central Railroad Companies, which threatened to cut us off from all connections controlling any of the through business of the West, and so leave us merely a local institution. Believing the capacity of this road to be such as to enable it to take care of its full share of the through traffic, and that it was the intention of the originators of this enterprise that it should be a National Institution, and one of the main (if not the very principal) channels of commerce between the East and the far West, we considered that the good of the whole country as well as the interests of our stockholders demanded of us that these combinations should be defeated. We therefore entered into the spirit of this contest, determined, if possible, that the Erie Railway should take its true position in the carrying trade of the country. Our first attention was called to the Atlantic and Great Western Railway, which was built with a six-feet gauge from Salamanca, N. Y., to Dayton, O., where it connects with the Cincinnati, Hamilton and Dayton Railroad, over which there is a track of the same gauge to Cincinnati, connecting with the Ohio and Mississippi Railroad to St. Louis, making a road of continuous six-feet gauge from New York to the Mississippi River, with a branch to Cleveland and another to the oil regions of Pennsylvania. The Atlantic and Great Western Railway had been built under the influences of the Erie Railway Company, who had for a term of years paid tribute to it in the way of extra allowances or commissions for the through freight and passengers brought to Salamanca, which extra allowances had amounted to more than half a million of dollars, and had been the means of enabling it to get through, but was then in the hands of a Receiver. It was in contemplation to take that road into the narrow gauge system, and in the interest of the Pennsylvania Central Railroad, which would leave us only the necessary traffic between their local stations and the local stations of our road, when, in December, 1868, we took possession under the terms of a lease to operate it for a per centage of the gross earnings. After we took possession and had advanced the necessary money to pay the obligations of the Receiver, which was a condition of the Court, it was found that under the then existing laws of the State of Ohio, the lease, so far as related to the operations of the road, was of no validity. We then had a bill placed before the Ohio Legislature amending the statutes so as to remove the difficulties of the questions raised, which was passed, when Mr. Mc Henry, who had a scheme for funding the past due interest on the bonds, and which he found likely to fall through, interposed objections and prevented ratification of the lease under the amended law. The road then, necessarily, went again into the hands of Receivers. That lease was entered into by us in good faith, but we were unwilling to be a party to the payment of any money on it for the benefit of any one until the bondholders were satisfied, otherwise there would be no permanency to the arrangement, as any unsatisfied bondholder could break it and remove us from possession by obtaining the appointment of another Receiver.

Uncertainty and litigation brought on by disappointed parties followed; but the matter has now all been adjusted, and we are again in possession and operating the road on substantially the same terms as of the original lease.

The Cincinnati, Hamilton and Dayton Railroad Company have made a contract with us, giving us the use of the broad-gauge track over their road to Cincinnati, and of their depots and station accommodations at all their stations, on very favorable terms, the expenses of the road being prorated according to the amount of business done on the broad and narrow tracks. We thus have control of a road to Cincinnati and to Cleveland, and by an arrangement with the Ohio and Mississippi Railroad for mutual exchange of business, have unbroken communication with St. Louis, and in a few weeks a broad gauge line will be open to Louisville.

We have also secured control of a majority of the Eastward business on Lake Erie, at Buffalo, by an arrangement with the Union Steamboat Company, who, in season of navigation, run a line of twenty-two steamboats from that port.

At the same time our relations with the Lake Shore and Michigan Southern Railroad, for exchange of business at Buffalo, Dunkirk and Cleveland are eminently satisfactory, and secured by mutual understanding and agreement, so that business connections and relations are secured with all Western roads, and we are placed on the same footing with them in that respect as other trunk lines.

Prior to my becoming the executive officer of the company, the Board of Directors had voted to give the Boston, Hartford and Erie Railroad Company substantial aid in the shape of a purchase of $5,000,000 of their first mortgage bonds. Since I have been President we have paid for and taken up the bonds. This road will be a very important connection, as it will open to us the heart of the manufacturing district of New England. It is expected that the line will be open for business during the year.

NARRAGANSETT STEAMSHIP COMPANY.

Our relations with New England have been further greatly improved and cemented during the past year by a close alliance with this popular line of finest inland steamers in the world, connecting us directly with Newport, Fall River, and Boston. Our business of cotton from Cincinnati and the Southwest to Fall River, which has more spindles than any other manufacturing town in this country, is large and rapidly increasing.

Before closing this report, I have a few words to say in regard to the so-called "Directors' bill," which was passed by the Legislature of this State last Winter, providing for the classification of the Directors of the several railway companies, and the election of but one-fifth of the whole board each year. This law was carefully considered in both branches of the State Legislature, and was passed with scarcely a dissenting vote. No action whatever was taken on it by the then existing Board of Directors of this Company—and they had a right to take advantage of it and extend their term of office—but it was left for the stockholders themselves to say whether they would accept the law or not. At the annual election, last October, it was accepted without a dissenting voice, and the present Board was elected by over 955,000 votes. In my judgment this is a wise law, and will secure to the property a responsible, experienced, and intelligent management, and be the means of preventing in the future the sudden changes in the policy of this magnificent railway peculiar to it in the past while it was a mere creature of Wall-st. speculation.

The litigation that has been forced on us from time to time has not been of our seeking. We have considered that we were put in charge of this great trust by the expressed choice and will of the stockholders, and we considered it to be our duty to them, after having accepted, to retain possession against any small minority until the stockholders themselves should express their pleasure for a change by the choice of another Board, and to manage the property as we might consider for the permanent good.

For the details of the operating expenses, &c., of the year, I refer to the annexed statement, made in the form required by the Legislature.

JAY GOULD, President.

Office Erie Railway Co., New York, Jan. 17, 1870.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, January 29, 1870.

Stock Exchange and Money Market.

The accumulation of Money both at bank and in private hands has been steadily progressing since our last. The city banks have made a further gain on their averages of over five millions in deposits, 2⅜ millions of legal tender notes, and nearly two millions of specie. Their deposits are now up to 207⅛ millions, as against 179⅛ millions at the beginning of the year, showing an increase of 28⅜ millions. Their reserve of legal tender notes is now 54⅝ millions, against about 45 millions, Jan. 1st. Their specie average is up to 39⅛ millions, against 28⅛ millions the last week in December. The loan and discount averages of the banks, are now 259⅛ millions, in last week of 1869 they were 251 millions. The offerings of money to the street houses, and during the week under review, have been unusually liberal. Call loan rates have been quoted down to from 3@6 per cent. At even these figures, there has been a less urgent inquiry for accommodation. National bank currency has been very abundant. The city banks have been embarrassed by the unusually heavy amounts of this currency in their vaults, and have been offering to make advances of it for short specific periods to the prominent street borrowers at merely nominal rates of interest, chiefly with a view to its distribution. There has been more favor shown to mercantile credits, and prime business paper has been in good demand at from 7@8 per cent. per annum. The U. S. Sub Treasury at this port lost 1⅛ millions of currency, and $\frac{3}{16}$th of a million of specie, during the week. Washington advices to Tuesday evening report the coin balance of the Treasury Department at 105 millions, including 51 millions on private deposit, and the currency balance at five millions.

The specie reserve of the city banks according to the latest return is $39,454,003, against $28,864,198 same time last year. The city bank deposits are now $207,479,823, against $197,101,163 week ending Jan. 23, 1869. The legal tender reserve amounts to $54,619,433, against $54,022,119 same time last year. The circulation now stands at $33,806,721, against $24,265,946 same time last year. The loans are now $259,592,756, against $264,954,619 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $88,361,485 a day, against a daily average of $99,455,614 the preceding week, and $98,861,686 the week ending with Jan. 9, 1870. The current week's exchanges average about 87 millions a day. The city banks, last week, reported a gain of $1,948,536 of specie, $5,083,492 of deposits, and $2,370,958 of legal tender notes. They increased their loans, $491,650; and reduced their circulation, $160,102.

National Bank notes to the amount of $216,680 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $320,135,461, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $20,389,851, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,899,151,) an actual circulation at this date, of $299,745,610. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,303,350; and for the public deposits, $18,941,000—making a total of $361,244,350. The Treasury Department last week redeemed and destroyed $559,100 of worn and mutilated fractional currency, and issued $539,672 of new.

The U. S. Sub-Treasury receipts, week ending with Jan. 23, were $5,355,863 in coin, (including $2,733,000 from customs duties,) and $3,464,195 in currency; payments, $5,541,632 in coin, (including $2,346,770 of coin interest,) and $4,652,109 in currency; balance at the close of the week, $81,430,918 (including $74,637,076, of coin, and $3,539,353 of currency,) against $83,893,435 at the close of the preceding week, showing a decrease of $2,462,517. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $597,861 in coin, (including $393,855 from customs,) and $347,672 in currency; payments, $319,124 in coin, (including $298,710 of coin interest,) and $359,312 in currency. On Tuesday, receipts, $684,923 in coin, (including $418,086 from customs,) and $422,011 in currency; and payments $209,718 in coin, (including $189,332 of coin interest,) and $309,837

in currency. The balance at the close of business on Tuesday stood at $79,126,407, (including $3,639,886 of currency, and $75,391,019 of coin,) against $80,547,078 a week previous; and $83,820,053 on Jan. 11, 1870.

Government revenues have been yielding more liberally, since our last. The excises have yielded about four millions; customs at the port of New York, $2,660,515, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $8,218,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 95 millions.

Gold has been more active. The speculative demand has been on a more confident basis. There has been a partial revival of the export inquiry. The range of the price has been from 120¾@121⅞, and the closing quotation on Wednesday was 121⅝. On Tuesday, the *Holsatia*, from this port, took out $1,240,000, chiefly in Mexican dollars. On Wednesday, Government disposed of a million of gold at from 121.65@121.70, including $916,500 to Messrs. Fisk & Hatch, in a single lot, at 121.65. The bids for the million reached an aggregate of seven and a quarter millions. By the *Arizona*, which arrived on Wednesday, $31,672 of specie came to hand from California.

The customs demand for Gold last week, averaged $455,500 a day; thus far, this week, it has averaged $405,970 a day, or equal to a weekly aggregate of $2,435,820. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $6,595; and since Jan. 1 1870, $270,377, against $169,905 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $71,801,481, against $67,155,724 in 1868–'69.

The exports of specie, from this port, last week, were $600,088, against $1,100,144 same week last year; total, since July 1, 1869, $18,001,141, against $23,841,268 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,346,770, and since July 1, 1869, $59,824,576, against $59,515,687 in 1868–'69.

Foreign Exchange has been in reduced supply and more general request at a fractional improvement in prices, closing buoyantly. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109¼, and on Paris to 5.20@5.16¾; sight bills on London to 109¾@109⅞, and on Paris to 5.15⅝c.@5.14⅜. The offering of produce bills has been on a moderate scale this week. The week's exports of domestic produce have been to the currency value of $2,696,806, making the total since July 1, 1869, $117,098,681, against $89,998,923 same time preceding fiscal year.

Government securities have been in more request, especially for home investment purposes, and prices have been quoted firmer. The offerings of bonds have been on a limited scale, as a rule. The main call from home purchasers has been for the later issues of the Five-twenties, the Ten forties, and the Currency Six per cents. Government bought in a million of Five-twenties on Thursday at about the market rate.

U. S. sixes of 1881 closed here buoyantly at 118@118¼; U. S. Five-twenties of 1862, 115⅞@116; U. S. Five twenties of 1864 at 115¾@116; U. S. Five-twenties of 1865 at 115¾@116; U. S. Five-twenties of 1865, consolidated, 114⅛@114⅝; U. S. Five-twenties of 1867, 114⅛@114⅜; U. S. Five-twenties of 1868, 114¾@114⅞; U. S. Ten-forties at 112¾@113; U. S. Six per cent. currency bonds, 111@111⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 12.	Jan. 19.	Jan. 26.
Consols	92⅝	92⅝	92⅛
U. S. 5-20's of 1862	87	86⅞	86⅞
U. S. 5-20s, 1865	86⅛	86¾	86¾
" 1867	85⅞	85¾	85¾
" 10-40s	84¾	84¾	84¼
Erie	17½	18	17¾
Ill. Central	103	104¾	103¼
At. and Gt. West	25	25¼	25½

State bonds have been in less favor, especially the Tennessee and North Carolina new sixes, which have been depressed in price.

Railway bonds have been more sought after, and have been generally much stronger in price. Central Pacific First Mortgage Bonds have advanced to 93¾@94, on a decidedly more active inquiry, largely on foreign account, with very few bonds offering at the going rates. The Western Pacific First Mortgage Loan was closed out on Wednesday afternoon, by the financial agents of the company, Messrs. Fisk & Hatch, who on that day disposed of the balance of the loan, which amounted to $168,000, mainly to buyers for foreign markets. The loan, which reached $2,735,000 all told, and which was brought on the market, about the middle of November, has been successfully negotiated in about sixty working days. The loan was disposed of in 302 lots, which averaged a little over nine thousand dollars each. The Union Pacific First Mortgages closed firmly on Wednesday at 83¾@84.

Railway and miscellaneous stocks have been more freely offered, and have been more variable in price, on a less confident and speculative movement.

At the auction sale of Scranton coal on Wednesday, 75,000 tons were disposed of at materially reduced prices, ranging from $3.87½@5, per ton of 2240 lbs., deliverable at Elizabethport, N. J.

Business in produce has been moderately active, since our last. Breadstuffs and Provisions have been depressed in price. Middling upland cotton closed buoyantly on Wednesday at 25⅝ cts. per lb. The stock of cotton now here is given at about 55,000 bales. The receipts at the port this week, have averaged about 4,100 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,597,200 bales, against 1,265,000 bales in 1868–'9; exports, same time 842,900 bales, against 662,600 bales same time in 1868–'9; stock on hand at latest dates, 469,500 bales, against 825,100 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 443 pkgs., against 517 pkgs., same time in 1869. From Boston, 104 pkgs., in 1870, against 801 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in moderate demand, at from 9@17c., per lb.; week's receipts, 4,999. Milch cows continue very dull, at $40@$100 each, receipts, 74. Veal calves in less request at from 8@13c. per lb.; receipts, 464. Sheep and lambs in fair demand at from 4½@8c., and 6½@8½c. per lb.; receipts, 28,352 Swine in moderate request at 9¼@9¾c. per lb., all live weight; receipts, 10,221.

Foreign merchandise has been rather quiet, but without marked changes in values.

Ocean freights have been less active and irregular. For Liverpool we quote flour at 1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 5⅛d.@6d. by sail, and 5d.@5½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 545.

The balance in the Sub-Treasury on Wednesday was $79,975,358 54.

The New York exports, exclusive of specie, for the week ending Jan. 25, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$3,080,903	$2,696,806
Previously reported	7,991,016	8,156,050
Since Jan. 1	$11,071,919	$10,852,856

The imports for the week ending January 22, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,520,259	$1,917,159
Gen. merchandise	3,550,077	8,129,245
Total for the week	$6,070,336	$5,046,404
Previously reported	9,285,851	8,910,413
Since January 1	$15,356,187	$13,956,817

Tanner, Walker & McAnerney.

We invite the attention of our readers to the advertisement of Messrs. TANNER, WALKER & MCANERNEY. The familiar name of JOHN F. TANNER in this firm would seem to us a guarantee for their success.

Mr. TANNER has been for over 30 years connected with the Tredegar Iron Works, of Richmond, Va., and is too well known to the Iron and Railroad men of this country for us to introduce him. We wish Mr. TANNER and his firm every success.

☞ The card on last page of cover of Messrs. GLENDENNING, DAVIS & AMORY, New York, and GLENDENNING, DAVIS & Co, Philadelphia, will attract attention. These parties conduct a banking and brokerage business, receive money on deposit subject to check at sight allowing interest on standing and temporary balances, and make collections on all accessible points. They are constantly represented at the Government, Gold and Stock Exchanges of both cities, and are thus enabled to transact all business entrusted to them with exactness and promptitude.

☞ The Little Rock and Fort Smith Railroad Company have prepared $3,500,000 of first mortgage bonds, according to agreement with Fisher & Co., Contractors, to be delivered to them as the work progresses. The bonds are of $1,000 each, principal and interest payable in gold. Interest six per cent., payable semi-annually in Boston, where the financial agency of the company has its office.

☞ The location of the Waterbury and Watertown (Ct.) Railroad has been accepted by the railroad commissioners. The road will be put under contract immediately.

☞ The contract for the construction of the Lafayette, Bloomington and Muncie Railroad, from Lafayette, Indiana, to the Illinois State Line, has been awarded to A. B. Culver & Co.

☞ The section of the San Antonio and Mexican Gulf Railroad lying between Lavaca and Victoria, will be sold by the Trustees at Indianola, Texas, on the 10th of March.

☞ The total production of coal in the Cumberland (Md.) region during 1869, was 1,182,669 tons, showing an increase of 552,226 tons over 1868.

☞ The Valley Railroad, 14 miles in length, between Great Bend, Pa., and Binghamton, N. Y., has been completed, and an engine passed over it on the 12th inst.

Chicago, Danville and Vincennes Railroad.

Before this time next year—perhaps before next harvest—a new railroad will be in operation from Chicago to Danville, which will give this city a continuous air line road to Evansville, on the Ohio River, which is eighty-five miles nearer to Chicago than Cairo is by the Illinois Central.

Starting at Chicago this new road runs in a southerly direction near the Indiana line through an old and wealthy agricultural portion of the State. For much of its course the road pursues the "Old Hubbard Trail," which was long since skirted with a line of thriving towns and villages. More than one-third of its route is directly over vast fields of the best coal in Illinois, and where it crosses into Indiana it passes through extensive deposits of iron ore. It also brings within a few hours' ride of Chicago the celebrated Brazil coalfields of Indiana, which furnish the best coal for the manufacture of iron yet discovered in the West. * * * * * *

We can see no reason for supposing otherwise than that this road, when completed to Danville, and connected with the Terre Haute and Evansville road, making, in fact, one continuous line from Chicago to Evansville of 280 miles in length, will pour a trade into this city little less than that carried by the Illinois Central. It passes through equally as good a country, and very little of the products of the lower 220 miles of country it traverses and controls have ever reached this market. The coal and iron business of the road must be heavy from the start, and a large trade in grain, cotton, hogs and fruit will seek the Chicago market, to be exchanged for lumber, merchandise, groceries, building materials, salt fish, furniture, etc. Our business men have been asleep to the coming advantages of this great and valuable artery of trade running along the boundary line between Illinois and Indiana, from Lake Michigan to the Ohio River. It is time they had wakened up and were making their preparations to transact the new business which in a few months will be pouring into their hands.—*Chicago Tribune, Dec.* 27.

☞ The route of the Connecticut Valley Railroad, between Rocky Hill and Chester Cove, a distance of over 22 miles, has been definitely located. This is about half the entire distance from Hartford to tide water. It is expected that the company will be ready to receive proposals for the construction of the whole line in a few days—the determination being to have the cars running before the expiration of the present year.

☞ The contract for building the railroad from Springfield to Beardstown has been let to Cutler, Dodge & Co., who are to finish it within the year. They are building the Illinois Southeastern and the Pana and Springfield roads.

☞ The Michigan Air Line R. R. Co. are in want of 300,000 cross ties, viz: between Jackson and Homer, 53,000; between Homer and Union City, 53,000; between Union City and Three Rivers, 121,000; between Three Rivers and Niles, 73,000.

☞ The Detroit and Milwaukee Railroad was not included in the contract recently made between the Michigan Central and Great Western Railway Co.

Journal of Railroad Law.

RAILROAD COMPANIES NOT BOUND TO KEEP OPEN THEIR TICKET OFFICE BEYOND THE TIME FIXED FOR THE DEPARTURE OF TRAINS—PRINCIPLE UPON WHICH THEY MAY DISCRIMINATE FARES.

The facts necessary to an understanding of the questions in the late case of The St. Louis, Alton and Terre Haute Railroad Company *vs.* South (48 Ill., p. 176,) are fully and clearly stated in the following opinion by

BREESE, J.—The principal questions in the cause arise upon the instructions given on behalf of the plaintiff, and on those refused as asked by the defendants, the appellants here, and on the measure and amount of damages, the former of which we will notice.

The first instruction asked by the plaintiff, and given, was this:

"It was the duty of the St. Louis, Alton and Terre Haute Railroad Company to furnish a convenient and accessible place for the sale of tickets for passengers, with a competent person in attendance ready to sell them, which should be open and accessible to all passengers for a reasonable time before the departure of each train, and up to the time of its actual departure; and if the jury believe from the evidence, that the plaintiff, by and through Allison, made application at the ticket office of the St. Louis, Alton and Terre Haute Railroad Company, at Mattoon, for a ticket from that place to Charleston, at any time within ten or fifteen minutes before the actual departure of its train, and he was unable to get a ticket in consequence of the ticket office being closed, then the St. Louis, Alton and Terre Haute Railroad Company had no right to charge him upon the train any more than usual ticket price between Mattoon and Charleston."

The first instruction asked on behalf of the defendants and refused, was as follows:

"That if they find from the evidence that the defendant, St. Louis, Alton and Terre Haute Railroad Company, has a convenient and accessible office, supplied with and for the sale of tickets in Mattoon; and on the evening of the alleged trespass the same was open, with a competent person in attendance to sell tickets for an hour before and up to the expiration of the time fixed by public notice for the departure of the train on which plaintiff took passage; that the plaintiff got upon said train to travel from Mattoon to Charleston without procuring a ticket and refused to pay, or cause to be paid, to the conductor of said train the amount of fare or passage money required by the regular tariff of said company for passengers who fail to produce tickets, and that by reason of such failure of plaintiff to pay or cause to be paid such fare or passage money he was expelled from the cars of said company by the servants or employees of said company at a regular station on said railroad, then in that case the jury must find the defendants not guilty."

The point of difference is obvious. While the instruction for the plaintiff requires the ticket office to be kept open up to the time "of the actual departure of the train," that for the defendant limits that duty "to the expiration of the time fixed by public notice," for the departure of the train.

It is insisted by the appellee, that the law is as declared in the instruction given in his behalf, and has been so held by this Court in the case of the Chicago, Burlington and Quincy Railroad Company *vs.* Parks, 18 Ill., 460, and reiterated in St. Louis, Alton and Chicago Railroad Company *vs.* Dalley, 19 id., 364, and that the instruction is an exact transcript of the language of this Court, in the cases cited.

In this the counsel is not mistaken. In the case first cited, this Court said: "To justify a railroad company in making a discrimination in the fare against the passenger who neglects to purchase a ticket at the company's office, the company must see to it that the fault was not that of its own agent instead of the passenger. To justify this discrimination, every reasonable and proper facility must be afforded to the passenger to procure his ticket. They must furnish a convenient and accessible place for the sale of tickets, with a competent person in attendance ready to sell them, which should be open and accessible to all passengers for a reasonable time before the departure of each train, and up to the time of its actual departure, so that it shall really be a case of neglect and not of necessity on the part of the passenger, and not the fault of the company." Further on, in the next paragraph but one, the Court call these remarks "suggestions," and give the reason why they were made, the point to which they apply not being in the case before them. The controversy there was this: Parks, an attorney-at-law, residing at Aurora, in Kane County, took the train there, without purchasing a ticket, for Batavia, the nearest point to Genoa, where the Court was held, and which Parks was going to attend. He paid the extra fare required of those who pay on the car from Aurora to Batavia. At the latter place he changed his mind, and, as it was wet, disagreeable weather, he concluded, without purchasing a ticket to proceed on to Junction, another station the road. The ticket fare from Batavia to Junction was twenty cents, which Parks offered to pay to the conductor, but he refused it, demanding under his instructions an additional five cents, which Parks refusing to pay, the conductor put him off the train. This was the case in which the "suggestions" above quoted were made. The Court, and the learned Judge, afterward so long the honored Chief Justice of the Court, who delivered the opinion, were well aware of the fact that the time of the arrival and departure of railroad trains was fixed, and made notorious by publication and notice in every conceivable mode, so that it may be safely asserted, the business and traveling public, all those whose pursuits required that mode of conveyance, and especially those living in the towns through which railroads pass, were perfectly familiar with the fact, and almost any inhabitant, if inquired of, could tell to a minute when any particular train was due at their town, and when it would leave.

In speaking, then, of the time of the actual departure of a train, up to which the ticket office must be kept open, the Court, unquestionably, meant to be understood as referring to the published fixed time which everybody knew. The presumption being that trains will arrive and depart on their schedule time, which time is notorious, no rule shall be established that should apply, without much hardship and great inconvenience, to the departure of trains not on time. We do not recognize any right in any person to apply at a railroad ticket office after the time fixed and published for the departure of a train, and demand the same rights and privileges accorded to those who come at the proper time for their tickets. It is well known that trains are sometimes delayed for hours, and that it is unavoidable, would it not be going too far to require the companies controlling them to keep an agent at his post during all this delayed time? Tickets are not usually applied for by passengers after the time fixed for the departure of a train. The companies have a right to presume they will not be applied for after that time, and therefore their agents can close the ticket office and go about their other business, of which they have an abundance, if we are to judge from the number of trains upon our railroads. An agent at a railroad station who sells tickets is, not only "ticket agent," but he is the "station agent," and has much to do with freight and other matters requiring care and attention. It would be unreasonable to require him to neglect these matters, and confine him within reach of the small opening at which the tickets are delivered, waiting for a delayed train, and not a passenger applying for a ticket. It is sufficient for the company that a reasonable opportunity should be afforded passengers to procure tickets for the train he designs to go upon, and that reasonable opportunity is furnished by keeping a convenient office open under the charge of a competent agent, up to the advertised time fixed for the departure of the train. The facts in this case show that the ticket office was open an hour before the train left, and continued open up to the time fixed for its departure. The plaintiff, coming after that time, took his chances to get a seat in the car, and, having no ticket he was bound to pay car fare.

We are of opinion the Court should have refused the first instruction for the plaintiff, and given the first asked by defendants, the company not being obliged to keep the ticket office open beyond the hour fixed by its published rules for the departure of a train.

These being the views we entertain of the law of this case, the modification of the defendant's eighth instruction was also erroneous, as by that the office is required to be kept open up to the time of the actual departure of the train.

All that can be demanded of a railroad company is, that a reasonable opportunity shall be afforded the public to purchase tickets. If parties will not avail of it, it is their own fault, and if they get upon a train without a ticket, they must be subject to pay the car fare, or on refusal, to be ejected from the car. In Parks' case, this Court said the right to charge discriminating fares was just and reasonable, but it depends on the fact that a reasonable opportunity has been given to obtain tickets at the lowest rate of fare. This opportunity was afforded the appellee.

A minor point as to the ruling of the Court on the motion and affidavit of defendant's counsel to rule the plaintiff to give security for costs on the ground of his insolvency, has been raised.

The bill of exceptions shows this motion was made, and the affidavit is incorporated into it.

This motion was denied by the Court.

The statute provides "If in any case the Court shall be satisfied that any plaintiff is unable to pay the costs of suit, or that he is so unsettled as

to endanger the officers of the Court with respect to their legal demands, it shall be the duty of the Court, on motion of the defendant or any officer of the Court to rule the plaintiff, on or before a day named, to give security for the payment of costs in such suit." Scates' Comp., 24.

The affidavit states that affiant had just learned that the plaintiff was insolvent, and at the time the motion was made the record shows the issue had been joined, and the cause had been called for trial. This court said, in Selby *vs.* Hutchinson, 4 Gilm., 319, "that this motion was addressed to the discretion of the Court, and the decision upon it could not be assigned for error." We think the motion was too late.

Another objection is made by appellant to the instruction to the jury, that they could assess damages severally against the defendants. The instruction was erroneous, but the error was cured by the entry of a *nolle prosequi* before judgment upon the verdict against Austin and Lee, and taking judgment against the company alone. 1 Tidd's, Pr., 682. We cannot see that this instruction, wrong as it was, prejudiced the appellant in any way.

The judgment of the Circuit Court is reversed, and the cause remanded, with directions to award a *venire de novo*.

Judgment reversed.

Titanic Steel.

During the past eighteen months or two years titanic steel has been rapidly gaining favor amongst those who have previously found none but the highest price steels suitable to their requirements, and as our South Wales Correspondent last week mentioned that the Titanic Steel and Iron Company are now considerably extending their works at Coleford, it may be concluded that the titanic steel is now very generally recognized as economic and valuable. The fact of the company's works having been located in Gloucestershire instead of Sheffield has, no doubt, placed them at a disadvantage as regards some portion of the home trade; but, on the other hand, they have secured freedom from Sheffield Unionism, and succeeded in gradually opening up markets in places where Sheffield prices for first class steel, such as the titanic steel undoubtedly is, would be altogether inadmissible. The quality sent out by the company, under the name of "Mushet's special steel," which requires no hardening, is perhaps, one of the finest tool steels made, but it requires to be worked exactly according to directions, in order to obtain the best results. Considering the short time the steel has been in the market many tons of it have been sold even in this country, but, judging from the reception it has received elsewhere, it is probable that the home trade will shortly be the smaller. Amongst the largest English consumers are Messrs. John Fowler & Co., of the Steam Plough Works, Leeds, and they express themselves perfectly satisfied with the metal. It has been for some time used at the works of the Cheltenham Railway Carriage Company for wheel-turning, and is found to possess considerable advantages over the "best cast steel" tools they had previously been using. At the works of Messrs. C. Mitchell & Co., at Newcastle-on-Tyne, the steel has given the greatest satisfaction—in fact, the manager writes, the quantity of work done by the tools from this steel quite surprised them. They have not experienced any difficulty in working to the printed instructions, and are using it entirely for lathe tools and drills for countersinking. That this "Mushet's special" steel will come largely into competition with "best cast" cannot be doubted, and workmen generally will be well satisfied with the change.—*London Mining Journal, Dec.* 11.

Bridges.

Concurrent action has been taken by the Board of Aldermen and Council of the City of Milwaukee, Wis., authorizing the Board of Public Works "to advertise for proposals for building a centre pier, a centre protection pier, bridge seats, and approaches, for a bridge across the Milwaukee River at State street, according to the plans of the City Engineer now in their office; also for proposals for building a wooden Howe truss swing bridge with turn table; also for proposals for iron bridges with turn tables," and the "Joint Committee on Bridges, the Board of Public Works, and the City Engineer, shall adopt such plans and bids as in their opinion is for the best interests of the city, reporting such award to the Mayor and Common Council for approval, the Council reserving the right to reject any and all bids." It is also seriously contemplated to build a bridge at the foot of Milwaukee street, across the Milwaukee River.

Rome, Watertown and Ogdensburg R. R.

In noticing the recent accident on this road caused by a broken rail, by which Mr. Taylor of this city lost his life, it is but just to state, as we are credibly informed is the fact, that during the whole term of 18 years since the road has been in operation this is the first instance in which the life of any passenger has been lost while being conveyed in the coaches of the company. For a road of 220 miles in length, having during the time stated transported many millions of passengers, this must be regarded a most excellent record.

☞ The London *Mining Journal* of December 4, says: "The Forest Steel Works, at Coleford, belonging to the Titanic Steel and Iron Company, are being enlarged. The "Mushet's Special" steel, which was first introduced some 18 months since, has come into high favor as a tool steel, and is found to be very economic. It requires no hardening, and in fashioning it the handling somewhat differs from ordinary steels; but, by attention to very simple rules, admirable results are obtained, and the labor to the workman is certainly not greater."

☞ The number of miles run by the Baltimore City Passenger Railway in 1869, was 1,752,000; the number of passengers carried, was 11,385,464, being an increase over the preceding year of 1,185,000; the number of passengers carried to each mile run was 6. The amount paid to the city during the year as park tax, was $104,348 38. The number of horses used was 560, and the average number of cars run daily was 75.

☞ Many years ago the State of South Carolina endorsed the bonds of the South Carolina Railroad Company to the amount of £2,000,000 sterling. These bonds have matured, and their payment is provided for. The guarantee being no longer required, we learn that in accordance with the wishes of the company the Legislature will repeal the old Act, and thus arrange for the surrender and canceling of the old bonds.

☞ The first twenty miles of the South Haven Railroad, from Kalamazoo to Pine Grove, have been completed.

☞ Montpelier, Vt., has subscribed over $250,000 to the Montpelier and Wells River Railroad.

THE

First Mortgage Bonds

OF THE

CHICAGO, DANVILLE & VINCENNES RAILROAD.

Total amount to be issued	$2,500,000
Capital stock paid in	2,100,000
Estimated cost of road (140 miles)	4,500,000
Estimated earnings per annum	2,639,306
Net earnings per annum	879,768
Interest on the loan per annum	175,000
Amount of bonds per mile of road	18,000
Amount of interest per mile	1,260
Amount of net earnings per mile	6,284

The Bonds follow the completion of the Road—have the Union Trust Company of N. Y., as their Official Register and Transfer Agent—and are sold at present at 95 and accrued interest.

They bear examination and comparison, better, it is believed, than any other now before the public, in the fixed and unchangeable elements of *Safety, Security and Profit.*

They bear good interest—Seven per cent. Gold for forty years—and are secured by a *Sinking Fund*, and First Mortgage upon the road, its outfit, and net income, the Franchises, and all present and future acquired property of the Company.

They depend upon no new or half-settled territory for business to pay their interest, but upon an old, well settled, and productive country;—assuming that a railroad *built* through the heart of such a region offers better security for both *Interest* and *Principal* than a road *to be built* through the most highly extolled wilderness or sparsely settled territory.

This Railroad possesses special advantages, in running into and out of the City of Chicago, an important Railroad and Commercial Center; in running through a line of villages and old farming settlements in the richest portion of the State of Illinois: in running near to deposits of Iron Ore of great extent and value, and over broad fields of the best coal in the State—which mining interests are its monopoly. And besides the local and other business thus assured, there will be attracted to this road the considerable traffic already springing up "From the Lakes to the Gulf;" as with its Southern Connections it forms a Trunk Line 45 miles shorter than any other route from Chicago to Nashville.

These Bonds are therefore based upon a Realty and a Business that a few years must inevitably double—and competent judges say treble—in value.

Governments selling while the price is high pay well if put into these Bonds, and Trust or Estate Funds can be put into NOTHING BETTER.

Pamphlets, with Maps, &c., on hand for distribution.

Bonds may be had directly of us, or of our Agents.

W. BAILEY LANG & CO., Merchants,
54 Cliff Street, New York,
Agents for the sale of the Bonds.

☞ The directors and officers of the Frederick and Pennsylvania Line Railroad for 1870, are as follows: President, John Loats; Directors, Dr. Rinedollar, Captain Eichelberger, John Sifford, Lewis Bruner, Wm. S. Bantz; Treasurer, David J. Markey; Secretary, James McSherry. This road is making steady progress, and will doubtless be completed by next fall.

☞ The recognized funded debt of the State of Minnesota, as stated in the Message of the Governor, is $350,000. On the 1st of January, 1867, there were only 315 miles of railroad in the State; now there are 783 miles completed. The Governor recommends that 500,000 acres of the internal improvement lands be appropriated to pay the old railroad bonds.

☞ Plymouth County Railroad, extending from Wallaston Station on the Old Colony and Newport Railroad to South Scituate, 16 miles, will be constructed next Summer, and be in running order by September 1. The estimated cost of building and equipping the road is $400,000.

New Law Books.

REDFIELD'S
Leading American Railway Cases.

Leading Cases and Opinions upon most of the important questions involved in the Law of Railways, arranged according to subjects, with extensive Notes and References to the late Decisions. By ISAAC F. REDFIELD, LL.D. 8vo. $7.50.

Redfield on Railways.

Fourth Edition.

The Law of Railways; embracing Corporations, Eminent Domain, Contracts, Common Carriers of Goods and Passengers, Constitutional Law, Investments, Telegraph Companies, &c., &c., By ISAAC F. REDFIELD, LL.D., Chief-Justice of Vermont. Fourth Edition, greatly enlarged. 2 vols. 8 vo. $15.00.

In this edition the topic of COMMON CARRIERS and TELEGRAPH COMPANIES form complete Treatises. In addition to these the work contains Compact Treatises on CORPORATIONS; EMINENT DOMAIN; MANDAMUS; CONTRACTS FOR CONSTRUCTION; CERTIORARI; QUO WARRANTO; EQUITY JURISDICTION; CONSTITUTIONAL QUESTIONS affecting Legislative Grants; INVESTMENTS, STOCKS, MORTGAGES, POLICE, AMALGAMATION, &c., as well as all other matters in the law more exclusively affecting Railways.

INTEREST ON CITY STOCKS.—The interest on the Bonds and Stocks of the Corporation of the City of New York, due February 1st, 1870, will be paid on that day, by PETER B. SWEENY, Esq., Chamberlain of the City, at his office, in the New Court House.

The transfer books will be closed TUESDAY, January 4, 1870.

RICHARD B. CONNOLLY, Comptroller.
DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, NEW YORK, Dec. 30, 1869. 4t2

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, January 4, 1870. A dividend of FIVE PER CENT. in cash, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 1st day of February next, to the holders of full paid shares registered at the close of the seventeenth day of January instant, after which date and until the fifth day of February next, the transfer books will be closed.

THOMAS E. WALKER,
4t2 Treasurer.

Locked Safety Valves.

TO

MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 24th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

GEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

Notice to Contractors.

CHESAPEAKE AND OHIO RAILROAD,

SEALED PROPOSALS will be received at the Engineer's office at Charleston, W. Va., until 12 M. March 1, 1870, for the GRADUATION, MASONRY and the SUPERSTRUCTURE OF BRIDGES on the Chesapeake and Ohio Railroad between the Falls of Kanawha and the Ohio River, including THREE MILLIONS CUBIC YARDS OF EXCAVATION, and SEVENTY THOUSAND CUBIC YARDS OF MASONRY.

Also, at the Engineer's office at Richmond, Va., until 12 M. March 10, 1870, for several heavy sections east of the Falls of Kanawha, including the unfinished work near Millboro', and that eight miles east of the White Sulphur Springs, the Great Bend tunnel, 6,400 feet; Lewis tunnel, 3,800 feet; five other tunnels from 500 to 1,700 feet long; several sections in rock cutting; and about 70,000 cubic yards of masonry.

Profiles and specifications can be found at the office of the company, 54 William street, New York, on and after February 1; at Richmond, Va., and at Charleston, W. Va., on and after January 15, 1870. The company reserves the right to reject any or all the bids offered, and to make private contracts for the work.

Information as to time, etc., will be given at the letting. For further information apply to H. D. Whitcomb, Chief Engineer, Richmond, Va., or to W. A. Kuper, Principal Assistant Engineer, Charleston, West Virginia.

C. P. HUNTINGTON,
4t4 President.

TO BRIDGE BUILDERS.

OFFICE OF SOUTH STREET BRIDGE COMMISSION, No. 224 South FIFTH Street.
PHILADELPHIA, Jan. 17, 1870.

SEALED PROPOSALS for erecting a bridge over the River Schuylkill at South street will be received at the office of the Commission, in the Department of Surveys, No. 224 South FIFTH Street, until 12 o'clock M. of the FIRST DAY OF MARCH, 1870, for the construction of a wrought iron drawbridge, with Murphy's modification of the Pratt truss. To have cast iron piers in river, and stone abutments, with approaches of retaining walls; arches of brick, and iron I girders, as described in the specification. The entire length of structure to be 2,419 feet, the truss spans to be 185 feet each, with pivot draw, giving an opening of 77 feet on each side.

The proposal to be for an aggregate bid, to be accompanied by a bond with two approved sureties to an amount of $50,000. Fifteen per cent. to be retained as the work proceeds until the same, inclusive of the $50,000 noted in bond, shall amount to fifteen per cent. of the contract price, after which the current estimates will be paid in full.

Plans may be seen and specifications obtained at the office of the Commission on and after the 29th instant.

MOSES A. DROPSIE,
4t4 President of the Commission.

Notice to Railroad Companies and Contractors.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

TAYLOR MFG. CO.,

Exclusive Manufacturers, 73 Beekman St., N. Y.

PACIFIC MAIL
Steamship Company's

THROUGH LINE TO

California and China.

FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$125 to $170.	**$60.**

according to location of berth.

These rates include berths, board and all necessaries for the trip.

Steamers of the above line leave Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON 5TH AND 21ST OF EACH MONTH,

except when those days fall on Sunday, then the day previous.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Feb. 5, ARIZONA, Capt. Maury, connecting with COLORADO, Capt. Farnsworth.

Steamer JAPAN, will leave San Francisco March 1, 1870, for China and Japan.

NOTICE TO SHIPPERS.

For reduced rates of freight apply on wharf. Freight for steamer ARIZONA, received until 4 P. M. on FRIDAY, Feb. 4. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

ENVELOPES.

SAMUEL RAYNOR & CO.,

115 & 117 William street,

New York.

Manufacture every style of envelope, from the smallest drug size to the large t official; and any size, pattern, shape, or quality wanted for railroad companies, express and insurance companies, banks, bankers and brokers. All well made and gummed. Samples given when requested.

STAINED GLASS.

The Chinese Labor Question.

Will our influx of Chinese laborers contribute to local or national prosperity? This is a question carefully considered and satisfactorily answered in a recent number of the *Overland Monthly* by an able writer whose views, based on the results of observation and experience of the Chinese immigrants already engaged in many branches of productive industry on the Pacific Coast, are both interesting and instructive. Events now concur in placing the people of the United States as prominent customers in the labor markets of the world, seeking accessions of cheap muscular labor. Opinions stated in the late convention at Memphis have met singular unanimity of approval at the South; that our present labor system needs reorganization; that comparatively few women now labor in the fields; that 3,000,000 of negro laborers before the war are now reduced to scarcely a million available field force, and pending some change or until a substitute from abroad is supplied, enterprise throughout the cotton, sugar, rice and tobacco growing districts must languish. A want seems to exist, and for purposes of investigation these statements may be admitted as facts. How shall it be supplied? As payment of interest and principal of our national debt, foreign exchanges, and consequent extension of commerce now mainly depend on our ability to support cotton—which product, in time, depends largely on supplies of labor—the subject becomes one of national importance.

In the opinion of the writer above referred to, the Chinese already here have come about fast enough for gradual assimilation to our wants. They quickly catch the spirit of American enterprise and profit by its elevating influences. As workmen on the Pacific Railroad, they gave essential and substantial aid—laboring through deep snows and throughout the coldest weather, with undiminished energy; showing ability to live in even extreme sections of our country, although our Southern States present a climate more nearly allied to that portion of China from which most of our immigration is drawn. To tempt Chinese laborers and induce them into our cotton States, in sufficient numbers to further a higher prosperity, requires skillful management. Chinese merchants, entitled to esteem and confidence, have lately returned to California from a prospecting tour to the Atlantic Coast, and report favorably on all they saw and learned. Pioneer gangs have lately started for places in the Eastern States when there labor is represented as almost a pressing necessity. These, after a short period in a country where all is new to them, write back to their friends accounts, favorable or otherwise, of the locality, people and occupation. Thus by degrees through these and similar means an immigration will be established. They will come freely when every letter written home unites in confirming the encouraging assertions of those who visit China personally to start them forward.

Of these Chinese laborers themselves we are told that, when poor and in debt, live save, and thrive on wages far below those paid our laborers; but experience has shown that, after they have accumulated a little money, they become more free in the distribution of their earnings, purchasing freely what will most conduce to their comfort. Human nature is singularly alike the world over. It is natural to use the gains our labor has brought us. As a people they are neat, orderly and skillful, not readily excelled in handicraft, frugal, industrious, teachable, patient and intelligent. They make excellent house servants, and may be trained to cook skillfully in any style. When taught by French Cooks it is difficult to excel them. With an explanation thoroughly understood they need no further instruction or correction. They may occasionally be sullen but never stupid. They are not given to excessive hilarity, but are quiet, peaceful, and persistent. Their manipulation is careful, and often extraordinary. They would make dextrous cotton pickers, never bungling ones. The builders of the Central and Union Pacific Railroads confirm the above statements regarding Chinese laborers, and monthly accounts of the several gangs during more than a year past fully establish many of these facts. Laborers generally drew from 35 to 40 per cent. of their $35 monthly wages and supplies from the companies' stores. A balance, ranging from 50 to 65 per cent. was paid to them monthly in coin. A large portion of this was spent in outside stores along the line, more particularly after repaying their advances for passage, and thus making themselves free from debt. It is the opinion of well informed Chinese merchants, who are close observers, that the annual savings remitted to China by the 65,000 now on the Pacific Coast do not exceed $30 to each man, against which, as a State, California has the profit on 23,725,000 days labor, and all permanent industries developed through their presence, which afford further employment to white laborers. A very large portion of even this sum sent to China generally goes to assist in bringing more of them to this country, and contributes largely to support American shipping on the Pacific. Eight out of every ten ships plying between California and China are American, Chinese merchants having usually given them preference; even when compelled to pay war risks, which, with all their other insurances, they gave to our insurance companies. During the war these merchants gave freely to the Sanitary fund. They have no desire for suffrage, and study to keep out of politics of which they know nothing and care less. All re-

turn to China, after about five years—a majority coming back, however, bringing others with them. If they die abroad, their bodies are carefully preserved, taken to their native place and buried in line with their ancestors. A people possessing these characteristics, and whose value as laborers is already proved by the efficient service rendered by them in carrying out one of our grandest schemes of internal improvement and development, should be welcomed to our shores, and only an illiberal and narrow-minded policy would seek to exclude them on any grounds.

Reports are current that the government, influenced by memorials against the coolie trade, has instructed its officers to inform all Chinese immigran s arriving, that no law exists to enforce the fulfillment of contracts for labor made abroad; hence, until Congressional legislation indicates a policy, no one will be likely to come under positive engagements to fill orders for laborers under contract. If planters, by association or otherwise, organize proper means for bringing them from China, the South may be supplied with laborers under contracts to work until their advance shall be reimbursed to the planter at $8 to $12 per month, and found, and laborers will be better off here than at home. Actual expenses for transportation from the mountain districts of China to any part of the South, with outfits, taxes, passage, provisions, commissions and wages advanced, need not exceed $200 per head. Customary provisions daily required for each man are two pounds meat, (pork preferred) one quarter pound fish, some vegetables, tea and a little sweet oil for cooking. Parties contemplate contracts running until advances are paid, not exceeding three years, if without legal objection. Advances necessarily incurred in bringing impecunious laborers to America may thus be repaid to the planter within eighteen months or two years, and all wages after that time be realized to the laborer. Planters contracting for field hands to be brought from China should deposit their securities for prompt payment of expenses incurred in obtaining them. Local demand in California for Chinese laborers at $35, gold, per month is now so urgent for railroad construction and other purposes and the labor so satisfactory, that all arriving are immediately taken for employment on the West coast. Few now in California could be transferred to Eastern or Southern States. Emigration circulars printed in Chinese should be extensively circulated in China if we would secure the better classes from the interior. Agitation may hasten their coming, but solid patient labor will be required to accomplish permanent results. Their coming will stimulate industries and enable us to assume a position of greater importance among the producing countries of the world. Current estimates present our present average cotton crop at 2,500,000 bales of 450 lbs. each, worth at twenty cents per pound, $225,000,000. Before the war we produced 5,500,000 bales. With Chinese laborers we can readily procure 10,000,000 bales, and add proportionately to our national wealth and credit. The policy of introducing a new race differing in features, tastes and religion, into our country, is a branch of this problem the solution of which should be referred to the best talent among political economists. Emigration should not flow in solitary channels. If we encourage the Chinese in coming we should also stimulate a constant Anglo-Saxon immigration. The Minnesota State Immigration Agent after showing the advantages of his State to the Swedes, writes, promising to forward 75,000 Scandanavians this year. This example, repeated by other States, constitutes the movements by which civilization advances and developes, while isolated California is debating whether to shake off her lethargy and awaken from her dreams of gold. European immigration made New York the city she is to-day, yet most of it only passed through her, as the Chinese will through San Francisco.

Adjustable Gauge Railway Cars.

The Patent Adjustable Gauge Railway Cars, are adapted to all widths of gauge, and are extensively in use by the "National Despatch Line." This company have had two hundred of these cars in use during the past twelve months, between Boston, Chicago and St. Louis, working most satisfactorily, and the owners of the patent are building three hundred more to meet the present demand. The cars are owned by an independent car company, who lease them to the railroad companies forming the "National Despatch Line," at a certain rate per mile.

By such an arrangement the Boston, Hartford and Erie road might obtain the use of one or two thousand coal cars, to be ready to commence running upon the completion and opening of the road. Several thousand coal cars could be fully occupied by this road in supplying coal to the manufacturing cities and towns between Fishkill, Boston and other places in the New England States, and thus largely increase their receipts at once, without the expenditure of any capital for car stock. This traffic of itself would produce earnings enough to go far towards paying the interest on the entire debt of the road, besides giving the public coal at greatly reduced prices, both summer and winter. This is exactly what is wanted.

In an address by President Potter of the Grand Trunk line to the English stockholders, he spoke very highly of the great value of the adjustable cars to the wants of the road and to those of the public. He said he saw, while on a visit to America, those cars at Sarnia and Montreal, and the manner of changing gauge; and at Chicago he had conversation with shippers and purchasers and found that they approved them beyond anything, and were willing to give ten per cent. extra for their use rather than to have two shiftings of gauge, breakings of bulk and shiftings of cargo, which might be spoiled in the process. These adjustable cars were in use on the Grand Trunk, the Vermont Central, the Rutland, the New Hampshire and the Boston and Lowell Railroads, over a distance of 1,560 miles. The Grand Trunk had 580 of these cars, and were in contract for 300 more.

One advantage of these cars is that important lines would not only have their own cars employed but also those of other lines, which could be made to fit them by the adjustable process. They could thus accommodate whatever offered; whereas, if dependent on their own cars, their facilities would necessarily have to be confined to their use. The exceptional gauge disadvantages are all obviated by the use of the adjustable cars. From Chicago to Boston flour and grain could be forwarded directly without change of cars, and there would be always freight back in the shape of boots and shoes, dry goods, groceries and general merchandise.

All the roads which have termini in Boston will, no doubt, profit by the adjustable car, for they have all connection with the Grand Junction Company, whose wharves and storage facilities at East Boston are sufficient for any possible present purpose. Coal and grain elevators are soon to be erected there, and we have every reason to believe that in course of a year Boston will furnish the most favorable shipping facilities for the great West, and through the use of the adjustable cars, the most prompt return advantages to that great agricultural and commercial mart.—*Boston Evening Times.*.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1868 and 1869, were as follows:

	1868.	1869.

Leaving balance to credit of revenue, October 31, 1869		$434,786 50

The passenger receipts were larger than those of 1868, by a little more than four per cent. The receipts from freight, express, &c., were larger than those from same sources in the previous year, by over twelve per cent. The gross earnings from all sources were larger than those of the year 1868, by over seven per cent. The operating expenses as compared with those of the previous year were larger by over thirteen per cent. This excess is found wholly in the item of road repairs. With the exception of this item, the operating expenses were less than in 1868. The report says:

There was an unusually large amount of steel rails and new cross ties laid down during the year, which swelled the outlay for road repairs.

The additional experience gained in the use of steel rails, confirms our previously expressed opinion, that true economy demands their use upon your road in place of iron rails. Of over thirty (30) miles laid with English steel rails upon your road, not one rail has been removed for any imperfection, and but two American steel rails out of more than two thousand, have shown any imperfection.

The best steel rails can be bought for delivery in 1870, at but 20 per cent. advance upon the cost of best iron rails, and unless henceforth there be a greater relative difference in the cost of iron and steel, the purchases of iron rails for renewals of your tracks, will probably cease.

During the year, all depreciation in road, rolling stock, and buildings, has been fully met by a liberal expenditure for new buildings, rolling stock, and track, and your Directors believe that your property is at the least as valuable as it ever was.

The business of the Delaware Railroad afforded a profit of nearly thirty-five thousand dollars. In accordance with the terms of your lease of the Delaware Railroad, there has been placed to the credit of the previous losses of this company, as lessees, three-fourths of this profit, while the other one-fourth part has been added to the earnings of the P., W. & B. R. R. Co., for 1869.

The prospects of the Delaware Railroad continue to improve. The peach crop of the Peninsula was larger than ever before, although a large area of territory was entirely unproductive on account of late frosts. The quantity of peaches brought upon your road from the Peninsular roads, amounted to about two millions of baskets, or four thousand car loads.

During the year the Dorchester and Delaware Railroad, which, with the Dorchester Branch of the Delaware Railroad, extends from Seaford, on the Delaware Railroad, in Delaware, to Cambridge, Maryland, a distance of 33 miles, was finished.

The Maryland and Delaware Railroad was opened to Easton, a distance of 44 miles from its connection with the Delaware Railroad, at Clayton.

The Queen Anne and Kent Railroad, and the Kent County Railroad, were each finished to points about ten miles distant from the Western end of the Townsend Branch of the Delaware Railroad; the former southwardly towards Centreville, Maryland, and the latter westwardly towards Chestertown, Maryland.

The Junction and Breakwater Railroad, which connects with the Delaware Railroad, at Harrington, has been extended to Lewes, and is now 40 miles in length.

Most of the Peninsular Railroads are furnished with their car equipment by this company; and, in several cases it has been deemed judicious to afford encouragement to them by temporary drawbacks upon the business which they do in connection with roads operated by this company.

The business brought to this company by its new connections with the Philadelphia and Baltimore Central Railroad, made seven months since, amounted to over $27,000, and may reasonably be expected to increase rapidly.

The running of your road between Chester and Philadelphia was interrupted for seventy hours in October, by overflow caused by the breaking of dykes upon the Schuylkill and Delaware Rivers. But small inconvenience was experienced by the public, in consequence of this accident, as the Chester Creek Railroad, and the Philadelphia and West Chester Railroad, afforded a tolerably direct route for our passengers and mails, without change of cars.

For the purposes of purchasing some desirable securities of connecting companies, which were offered on advantageous terms; and of paying a portion of the floating debt, incurred while building the second track, the Susquehanna Bridge, and the Port Deposit Branch; your Directors have, during the year, issued and sold, at rates considerably above par, 8,091 shares of the stock of the company. They deemed this course preferable to that of appropriating a portion of the net earnings of the year to such use.

At the close of the year, the Board caused to be made a careful examination and revaluation of the assets of the company. And while they left unchanged, the valuation of that portion which are correctly valued or even undervalued, they adopted the conservative course of charging against "Revenue Account" all over valuations found upon the company's books. It is plain that the value of your property is in no way affected by this act, while your schedule of assets has been pruned of all over-valuations.

The principal valuation which required such correction, was that of the stock of the New Castle and Frenchtown T. & R. R. Co. the larger portion of which was purchased twenty-nine years since. This stock at one time stood upon the company's books at a valuation of $861,325. This valuation, by the sale of steamboats, and other property, was reduced in 1858-'59 to $744,425, and had been unchanged since that date.

Undoubtedly the value of the franchise of that company was such at the time, as to justify that valuation. But inasmuch as all of their track, excepting about six miles thereof, was taken up many years since and laid upon the Delaware Railroad, and the stock has been recently valued by experts at $150,000—the difference amounting to $594,425—has been charged to "Revenue Account."

Amongst the assets were also charges against connecting roads, for transportation, previous to 1865, principally for troops and munitions of war, which those companies have been unable to collect from the United States. The most considerable of our claims was recently submitted to a reference, and a large portion of our claims disallowed, or met by counter claims. And the final settlement yielded less by $57,445.86 than the aggregate credit to these accounts as they stood upon the books of the company.

These items, together with a few smaller ones, such as the loss upon steamer Fulton, bought before the erection of the Susquehanna Bridge, as an auxiliary ferry boat, and recently sold; and a loss by robbery of the company's safe at Wilmington, in 1869, have, as will be seen, on reference to the Balance Sheet, been charged to "Revenue Account."

In conclusion, your Directors report, that in their opinion, your property is in a sound condition, and the prospect for its future, encouraging.

The company have 59 locomotives, of which 18 are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware and Eastern Shore Railroads. The number of miles run by locomotives, including service on the New Castle and Wilmington Branch, was 963,462.

The car equipment consists of: 5 twelve-wheel and 66 eight-wheel passenger cars, 8 passenger and baggage, 3 compartment, 6 chair, 19 baggage, 8 baggage and mail, 12 express, 2 post-office, 3 milk, 1 pay, 541 house, 57 stock, 220 platform, 128 dump, 99 truck, and 8 wreck, etc., cars.

☞ Work will be commenced on the Quincy, Missouri and Pacific Railroad on the east bank of the river opposite Brownsville, by the 1st of March or April at farthest, and the road completed to a junction with the St. Joseph and Council Bluffs Railroad, where the two cross, at an early day next summer. C. A. Savage, Esq., of Quincy, Ill., is President of the company.

Commerce of New York.

We give below, from the *New York Journal of Commerce*, a statement of the Commerce of New York for 1869, in comparison with that for the five preceding years. It will be seen that the total foreign imports at New York in 1869, were $306,357,673, being a gain on any previous calendar year excepting 1866, which exceeded it by only $744,489. The following is a comparison of the annual result for each year since 1850:

Year.	Dutiable.	Free Goods.	Specie.	Total.
1851.	$119,592,264	$9,719,771	$2,049,543	$131,361,578
1852.	115,336,052	12,105,342	2,408 225	129,849,619
1853.	179,512,412	12,156.387	2,429 083	194,097,652
1854.	163,494,984	15,768,916	2,107,572	181,371,472
1855.	142,900 661	14,103,946	856,631	157,860,238
1856.	193,839,646	17,902,578	1,814,425	213,556,649
1857.	196,279,362	21,440,794	12,898,033	230,618,129
1858.	128,578,256	22,024 691	2,264,120	152,867,067
1859.	213,640,363	28,708,732	2,816,421	245,165 516
1860.	201,401,683	28,006,447	8,852,330	238,260,460
1861.	95,326,459	30 353,918	37,088,413	162,768,790
1862.	149,970 415	23,291,625	1,390,277	174,652,317
1863.	174,521,766	11,567,000	1,525,811	187,614,577
1864.	204,128 236	11,731,902	2 265,622	218,125,760
1865.	212,208,301	10,410,837	2,123,281	224,742,419
1866.	284 033 567	13,001,588	9,578,029	306,613,184
1867.	238,297,955	11,044,181	3,306,339	252 648,475
1868.	232,344,418	11,764,027	7,085 389	251,193,834
1869.	275,779,976	14,789,235	15,788,462	306,357,673

In the above table are included, under the head of dutiable, the duty-paying goods entered directly for consumption, as well as those entered for warehousing; these, with the free goods and specie, make the total entered at the port. All the figures referring to the imports represent only their foreign gold cost, freight and duty unpaid. The specie imports include considerable sums brought here to be re-shipped to foreign ports, and they will be found again among the exports

The following table will show the classification of imports at New York for the years—

	1867.	1868.	1869.
Dry goods.	$86.263,648	$80,905,834	$94,726,417
Gen. mdze.	163,078,493	163,202,611	195,842,794
Specie....	3,306,339	7,085,389	15,788.462
Total....	$252,648,475	$251,193,834	$306,357,673

This shows that out of $306,357,673 imported last year, everything known as dry goods, including all miscellaneous articles sold by the trade, amounted to only $94,726,417, while $195,842,794 are given under the head of general merchandize, and include tea, coffee, sugar, metals, liquors, spices, drugs, fruits, seeds, china, etc., etc. The cash duties received in 1869, amounted to $125,-019,718 69. This was collected upon $260,433,-565 dutiable goods thrown upon the market.

The following is a quarterly statement of the exports from New York to foreign ports, exclusive of specie, for the years named:

Quarter.	1867.	1868.	1869.
1st.....	$49,376,879	$42,033,366	$36,566,724
2d.....	46,270,261	41,381,668	48,705,409
3d.....	38,928,664	36,549,086	54,933,449
4th.....	52,214,722	44,101,182	55,021,124
Total....	$186,790,025	$164,066,102	$195,226 706

The shipments of gold are counted at their tale value; but all others, with unimportant exceptions, are given at their market value in paper money at the time of shipment.

The preceding figures, and those which follow, are from the columns of the *New York Journal of Commerce*, perpetuated in those of the AMERICAN RAILROAD JOURNAL, and due credit has always been given by us to that paper for the same.

Foreign imports entered at New York during the years 1864, 1865, 1866, 1867, 1868, and 1869:

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, February 5, 1870.

Stock Exchange and Money Market.

There has been unusual ease in the Money Market, all through the week. The available supply of capital, especially in a temporary form, has been steadily increasing, both at bank, and in private hands. The city banks, in their last weekly exhibit, showed a further gain of $2,671,090 in the deposit line, $2,162,735 in the legal-tender reserve, and $1,021,711 in the specie item. The specie average is up to nearly 40½ millions; and the legal-tender hoard exceeds 56¾ millions. The deposits are over 210 millions. The loan and discount averages show an increase of $731,515 for the week. The circulation has been reduced $94,439. At the U. S. Sub-Treasury, the coin reserve was increased nearly a million ($912,109) and the currency balance, nearly three-eighths of a million ($358,091) during the week. The office closed the month of January, with an actual cash balance of $79,532,350, of which $3,731,348 were in currency, and $75,791,002 in coin. The currency balance at the close of December was $5,250,566, and the coin reserve, $81,346,887. The general balance of the office stood on the morning of the 1st inst, at $80,766,970, as against $90,057,429 at the beginning of the year. Call loan rates have been generally quoted at from 4@6, with exceptional negotiations reported as high as 7, and as low as 3 per cent. per annum. In the discount line, a fairly active business has been transacted on the basis of 6½@8 per cent. per annum, for strictly prime to very good grades of mercantile paper, the offerings of which have been comparatively moderate for the season. Washington advices place the currency reserve of the Treasury Department at the close of January at $8,690,807, and the coin balance in the actual ownership of the Government, $51,208,550, exclusive of $50,392,180 of coin deposits, represented by outstanding coin certificates.

The specie reserve of the city banks according to the latest return is $40,475,714, against $27,784,923 same time last year. The city bank deposits are now $210,150,913, against $196,985,462 week ending Jan. 30, 1869. The legal tender reserve amounts to $56,782,168, against $54,747,569 same time last year. The circulation now stands at $33,712,282, against $24,231,156 same time last year. The loans are now $260,324,271, against $265,171,109 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $91,603,925 a day, against a daily average of $88,361,485 the preceding week, and $99,455,614 the week ending with Jan. 16, 1870. The current week's exchanges average about 85 millions a day. The city banks, last week, reported a further gain of $1,021,711 of specie, $2,671,090 of deposits, and $2,162,735 of legal tender notes. They increased their loans, $731,515; and reduced their circulation, $94,439.

National Bank notes to the amount of $120,660 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $320,326,121, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $20,560,951, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,765,170. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,313,350; and for the public deposits, $18,721,000—making a total of $361,034,350. The Treasury Department last week redeemed and destroyed $450,539 of worn and mutilated fractional currency, and issued $665,238 of new.

The U. S. Sub-Treasury receipts, week ending with Jan. 30, were $4,632,400 in coin, (including $2,790,000 from customs duties,) and $3,584,819 in currency; payments, $2,720,291 in coin, (including $1,394,275 of coin interest,) and $3,226,728 in currency; balance at the close of the week, $80,681,207 (including $75,549,185, of coin, and $3,897,443 of currency,) against $81,430,918 at the close of the preceding week, showing a decrease of $749,711. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $435,893 in coin, (including $368,698 from customs,) and $515,531 in currency; payments, $194,076 in coin, (including $186,794 of coin interest,) and $359,312 in currency. On Tuesday, receipts, $375,811 in coin, (including $342,905 from customs,) and $414,671

in currency; and payments $181,035 in coin, (including $116,000 of coin interest,) and $352,557 in currency. The balance at the close of business on Tuesday stood at $79,931,805, (including $3,793,461 of currency, and $76,035,779 of coin,) against $79,126,407 a week previous; and $80,547,078 on Jan. 18, 1870.

The aggregate receipts of the office in January were $68,407,045, including $10,152,398 in coin from customs at the port; aggregate payments, $77,697,503, including $17,693,727 of coin interest, and $1,232,271 of currency interest.

Government revenues have been yielding rather more satisfactorily, since our last. The excises have yielded about three millions; customs at the port of New York, $2,694,408, and at the outports about $875,000 (in coin) more, making the grand total income for the week equal to about $7,283,400 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been $99,033,085, against $81,715,084 same time in the preceding fiscal year. The internal revenue receipts for the month of January, are $12,479,555 38, against, $11,127,801 66 for January, 1869, showing a gain of $1,351,253 72.

The Gold speculation has been less confident. The demand from export buyers has been light; and the inquiry for Custom House purposes has not been more than a fair average for the season. The announcement that Government would sell more Gold, than it would purchase of Bonds, in February, operated against buoyancy in the speculative dealings toward the close. The range of the price has been from 121@122¼, and the closing quotation on Wednesday was 121¼. There has been a further gain in the Specie reserves of the City banks, and the United States Sub-Treasury. The yield of Customs at this Port in January, was nearly half a million more than in the same month last year, the aggregates having been $10,152,398 in 1870, and $9,702,416 in 1869. The Coin interest disbursement of the Office in January were $17,693,727, out of the grand aggregate of $31,840,960 of Coin interest on the Funded Debt due on the 1st of that month. The currency interest payments at the New York office in January were $1,223,271.

The customs demand for Gold last week, averaged $465,000 a day; thus far, this week, it has averaged $355,801 a day, or equal to a weekly aggregate of $2,134,806. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $1,250,829; and since Jan. 1 1870, $1,521,206, against $141,732 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $74,572,206, against $69,445,951 in 1868–'69.

The exports of specie, from this port, last week, were $1,366,708, against $1,033,907 same week last year; total, since July 1, 1869, $19,338,944, against $25,023,378 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,894,275, and since July 1, 1869, $61,218,851, against $61,234,802 in 1868–'69.

Foreign Exchange has been in moderately active request at generally well supported prices. The offerings of prime sterling bills have not been large, and the leading drawers have been firm in their views. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅛, and on Paris to 5.21¼@5.16¼; sight bills on London to 109⅝@109¾, and on Paris to 5.15⅝c.@5.14⅜. The offering of produce bills continue on a moderate scale. The week's exports of domestic produce have been to the currency value of $3,822,470, making the total since July 1, 1869, $120,921,151, against $93,704,197 same time preceding fiscal year.

Government securities have been in quite moderate supply, and generally strong in price, on a fair business in nearly all issues, especially in the later coin bearing bonds, and in the currency six per cents, which have been more sought after by purchasers for home investment purposes, partly for the employment of balances, which, in the prevailing abundance of Money for the street objects, could not otherwise be made profitable use of in a controllable form. The official exhibit of the Public Debt of the United States to Feb. 1, shows a further net liquidation of $3,933,664, the net aggregate indebtedness, less the cash in the Treasury, being now down to $2,444,813,288, as against $2,448,746,953 at the beginning of the month and year. The Sinking Fund bond purchases and the accrued coin interest thereon now amount to $25,716,080; and the Special Fund bond purchases and accrued interest thereon, to $71,366,303, making the total of both items of bonds bought in, with the accumulated interest thereon, $97,082,383.

U. S. sixes of 1881 closed here buoyantly at 118@118¼; U. S. Five-twenties of 1862, 115⅛@115¾; U. S. Five twenties of 1864 at 115⅛@115⅜; U. S. Five-twenties of 1865 at 115⅛@115⅜; U. S. Five-twenties of 1865, consolidated, 114⅛@114¼; U. S. Five-twenties of 1867, 114⅛@114⅝; U. S. Five-twenties of 1868, 114⅜@114½; U. S. Ten-forties at 112½@112⅝; U. S. Six per cent. currency bonds, 111½@111¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

A more active call has been noted for State bonds, which close generally much firmer in price. A brisk investment inquiry has been reported for the Railway Mortgages, which have been advancing in price. The Central Pacific First Mortgage Bonds have been freely sought after, closing firmly at 95. The demand from foreign buyers was good, with a very scant supply available. The Union Pacific Sixes met with a ready sale and closed buoyantly at 87⅛.

The railway and miscellaneous share dealings have been more extensive, and the market generally more buoyant.

General business has been unusually brisk in the Cotton line, though closing less buoyantly. The Breadstuff interest has been moderately active for the season, but at depressed figures in most instances. Provisions have been in better supply and heavy, on a restricted trade. Naval stores, Tobacco, and Wool have shown more animation. Middling upland cotton closed tamely on Wednesday at 25⅜cts. per lb. The stock of cotton now here is given at about 65,000 bales. The receipts at the port this week, have averaged about 4,600 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,697,400 bales, against 1,350,800 bales in 1868–'9; exports, same time 928 800 bales, against 685,350 bales same time in 1868–'9; stock on hand at latest dates, 470,000 bales, against 361,000 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 575 pkgs., against 691 pkgs., same time in 1869. From Boston, 340 pkgs., in 1870, against 807 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 9@17c⅛., per lb.; week's receipts, 6,210. Milch cows continue very dull, at $40@$100 each, receipts, 115. Veal calves have been dull and heavy at from 8@13c. per lb.; receipts, 484. Sheep and lambs in less demand at from 4½@8c., and 6⅛@8⅛c. per lb.; receipts, 32,021. Swine in request and heavy at 9¼@9¾c. per lb., all live weight; receipts, 10,813.

Foreign merchandise has been in fairly active demand and generally firm in price, the main exception having been Sugars, which have been unusually depressed, by large stocks.

Ocean freights have been inactive, and weaker. For Liverpool we quote flour at 1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 4d.@4⅛d. by sail, and 4d.@4½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 508.

The balance in the Sub-Treasury on Wednesday was $83,099,356 07.

The New York exports, exclusive of specie, for the week ending Feb. 1, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$3,705,274	$3,822,470
Previously reported	11,071,919	10,852,856
Since Jan. 1	$14,777,193	$14,675,326

The imports for the week ending January 29, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,734,227	$2,843,545
Gen. merchandise	2,496,120	3,494,773
Total for the week	$5,230,347	$6,338 518
Previously reported	15,356,187	13,956,817
Since January 1	$20,586,534	$20,295,335

Glendinning, Davis & Amory.

A card of Messrs. Glendinning, Davis & Amory, New York, and Glendinning, Davis & Co., Philadelphia, will be found on last page of cover, and is worthy the attention of our subscribers and readers. These parties possess the ability, and have abundant facilities for conducting a "*General Banking and Brokerage*" business; and their strict adherence to integrity, and abstinence from speculative transactions, have gained for them an enviable reputation in their branches of business, and deserve a liberal share of patronage from the business community.

☞ Trains are now running on the South Georgia and Florida Railroad from Thomasville, on the Atlantic and Gulf Railroad, north to Camilla, about 25 miles.

☞ The Southern Branch Union Pacific Railway is now completed to Hartford, 14 miles southeast of Emporia.

☞ The Lansing and Ionia (Michigan) Railroad has been completed to Ionia.

Monongahela Valley Railroad.

At a recent meeting of the directors of this company at Pittsburg, a resolution was passed to increase the number of directors to thirteen. A resolution was also offered and adopted changing the corporate name of the company to the "Pittsburg, Virginia and Charleston Railway Company."

The draft of an act, to be submitted to the Legislature, was also presented, which authorizes the company to issue first mortgage bonds to the amount of five million dollars, the proceeds to be applied to the construction of the road.

The work will be commenced as speedily as possible, and the Directors express a determination to push the construction forward vigorously. The extension of the road to Charleston is an important measure, and, with the unusual advantages of the line already surveyed, in the matter of low grades and the rich country through which it passes, places the success of the enterprise as a profitable investment beyond doubt.

Milwaukee and St. Paul Railway.

The Minneapolis *Tribune* says that this company, notwithstanding they own more miles of railroad than any other company in the United States, are still extending their lines in every direction. During the past year they have constructed in Iowa and Minnesota over one hundred miles of new road as follows: From Calmer to Mason City, 75 miles, from Connover to Decorah, 9¼ miles; from Austin to state line, connecting with the Cedar Valley road, 12 miles, and from Mendota to St. Paul, 6 miles. The latter six miles was built jointly with the St. Paul and Sioux City road. Next season the company propose making a still further extension of the McGregor and Missouri River Railway, west from Mason City.

Little Rock and Fort Smith Railroad.

We are informed that work is progressing with great rapidity upon this road. The whole length is 155 miles—all under contract, and work commenced on 80 miles. The first 20 miles are entirely graded, and the track is being laid. The cars will be running over this portion by 15th March, and the work upon the divisions is so timed that the track will progress without cessation. The whole road will be completed in the spring of 1871. A. P. Robinson, Esq., is Chief Engineer. Address, Little Rock, Arkansas.

☞ The Western Division of the Iowa Falls and Sioux City Railroad is completed to the Little Sioux, three miles east of Cherokee station, and 63 miles from Sioux City.

☞ The Fort Scott, Missouri River and Gulf Railroad now completed 9 miles south of Fort Scott, will be finished to Girard, in Crawford Co., 18 miles further, by the middle of February.

☞ The Pensacola and Louisville Railroad has been completed to a junction with the Mobile and Montgomery Railroad.

☞ A. H. Castle, of Chicago, Ills., has been elected President, and L. C. Ellsworth, Secretary and Treasurer, of the Illinois Grand Trunk Railway Co.

☞ The earnings of the Flint and Pere Marquette Railroad in 1869, were $467,568 28.

☞ The Chicago and Michigan Lake Shore Railroad has been completed and opened for business from New Buffalo to St. Joseph, a distance of 27 miles.

Railroads in Minnesota.

During the year 1869 there was constructed and opened 224 miles of railroad, as follows:

	Constructed in 1869. Miles.	Whole line in operation. Miles.
First division St. Paul and Pacific, main line	64	115
First division St. Paul and Pacific to Sauk Rapids	..	81
Minnesota Valley	16	100
Milwaukee, St. Paul and Minneapolis	..	134
Minnesota Central—Austin to State line	12	12
Winona and St. Peter	12	118
Southern Minnesota	40	90
Lake Superior and Mississippi	50	80
Hastings and Dakotah	10	30
St. Paul and Chicago	20	20
Total	224	780

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN LIABLE FOR KILLING STOCK—COMPENSATORY NOR VINDICTIVE DAMAGES NOT ALLOWED.

The facts of the recent case of the Toledo, Peoria and Warsaw Railway Company *vs.* Arnold (48 Ill. 418) are fully and clearly stated in the following opinion by

BREESE, J.—The only ground on which this court can interfere in this case, is that the damages are greater than the proof allowed.

The action was brought to recover damages for killing certain live stock of the plaintiff, not intentionally, by the defendants, or by proving negligence in running their trains, but by the inference of negligence by reason of their failing to fence their road.

The plaintiff's claim to compensation manifestly rests upon the value of the property destroyed, and upon nothing else. The measure of the damages would then be, necessarily, the value of this property. It is not a case for punitive damages, or vindictive damages, as claimed by the defendant in error. It comes under that class denominated compensatory damages, which are given in cases where aggression and malice are not present, and they are intended to furnish actual compensation, as near as may be, for the actual injury done. To illustrate: A happens, accidently, in performance of a lawful act, in a lawful manner, to kill B's horse.

It would be preposterous to contend, that B should punish him in damages beyond the value of the horse, for an act he did not intend to do. So here, there is no aggression or malice pretended, but a mere accident, for the occurrence of which the plaintiff was responsible in a certain degree, in allowing his stock to roam about on land traversed by a railroad. The law pardons this his negligence, but it does not require smart money shall be given to him, over and above the just value of his property destroyed.

No circumstances of aggravation are shown or pretended. The proofs in the cause show that the total net value of the animals killed, and proved to be the property of the plaintiff, was four hundred and eleven dollars. The verdict was for four hundred and forty-one dollars, thirty dollars more than the proved value of the property. There is no proof whatever, that the steer killed was the plaintiff's, nor is it claimed in the declaration. The verdict is not warranted by the evidence. The amount of the recovery is unjust and cannot be sanctioned,

The judgment must be reversed and the cause remanded.

Judgment reversed.

Erie Railway.

We gave last week the Report of the President of this company to the stockholders. The following is an abstract of the Report of the company to the State Engineer and Surveyor, made pursuant to law, for the fiscal year ending September 30, 1869:

EARNINGS AND RECEIPTS.

From freight	$13,046,803 76
" passengers	3,429,629 18
" telegraph	33,562 61
" storage	3,740 14
" rents	22,831 76
" mails	150,409 61
" Pavonia Ferry	34,523 28
Total	$16,721,500 34

Of the above earnings, $4,043,048 82 are from passenger trains; $12,583,798 73 from freight trains; and $94,657 79 from other sources.

PAYMENTS OTHER THAN FOR CONSTRUCTION.

Passenger transp.	$3,669 236 88	
Freight transportat'n	9,590,030 23	
Total transp. exp.	$13,259.266 61	
Hudson River Ferry	184.514 15	
Telegraph	107,278 59	
Internal revenue tax	88,566 44	
Loss on Lake Erie steamers	78,464 64	
	$13,718,085 48	
Interest on mortgage debt	1,708,773 00	
Rents of railroads	824,020 00	
		16,245,878 43
Surplus October 1, 1869		$475,621 91

The following is a statement in detail of the expenses of maintaining the road or real estate of the corporation, repairs of machinery, and operating the road:

MAINTAINING THE ROAD OR REAL ESTATE.

Repairs of road bed and railway, excepting cost of iron	$1,984,560 26
Cost of iron used in repairs	1,559,122 50
Allotted to passenger transportation: length in feet 1,017,691	
weight in lbs. 20,983,781	
Allotted to freight transportation: length in feet 2,571,535	
weight in lbs 56,733,928	
Repairs of buildings	322,983 61
Repairs of fences and gates	48,111 91
Taxes on real estate	333,495 08
Total	$4,248,273 36
Allotted to passenger transportat'n	$1,147,034 01
" freight "	3,101,239 35

REPAIRS OF MACHINERY.

Repairs of engines and tenders	$1,873,867 49
Repairs of passenger and baggage cars	896,076 80
Repairs of freight cars	1,144,675 14
Repairs of tools and machinery in shops	138,378 54
Incidental expenses, including oil, fuel, clerks, watchmen, &c., about shops	129,636 10
Total	$3,182,634 07
Allotted to passenger transportat'n.	$894,493 47
" freight "	2,288,140 60

OPERATING THE ROAD.

Office expenses, stationery, &c	$251,080 14
Agents and clerks	872,952 93
Labor: loading & unloading freight	638,223 66
Porters, watchmen and switch tenders	198,813 49
Wood and water station attendance	27,692 51
Conductors, baggage and brakeman	854,382 34
Enginemen and firemen	900,968 28
Fuel, cost and labor of preparing for use	1,406,412 24
Oil and waste for engines & tenders	165,197 79
Oil and waste for freight cars	25,096 66
Oil and waste for passenger & baggage cars	7,990 13
Loss and damage of goods and baggage	141,543 45
Damage for injuries of persons	67,547 49
Damage to property, including damages by fire and cattle killed on road	10,194 41
General superintendence	119,234 14
Contingencies	146,029 52
Total	$5,828 359 18
Allotted to passenger transportat'n.	$1,627,708 90
" freight "	4,200,650 28

COST OF ROAD AND EQUIPMENT.

	By last report.	By present report.
For graduation and masonry	$1,501,643 11	$2,309.125 47
Telegraph	12,326 52	12,326 52
Superstructure, including iron	2,179,724 20	3,274,894 79
Passenger & freight stations, buildings and fixtures	849,536 34	881,182 93
Engine and car houses, machine shops, machinery and fixtures	1,580,516 21	1,784,018 47
Land, land damages and fences	335,563 36	350,922 88
Locomotives and fixtures, and snow plows	2,672,611 96	3,103,907 16
Passenger and baggage cars	694,818 17	847,908 15
Freight and other cars	2,654,706 77	3,488,762 28
Pavonia and 23d st. ferries	266,210 48	526,960 43
N. Y. & Erie R. R. Co.	43,738,948 85	48,551,949 93
Total cost of road and equipment.	$56,486,605 97	$65,131,959 01

STOCK AND DEBT.

The following is a comparative statement of the Capital Stock and Funded and Floating Debt of the company on the 30th of September, 1868 and 1869:

	1868.	1869.
Capital stock	$46,302.210 00	$78,536,910 00
Funded debt	23,898,800 00	23,898,800 00
Floating debt	4,893,735 81	.....
Totals	$74,594,745 81	101,935,710 00

CHARACTERISTICS OF ROAD.

Length of Main Line of road from Jersey City to Dunkirk, 459 miles; length of double track, including sidings, 380¾ miles; length of branches owned by the company, 364¼ miles; length of double track on same, 50⅛ miles. Number of locomotives, 404. Number of cars, rated as 8-wheel: first class passenger, 218; second class and emigrant passenger, 54; baggage, mail and express, 71; freight cars, 7,447.

DOINGS DURING THE YEAR.

Number of miles run by passenger trains, 2,837,407; do., by freight trains, 4,924,172—total

7,761,579. Number of passengers carried, 2,497,-113; do., carried one mile, 128,455,158. Tons of freight carried, 4,812,209; do., carried one mile, 817,829,190.

The Public Debt Statement.

The following is a recapitulation of the public debt statement, January 31, 1870:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$221,589,300 00
Six per cent. bonds	1,886,349,900 00
Total	$2,107,939,200 00
Accrued interest	$32,847,394 82
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,530,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Total	$59,530,000 00
Interest	$717,950 00

☞ Six miles of track have been laid on the Omaha and Northwestern Railroad.

Lifting Jacks.

We never knew the particular reason which induced the adoption of the term "jack" as a name for the portable lifting device so generally used. We have a great variety: some with an immense force applied through an hydraulic medium, and others of less purchase and operating through various other devices, principally by the ever convenient screw.

The invention of the screw is lost in antiquity; but improvements will never cease. A peculiar application of the screw principle to jacks has resulted in an improvement of much importance, which has within a few years attracted considerable attention.

It is a double screw, or a screw within a screw, lifting twice as fast as a single one, and though it might seem rather incredible, operating as easily, and in many cases easier, so the workmen assure us, than the common single screw jack. The question of the facility of operation is not, however, the main one. The peculiar advantage due to this improvement in jacks is that it is lighter and more compact, than the old form. This jack is in three lengths, and opens out to three times instead of twice its ordinary length. That is the proportion in theory, but in practice there is required in all jacks a head, which head does not lengthen at all, but only the threaded portion, and as this can of course never extend quite to the end of the thread part, there is considerable discount from the extreme extent, which theory might indicate. In practice the common jack will only lengthen some sixty per cent. of its theoretical extension, and the double jack will only lengthen about the same ratio to *its* theoretical length.

It follows, that while in practice the common screw will lengthen only about fifty per cent. of its closed length, we are now enjoying a jack which will open out successfully to about twice its closed length. The larger sizes open out still more. There are already in use on our principal railroads, more than one thousand of jacks, having a right handed screw within a left handed screw, and operated by turning the screw, or sleeve alone, and lifting by two threads at each revolution, instead of one, as in the ordinary way. It is known as *Ball's Jack;* and is made and sold by ALBERT BRIDGES, of New York. In practice, the jack which stands twenty-five inches high when closed, is capable of lifting thirty-one inches. In other words, its whole length when extended, is fifty six inches. Four sizes have been made for several years, the smaller ones being, of course, the favorites in ordinary railroad work. Until lately, the smallest size stood fourteen inches when closed, and extended out to thirty inches, giving a lift of sixteen inches. Recently, however, a smaller size has been made, which is, we think, destined to become still more popular. It stands only nine and a quarter inches high when closed, and opens to nineteen and a quarter inches, giving a clear lift of ten inches.

The inconvenience of digging a hole in the ground to get the ordinary tall jack under, in many instances, and the impossibility of effecting this in many cases, as in wrecking, where a ledge or other hard substance lies below, is only one of the arguments in favor of this jack over the common single screw. The structure as a whole is considerably lighter for the same strength than the common one. The outer screw or sleeve is made of lap welded wrought iron pipe, and the structure seems strong. Experience has proved that it is capable of enduring the roughest usage.

The seeming paradox of its opening easier than a screw having a slower lift, is due to a very simple reason. The common screw jack has, necessarily, a loose collar, or turning head, the friction of the neck of which is necessarily greater than that on a well finished, and well lubricated screw thread. The friction of a jack is so much greater than the lifting resistance, that the increase in the velocity of the lifting is about balanced by the reduced friction due to the rubbing surfaces of both screws. In other words, the division of the frictional surface in a great number of well fitted screw threads, capable of being kept well lubricated, atones for the increased load thrown upon the workmen, by lifting twice as fast. It is a beautiful example of the constant and rapid progress we are making in the simple tools and implements of common use, as well as in the more important attractive applications of scientific principles.

Little Miami Railroad Lease.

The stockholders of the Little Miami and Columbus and Xenia Railroad Companies have ratified, by an unanimous vote, the perpetual lease of these roads, with all the property and privileges, to the Pittsburgh, Cincinnati and St. Louis Railroad Co., guaranteed by the Pennsylvania Railroad Co., at an annual rental, free of taxes and assessments, of $480,000, payable quarterly, and taking effect from December 1st, 1869. The present capital stock of the Little Miami Railroad is $3,-592,400. Upon this the rental would be equal to 9 44-100 per cent. The capital stock of the Columbus and Xenia Railroad is $1,786,200. Upon this the rental is equal to eight per cent. The capital stock of the Little Miami Railroad, however, is to be increased $641,000 by a stock dividend of 17 96 1000 per cent., and thus the total capital stock of the two roads will be $6,000,000, upon which there will be a uniform dividend of eight per cent. per annum, free of tax, payable quarterly. The Little Miami is now virtually under the management of the Pennsylvania Railroad Co., and will be so, absolutely, as soon as the lease is ratified by the Pittsburgh, Cincinnati and St. Louis Railroad Co., which, however, will be a matter of form, as the thing is already understood and agreed upon by the controlling parties. On the 1st of December the Pennsylvania Railroad Co. bought the Cincinnati, Wilmington and Zanesville Railroad, and now it has the line extending from Cincinnati to Columbus; so that this great corporation has absolute and undivided control of the lines extending on one side to Chicago, and on the other to Cincinnati and St. Louis.

☞ The earnings of the Boston, Clinton and Fitchburg Railroad for the year ending November 30, 1869, were $218,787, the expenses $159,763, and the net earnings, $59,023; net income to surplus account, $31,423; total surplus, $31,650. The report says the cost of the road has been increased by the consolidation with the Fitchburg and Worcester Railroad, and purchases made during the year, in the sum of $566,156 66, by the construction account, erection of new buildings, purchase of real estate, increase of rolling stock, &c.

Rockford, Rock Island and St. Louis R. R.

The original charter of this company authorizes the construction of a railroad from Beloit, Wisconsin, Southwesterly through Rockford, Dixon, and Sterling to Rock Island; thence south to East St. Louis, on such route as the company may determine, with branches to different points on the Mississippi river, being in all over 400 miles of road. The company has constructed, and has in operation, the following sections of its road:

From Sterling southwesterly to Rock Island, 52 miles; from a station on this line called Rock River Junction into and through the coal fields tributary thereto, 16 miles; from Oquawka Junction, a point on the Mississippi river nearly opposite Burlington, north through Oquawka and Keithsburg, 20 miles; from Beardstown, on the Illinois river, south through Winchester, Whitehall and Greenfield, in the direction of St. Louis, 55 miles.

The company has a large amount of iron rails now afloat on the way from Europe to the line of road, and it is expected, by the first August coming, that they will have a complete unbroken line of road from Sterling to St. Louis.

They own and contract by lease large tracts of coal land at different points along the line of their road.

Cumberland Valley Railroad.

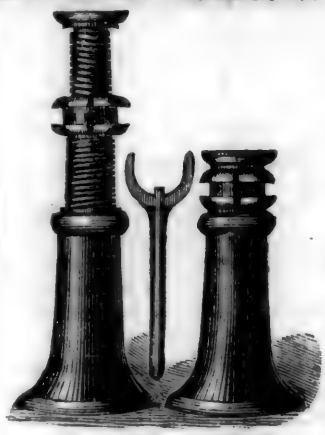
The Hagerstown *Herald* says that the work up on the extension of this road is progressing so rapidly that the statement of the president of the company that it will be completed by the 1st of July next, will be more than verified. The weather is very favorable for the prosecution of outdoor labor, and Mr. Marsh, the enterprising contractor, is making the best possible use of it. He is working some three hundred hands, and it is really astonishing to see how much he has accomplished in a comparatively short time.

New Law Books.

REDFIELD'S
Leading American Railway Cases.

Leading Cases and Opinions upon most of the important questions involved in the Law of Railways, arranged according to subjects, with extensive Notes and References to the late Decisions. By ISAAC F. REDFIELD, LL.D. 8vo. $7.50.

Redfield on Railways.



Fourth Edition.

The Law of Railways; embracing Corporations, Eminent Domain, Contracts, Common Carriers of Goods and Passengers, Constitutional Law, Investments, Telegraph Companies, &c., &c., By ISAAC F. REDFIELD, LL.D., Chief-Justice of Vermont. Fourth Edition, greatly enlarged. 2 vols. 8 vo. $15.00.

In this edition the topic of COMMON CARRIERS and TELEGRAPH COMPANIES form complete Treatises. In addition to these the work contains Compact Treatises on CORPORATIONS; EMINENT DOMAIN; MANDAMUS; CONTRACTS FOR CONSTRUCTION; CERTIORARI; QUO WARRANTO; EQUITY JURISDICTION; CONSTITUTIONAL QUESTIONS affecting Legislative Grants; INVESTMENTS, STOCKS, MORTGAGES, POLICE, AMALGAMATION, &c., as well as all other matters in the law more exclusively affecting Railways.

Notice to Contractors.

CHESAPEAKE AND OHIO RAILROAD.

SEALED PROPOSALS will be received at the Engineer's office at Charleston, W. Va., until 12 M. March 1, 1870, for the GRADUATION, MASONRY and the SUPERSTRUCTURE OF BRIDGES on the Chesapeake and Ohio Railroad between the Falls of Kanawha and the Ohio River, including THREE MILLIONS CUBIC YARDS OF EXCAVATION, and SEVENTY THOUSAND CUBIC YARDS OF MASONRY.

Also, at the Engineer's office at Richmond, Va., until 12 M. March 10, 1870, for several heavy sections east of the Falls of Kanawha, including the unfinished work near Millboro', and that eight miles east of the White Sulphur Springs, the Great Bend tunnel, 6,400 feet; Lewis tunnel, 3,800 feet; five other tunnels from 500 to 1,700 feet long; several sections in rock cutting; and about 70,000 cubic yards of masonry.

Profiles and specifications can be found at the office of the company, 54 William street, New York, on and after February 1; at Richmond, Va., and at Charleston, W. Va., on and after January 15, 1870. The company reserves the right to reject any or all the bids offered, and to make private contracts for the work.

Information as to time, etc., will be given at the letting. For further information apply to H. D. Whitcomb, Chief Engineer, Richmond, Va., or to W. A. Kuper, Principal Assistant Engineer, Charleston, West Virginia.

C. P. HUNTINGTON,
4t4 President.

TO BRIDGE BUILDERS.

OFFICE OF SOUTH STREET BRIDGE COMMISSION, No. 234 South FIFTH Street.
PHILADELPHIA, Jan. 17, 1870.

SEALED PROPOSALS for erecting a bridge over the River Schuylkill at South street will be received at the office of the Commission, in the Department of Surveys, No. 234 South FIFTH Street, until 12 o'clock M. of the FIRST DAY OF MARCH, 1870, for the construction of a wrought iron drawbridge, with Murphy's modification of the Pratt truss. To have cast iron piers in river, and stone abutments, with approaches of retaining walls; arches of brick, and iron I girders, as described in the specification. The entire length of structure to be 2,419 feet, the truss spans to be 185 feet each, with pivot draw, giving an opening of 77 feet on each side.

The proposal to be for an aggregate bid, to be accompanied by a bond with two approved sureties to an amount of $50,000. Fifteen per cent. to be retained as the work proceeds until the same, inclusive of the $50 000 noted in bond, shall amount to fifteen per cent. of the contract price, after which the current estimates will be paid in full.

Plans may be seen and specifications obtained at the office of the Commission on and after the 29th instant.

MOSES A. DROPSIE,
4t4 President of the Commission.

RAILROAD CROSS TIES.

THE WHARTON
Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

Locked Safety Valves.

TO
MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

The Tax on Incomes.

A resolution was lately adopted in the House of Representatives, declaring that the true intent and meaning of the Internal Revenue act of 1867, is, that the income tax shall be collected during and for the current year. It appears that the law—as is frequently the case with Congressional enactments—is somewhat ambiguous, and a variety of decisions have been reached in the different departments of the Government as to its meaning. In the Senate debate on this question a wide diversity of opinion was developed, both as to the construction of the law and as to the propriety and expediency of continuing the tax—although the latter question was not actually involved. These quibbles over the wording of the law, however, have but little interest for the people of the country at large: the important question being, will Congress allow the tax to be assessed and collected in spite of the earnest protest of all classes of the community, and the persistent demands of a vast majority of the tax payers of the nation for the prompt and unconditional repeal of the law. The fact that a resolution providing for the collection of the tax for 1870, in 1871, has passed the House without debate, may be regarded as an evidence that Congress will legislate in favor of its continuance.

We confess our disappointment. Knowing that the ambiguity of the law would lead to a discussion of the question of enforcing or repealing it, we had hoped that Congress would at least have given the overtaxed people the benefit of the doubt, by refusing to authorize another assessment of the tax on incomes. Although there is now but little reason to expect that that body will defer to the strong popular sentiment in favor of repealing the law, it is not too late to urge on that body the importance of relieving the people from a form of taxation the most odious and distasteful ever devised by the National Government. In no better way can the work of lightening the burdens which now oppress the people be begun. There is no longer a necessity for its continuance, since the revenues of the Government are so far in excess of its requirement, that Mr. Boutwell has had recourse to the expedient of the sinking fund to prevent the accumulation of surplus monies in the Treasury. As this sinking fund is in no sense a necessity, we could well dispense with any further additions to it at the present time. The bonds are safe. Many years will elapse before they will be presented for redemption, and the people are unwilling at the present time to be taxed for the payment of both interest and principal. What is needed is that Congress shall repeal every unnecessary tax, and reduce the revenues to the minimum of its requirements under a strictly economical administration of every department of the Government.

There are, however, other considerations besides those of expediency why the income tax should be repealed. As now levied, it is neither just nor equitable. For example, the amount actually paid for house rent may be deducted from the returns of personal income in some cases and not in others—in addition to the $1,000 exemption common to all payers of the tax. In cases where the payer is in the service of the Government, the full amount of his income tax is by law deducted in advance irrespective of any allowance for house rent. A clerk in the Treasury, Custom House or Post Office Department, or any officer of the army, is not permitted any exemption on account of rent, unless he has an income from other sources from which to deduct it. This is an unjust discrimination against those in the service of the Government. Under this system a clerk in one of the public departments who receives a salary of two thousand dollars pays tax in advance on $1,000 income, without deductions, though he may pay out six hundred dollars a year, or more perhaps; while every other clerk or person in the United States receiving a $2,000 income is permitted to deduct the full amount disbursed for house rent or its equivalent. Thus one man must pay $50, on precisely the same income on which another pays $20—supposing the house rent to be $600 in both cases. However regarded, the exemption clause is unequal in its operations. Can any good reason be alleged for deducting one thousand dollars from a total income of millions, while only one thousand dollars exemption is allowed to the poor man with a salary of twelve or fifteen hundred dollars out of which his family must be supported? Why permit extravagant house rents to be deducted in the case of the wealthy tenant, while no greater privilege is allowed the poor man, whose humble home is a bare necessity, which under existing circumstances, costs him far more in proportion to his means than an elegant mansion costs his neighbor? We admit it would be difficult, if not impossible, to modify the law so as to do away with these objections to it, and Congress should "reform it altogether" by repealing the tax at once.

These are a few of the inequalities of the law. The objections to it on other grounds are even stronger. The worst feature of the tax is that it is systematically and persistently evaded by a considerable part of the taxable community, and every attempt to enforce the law, would lead in an almost equal number of instances to equivocation and deception that amounts practically to flat perjury. The influence of this on the community is essentially demoralizing. To prevent it, it is necessary for the agents of the Government to institute a system of *espionage* not in the least in accordance with the principles of our free institutions. No man's business relations, however private, are sacred from the inspection of

those lynx-eyed partisans of the law, unless he can succeed in evading them as is often the case. On the other hand, suppose a responsible citizen, who respects law in all forms, however odious and objectionable its provisions and requirements, makes an honest return of his taxable income. He is thus compelled to publish to the world, that which concerns himself alone, and which for many and obvious reasons he would prefer to keep to himself. The books of the Assessors' Department are public documents, and may be consulted by whoever chooses to do so. More than this, the incomes as sworn to are generally paraded for public inspection in the columns of the newspaper press, to be discussed and compared in business and social circles, and made a subject of public comment. In a few instances this may gratify a petty vanity, but in a majority of cases it is distasteful in the extreme, and prompts a desire to evade the law. The collection of the tax at stated intervals imposes a burden on most payers of moderate incomes which comparatively few are able to bear. Being therefore odious from the means necessarily employed by the Government in its collection, and burdensome to those whose income is little more than sufficient to sustain them comfortably, it should only be regarded as a last expedient by which to replenish an exhausted public Treasury. This necessity once removed, as in the present case, it is the duty of Congress to repeal the law. The Government does not need to resort to direct taxation in times of peace and prosperity to maintain its solvency. It already taxes heavily enough all articles of consumption and exchange, both necessities and luxuries, all business transactions, manufactures, and every form of productive industry, and from these sources its revenues are more than ample for all present and prospective requirements. These indirect taxes the country will cheerfully pay as long as Congress may deem their collection necessary, but the strong public sentiment in favor of a repeal of the income tax demands the prompt and intelligent consideration of that body before the close of its present session.

Boston, Barre and Gardner Railroad.

The first annual meeting of the stockholders of this road was held at Worcester, on the 2d inst. The report of the Directors stated that the amount required for the construction of the first and second sections of the road had been subscribed. An assessment of $20 per share had been laid. The receipts have been $105,217, and the expenditures $2,755. The corporation owes $1,000. A contract has been made with Messrs. R. P. Cook & Co. of Brockville, Ontario, Canada, to furnish all material and construct the road from Worcester to Gardner, to be finished ready for the rolling stock on or before July 1, 1871; and they have commenced the work with a fair prospect of having it completed within the time. A. R. Field, of Greenfield, has been appointed Superintending Engineer. The construction of the Massachusetts Central Road, which has been chartered, will, if built, afford accommodation to Barre and other towns in that vicinity, which will supersede any necessity for the construction of the third section of this road, and for that reason no effort has been made to obtain subscriptions for that section.

The following gentlemen were elected Directors for the ensuing year: Stephen Salisbury, Ivers Phillips, H. N. Tower, Stephen Salisbury Jr., George W. Gill, Lewis Barnard, W. W. Rice, Calvin Foster, R. C. Taylor, all of Worcester; Col. I. N. Ross of Holden; W. B. Goodnow of Princeton; Wm. H. Morse of Hubbardston; Levi Heywood of Gardner. At a subsequent meeting of the Directors Ivers Phillips was chosen President, and Wm. E. Starr Clerk.

Boston and Albany Railroad.

The earnings of this road for the years ending November 30, 1868 and 1869, have been as follows:

	1868.	1869.
From passengers ...	$2,290,568 41	$2,557,592 38
" freight	3,410,892 76	3,861,052 82
" mails, etc	373,143 85	377,811 12
	$6,074,605 02	$6,796,455 82
Expenses, viz:

Value of fund Nov. 30, 1869		506,560 54
Value of both funds Nov. 30, 1869.		$2,171,791 57

Compare with the previous year, the gross earnings show an increase of $721,850 80; with an increase in expenses of $622,153 90—making the increase in net earnings, $99,696 90. The report says:

The sterling debt has been reduced by the payment from the sinking fund of £90,000, that amount having fallen due on the 1st of October last; and there remains in the hands of the Commissioners of the fund the sum of $1,665,231 03, for the further liquidation of that debt. Of the Albany City Bonds, $93,000 have been paid and canceled during the past year, and the Commissioners of that fund have in hand cash and securities more than sufficient to meet the outstanding bonds. The dollar bonds have also been reduced by the payment and cancellation of $44,500.

We have laid, in the repairs of track during the last year, 9,231 tons of new rails, 1,000 tons of which were of steel from the works of JOHN A. GRISWOLD & Co., of Troy, N. Y., and our track was never in better condition than at the present time. We have also effected contracts for 4,000 tons of steel rails for early delivery next spring.

The equipment of the road has been increased by the addition of 23 first class engines, eight of which are in substitution of an equal number sold or broken up; the actual complement of engines being increased by 15, thus furnishing us with motive power fully equal to present needs of the business. We have also built and purchased 20 passenger and baggage cars, eight of which belong to the Boston and New York line, and to the freight equipment 428 new cars have been added.

By reason of the elevated location of our road and its thorough drainage, we have suffered, until the past year, but little from freshets, indeed, the whole damage from that source since the road was opened for use, would not, it is believed, equal that occasioned by the extraordinary rains of October 4th, when the destruction of culverts, bridges and embankments, was so extensive that, with all the force and material which it was possible to command, we were unable for three days to pass a train over the whole length of our road. The damages have, in the main, however, been repaired, and the superstructures rebuilt. At Wilbraham, where the most serious difficulty was experienced, the work of reconstruction is already in an advanced state. The masonry for the culvert the foundations of which are about seventy feet below the rail is being replaced with hammered stone in a most thorough and substantial manner, and in the course of a few days the work will be ready to commence the filling.

Full and final settlements have been effected with the former proprietors of the Grand Junction road, and all claims upon the same have been paid; the mortgage to the Eastern road, however, has been discharged since the close of the fiscal year, and does not appear in the accounts.

The property of the corporation at East Boston, made doubly valuable by its close connection through the Grand Junction road with our main line is now being rapidly developed. During the past year the docks have been dredged and improved, the wharves and storehouses renewed and put in good condition, and an elevator is being built capable of storing about 380,000 bushels of grain, and so situated as to discharge the products of the West, directly into the holds of vessels for foreign export. These wharves are now accessible to all the railroads terminating in Boston, the approach to them, however, is now for a short distance over a portion of the Eastern road. A location for an independent connection has been made, for the completion of which some further outlay may be necessary.

In the City of Boston large and valuable additions have been made to the real estate of the corporation in the immediate vicinity of the depot, and at Allston extensive car shops are in process of erection upon the territory of the corporation recently enlarged by purchase for that purpose. When these improvements are completed, the ground at present occupied by workshops in the city, will afford room for ampler accommodations for engines,

While these and other improvements have been steadily pressed with a view to the immediate wants of the corporation, we have not been unmindful of the claims which the future will make upon us, and that full provision against any exigency might be secured, we have availed ourselves of the authority given by the last Legislature, to purchase of the Commonwealth fifty acres of the South Boston Flats. This contract was closed with the Harbor Commissioners, the duly authorized agents of the Commonwealth, late in the season, and no steps have as yet been taken for its development.

From the rapidly increasing volume of traffic over our road, and the well-recognized importance of speed and regularity in its transportation, the attention of the Directors has been called to the inadequacy of the bridge over the Connecticut River at Springfield. The superstructure of this bridge is of wood, and as at present constructed, its piers will not admit of more than a single track. To provide as far as possible against any interruption to business which might result from these causes, the Directors have resolved to begin early in the coming season upon the construction of a double track iron bridge. The inadequate accommodations afforded by the passenger depot at this point to the traveling public, has also engaged the serious consideration of the Board, and although the subject presents peculiar difficulties, it is believed that out of the several plans now under advisement, one will be adopted in which the necessities and convenience of both the public and the various roads interested, may be satisfactorily met. This improvement may lead to the necessity of changes in the present workshop and freight arrangements of our road at that point.

At Worcester, also, the insufficiency of our passenger depot accommodations is becoming more and more apparent. Negotiations are now pending between the different roads interested and the city of Worcester, for the construction of a Union Passenger Depot, and it is hoped before another season shall have passed, some plan will be matured for its accomplishment.

A charter has been obtained for the erection of a new bridge over the Hudson River at Albany, and it is contemplated to begin upon the work during the coming season. In locating the bridge special reference will be had to securing ample and convenient depot accommodations on the west side of the river.

In reviewing the doings of the past year as exhibited in the accompanying tables, a marked increase in the amount both of the freight and passenger traffic will be observed. This business has been done with greater ease and promptness than ever before and at prices which it is believed cannot fail of being satisfactory to the public.

The company have 47 passenger and 112 freight locomotives; 114 passenger, 87 baggage and postal, 2,762 merchandise, 137 gravel and 100 hand cars. Also, 98-234ths of 36 passenger, 4 express, 3 post office, and 10 baggage cars of the New York and Boston Express Line, and 2-5ths of 6 passenger and 2 baggage cars on Steamboat Train.

The number of miles run by locomotives with passenger trains, was 958,921; with freight trains, 2,158,969; with gravel trains, etc., 85,502—total, 3,203,392.

The number of through passengers carried, was 65,841; way do., 4,225,174—total, 4,291,015. Number of passengers carried one mile, 95,678,282.

The total number of tons moved, was 1,613,940, of which 551,700 went west, and 1,062,240 east. The through tonnage westward amounted to 85,045; do., eastward, 237,619. All other tonnage westward, 466,655; do., eastward, 824,621. Equivalent number of tons carried one mile, 158,579,177—equal to 792,896 tons carried over the whole road.

An aggregate of 254,257,409 passengers or tons of freight carried one mile in 1869, against 205,348,323 passengers or tons of freight carried one mile in 1868.

The cost of transportation for each passenger and each ton of freight one mile this year has been 1.888 cents, against 2.024 cents in 1868.

The cost of the Boston and Albany, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1869, has been as follows:

Boston and Albany Railroad	$14,040,194 60
Equipment	2,597,837 78
Albany and West Stockbridge R.R.	2,411,055 75
Hudson and Boston Railroad	208,036 01
West Stockbridge Railroad stock	13,000 00
Grand Junction Railroad	1,051,908 33
Total	$20,317,032 47

President.—C. W. CHAPIN, Springfield.

Vice President.—D. WALDO LINCOLN, Boston.

Directors.—C. W. Chapin, Daniel Denny, Ignatius Sargent, Thomas F. Plunkett, Josiah Stickney, Moses Kimball, Ginery Twitchell, Avery Plumer, D. Waldo Lincoln, William Claflin, Jonathan D. Wheeler, James D. Colt, William Mixter.

Gen'l Supt.—C. O. RUSSELL, Springfield.

Ass't Superintendent.—ABRAHAM FIRTH, Boston.

Ass't Superintendent.—J. B. CHAPIN, Albany.

Treasurer.—C. E. STEVENS, Boston.

☞ The Elkhorn *Independent* says that the managers of the Western Union Railroad are making arrangements to extend the line of their road from Sabula, opposite Savanna, to Ackley, about 150 miles west, joining the Iowa division of the Illinois Central at that point.

☞ About one hundred delegates from the northern counties of Pennsylvania and from Western New York met at Williamsport, Penn., on the 8th inst., to devise means for building an independent direct railroad from the Jersey shore to Buffalo. The meeting was sanguine that the Buffalo and Washington Railway would connect with the Pine Creek, Jersey Shore and State Line road at Port Alleghany. A committee was appointed to carry out the design of the convention.

Milwaukee and St. Paul Railway.

The directors of the Milwaukee and St. Paul Railway Company have issued a circular to the shareholders in which it is recommended that the directors be authorized to increase the capital stock 8,289 shares, or $828,900, and that the same be divided among the shareholders by giving to each share of preferred stock three dollars in the new stock and to each share of the common stock seven dollars in the new stock. This increase of the capital will represent in part the earnings of the company for 1869, which have been used in permanent improvements of the property and additions thereto.

The directors say that they had hoped to be able to declare a dividend of seven per cent. in cash to both classes of shareholders, from the earnings of 1869, but they have been unable to do so for the reason that the income of the company was not what they expected it would be, owing to the low price of wheat which prevented that product from seeking market, and thereby lessened the business anticipated from that source. They further claim that the taxes, State and national, which they are compelled to pay, amount to about four cents per bushel on every bushel of wheat carried over the road.

Some statistics are given by the directors in regard to the road and its operations, which are of general interest. The company now owns 936 miles of railway, 85 of which were put in operation last year. The various lines and their length are as follows:

	Miles.
Milwaukee to St. Paul *via* Prairie du Chien	405
" to La Crosse *via* Watertown	196
" to Portage *via* Horicon	95
Horicon to Berlin and Winneconne	58
Watertown to Madison	87
Milton to Monroe	42
Calmar to Clear Lake	84
Conover to Decorah	10
Mendota to Minneapolis	9
Total	936

The earnings of the company for 1869, were $7,250,668 68, and the operating expenses, $4,229,882 11. The net earnings, therefore, were $3,020,786 57. The interest on the mortgage debt ($17,132,500,) is $1,246,582, substracting this sum from the net earnings and there remains $1,774,204 57, which is applicable to dividends. The amount of preferred stock, is $9,744,268; and of common stock, $7,665,104, which gives a total of stock of both kinds amounting to $17,409,372. On these earnings the directors will issue a dividend, the shareholders concurring, of ten per cent., including the stock dividend above mentioned—in other words, they propose to issue a dividend on the preferred stock of seven per cent. in money and three per cent. in stock, and on the common stock three per cent. in money and seven per cent. in stock.

The company expended during the past year in the renewal of track, new bridges, new fences, new cars and new tools and machinery, $677,626. The cost of the new lines built, was $577,853. The five miles of connecting track built around the city of Milwaukee, cost $95,496. The cattle yards in this city, which are among the best in the country, cost $28,025. The cost of the frogs, switches and turn tables on the new roads, was $106,247. Thirteen new locomotives were built at an expenditure of $172,562.

It will thus be seen that the expenditures of the company, outside of ordinary operating expenses, have been incurred for permanent improvements—improvements which will largely enhance the aggregate value of the property and add to its efficiency and productive power. The company

has no floating debt except what it is prepared to pay on demand. The directors certainly make a very favorable showing of the result of their management of the vast interests committed to their care, while the vigor with which the extensive improvements and extensions of line have been carried out reflect much credit upon the officers in charge of the road, and particularly the general manager, Mr. Merrill.

To appreciate the vast amount of work that has been done by the Milwaukee and St. Paul Company, and the companies preceding it, and how much that work has added to the wealth and prosperity of the State, we have to reflect that it is only about seventeen years since the first rail of this great railroad system was laid, and that large portions of the country which it now penetrates, and where now are fine farms and flourishing villages, were almost as wild as when man first set his foot upon them. Verily there is nothing that so much contributes to the wealth and material development of a country as railroads. What would our State be with its railroads stricken out of existence?—*Milwaukee Wisconsin, Jan* 29.

Baltimore and Ohio Railroad.

We have received a copy of the report of this company for the fiscal year ending September 30, 1867 which was presented at the annual meeting of the stockholders in Baltimore on the 15th of November last. The reports of this company have been delayed for several years past by reason of difficulty in settling accounts which had accumulated during the war and since. The following is a comparative statement of the earnings and expenses of the Main Stem for the years 1866 and 1867.

MAIN STEM.

Earnings:	1866.	1867.
From passengers	$1,634,787 86	$1,670,874 79
Tonnage	6,067,441 91	5,771,809 31
Total	$7,702,229 07	$7,442,684 10
Working expenses:		
Transportation exp.	$1,151,761 72	$1,168,988 91
General expenses	62,997 54	89,951 51
Losses by accidents	57,488 73	65,470 35
Repairs of railway	1,020,311 85	883,665 85
" locomotives	688,277 27	630,559 45
" burden cars	403,455 93	267,489 00
" pass. cars	79,533 93	96,256 56
" dump cars	4,277 29	790 95
" stationary machinery	145,976 43	184,973 44
" depots	276,611 70	328,669 90
" waterstati'ns	38 656 19	32,380 38
" bridges	196,662 42	232,808 85
" telegraph	8,041 79	9.000 44
Fuel and preparing	196,508 12	228,128 72
Cleaning engines and cars	77,046 17	81,537 07
Pumping water	11,695 26	13,083 25
Watching cuts, tunnels and bridges	54,431 10	55,436 40
Contingent expenses of machinery department	6,856 77	7,074 83
Total	$4,480,190 21	$4,376,265 86
Net earnings	$3,222,038 86	$3,066,418 24

It is shown that the earnings, in comparison with the fiscal year 1866, decreased $259,544 97, while the working expenses decreased $103,924 35—making a comparative decrease in net profits of $155,620 62. Compared with the fiscal year 1865, the decrease of earnings being $2,654,022 09, and the decrease of working expenses $1,282,456 56, the decrease of net profits amounted to $1,371,565 63.

The ratio of expenses to earnings was in 1865, 46.04, in 1866, 58.16, and in 1867, 58.79.

During the fiscal year, the sinking fund for the redemption of the city loan increased to $1,065,965 43—showing a gain of $55,935 38.

Dividends of 4 per cent. each upon the capital stock were paid on the 23d of October, 1866, and the 30th of April, 1867. The U. S. tax thereon was also paid by the company.

The liabilities of the company, compared with the statement of September 30, 1866, show reductions by payments on account of the loans stated as follows:

On loan redeemable in 1867	$717,901 16
On N. W. Va. second mortgage bonds, endorsed by the B. & O. R. R. Co.	4,500 00
On N. W. Va. third mortgage bonds, endorsed by the B. & O. R. R. Co.	4,000 00
	$726,401 16

The balance of cash in the Treasury, Sept. 30, 1867, was, $300,485 70, after deducting $123,105 44 for payment of interest on the city loan, and on the bonds of the company which matured Oct. 1, 1867.

Statement of profit and loss for the years ending September 30:

	1866.	1867.
Balance from previous year	$16,084,928 97	$17,548,131 83
Net earnings	3,222,038 86	3,066,418 24
Divid'd upon 10,168 shares of Washington Br. stock owned by the Co.	101,680 00	101,730 00
Increment of five million loan S.F.	61,621 58	55,635 38
House rents	8,238 93	8,648 81
	$19,478,508 34	$20,780,559 26
	1866.	1867.
Dividends on stock	$1,050,624 00	$1,050,804 00
Interest and taxes.	887,748 82	532,266 16
Ground rents	25,455 59	27,056 82
Central Ohio Division	16,548 60	370,634 97
Balance	17,548,131 83	18,799,797 81
	$19,478,508 34	$20,780,559 26

Statement of the liabilities and assets of the Baltimore and Ohio Railroad Company, September 30, 1866 and 1867.

" burden cars	38,120 97	38,985 79
" passenger cars	9,899 09	11,099 49
" dump cars	507 36	175 53
" bridges	28,113 37	18,955 83
" depots	19,373 24	18,032 29
Pumping water	3,000 00	3,250 00
Losses by accidents, etc.	4,713 42	370 95
Fuel and preparation	20,867 57	21,806 59
General expenses	2,422 66	2,478 76
Cleaning engines & cars	5,247 51	5,426 69
Contingent expenses	749 72	505 22
Total	$636,658 35	$532,702 34
Deficit	$101,223 55	$26,816 62

The aggregate earnings of the Main Stem, Washington Branch and Parkersburg Branch, for the years ending September 30, 1866 and 1867, were as follows:

	1866.	1867.
Main Stem	$7,702,229 07	$7,442,684 10
Washington Br	460,760 96	391,889 25
Parkerkburg Br.	535,434 80	505,885 72
Totals	$8,698,424 83	$8,340,409 07

The expenses of operating and repairs were as follows:

	1866.	1867.
Main Stem	$4,480,190 21	$4,376,265 86
Washington Branch.	119,016 08	82,387 13
Parkersburg Branch.	636,658 35	532,702 34
Totals	$5,235,864 64	$4,991,355 33

And the revenue, after deducting the cost of operating and repairs, as follows:

	1866.	1867.
Main Stem	$3,222,038 86	$3,066,418 24
Washington Branch.	341,744 88	309,452 12
Parkersburg Branch.	*101,223 55	*26,816 62
Totals	$3,462,560 19	$3,349,053 74

* Deficit—an improvement of $74,406 98.

Showing an aggregate net decrease, compared with the preceding year of $113,506 45.

The following table gives the receipts of the last seven years, those for 1861, 1862, 1863, 1864, 1865 and 1866, being inserted as a measure for comparison:

Main Stem—

	Passengers.	Tonnage.	Total.
1861	$889,159 05	$2,424,266 65	$3,211,425 70
1862	1,769,497 13	2,712,361 85	4,481,858 98

Aggregate—			
1861	$1,349,424 22	$2,650,672 90	$4,000,097 12
1862	2,339,539 52	3,284,758 82	5,624,297 84
1863	1,980,798 42	4,678,491 09	7,659,289 51
1864	4,175,766 33	5,963,109 70	10,138,876 03
1865	5,067,539 15	6,704,336 57	11,771,875 72
1866	2,182,164 12	5,516,260 71	8,698,424 83
1867	2,116,033 27	6,224,375 80	8,340,409 07

The road operated by this company comprises three distinct parts: the Main Stem, the Washington Branch and the Parkersburg Branch. The length of these several lines is as follows:

Baltimore and Ohio Railroad	379.6 miles.
Washington Branch	30.0 "
Parkersburg Branch	103.5 "
Total	513.1 miles.

The stock of engines on hand at the close of the fiscal year 1867, numbered 297; of which 243 were first class, 38 second class, and 16 third class.

The number of cars owned by the company is as follows: 141 passenger, 129 smokers, baggage, mail, express, etc., 1 pay, 1 post office, 6 officers, and 4,167 tonnage, stock and coal cars.

The mileage of engines in 1866 and 1867 on the lines severally, was as follows:

	1866.	1867.
Main Stem	4,612,428	5,164,298
Washington Branch	525,776	409,299
Parkersburg Branch.	425,832	555,658
Totals	5,564,036	6,129,255

No returns are given of the number of passengers carried. The through tonnage, which amounted in 1866 to 155,650, was in 1867, 220,967—showing an increase of 75,317 tons.

The aggregate quantity of coal transported on the Main Stem in 1866, was 719,711 tons, and in 1867, 695,938—showing a decrease of 23,773 tons.

The tonnage of live stock in 1866, was 35,538 and in 1867, 44,280; increase, 8,747.

The quantity of lumber brought to Baltimore in 1866, was 15,499 tons, and in 1867, 26,488 tons; increase 10,536 tons.

The quantity of flour brought to Baltimore in 1866, was 640,718 barrels, and in 1867, 421,638—a decrease of 219,080 barrels.

On the 21st of November, 1866, the Baltimore and Ohio Railroad Company entered into an agreement with the Central Ohio Company, as reorganized, under which, on the 1st of December following, the Baltimore and Ohio Company took possession of that road, and has since maintained and operated it.

The Central Ohio Road extends from Bellaire to the Capital of Ohio—Columbus—137 miles, passing through the fertile and densely-popnlated counties of Belmont, Guernsey, Muskingum, Licking and Franklin.

From the want of sufficient means—the road having proved far more costly than anticipated by its projectors—its condition was such as to require large expenditures to properly improve its tracks and works. The Baltimore and Ohio Company determined to so strengthen and improve that road, and add to its facilities, as to enable it to transact promptly and safely an increased business.

In the pursuit of this policy the expenditures exceeded the net income from that road $370,634 97, which has been charged to the account of profit and loss.

Whilst for a number of years, until the Central Ohio Road is improved to a first-class standard, material expenditures beyond the net earnings will occur; yet, ultimately, it is expected that the commanding position and relations of this road will not only, as heretofore, add largely to the trade of Baltimore, but yield satisfactory results in connection with the traffic of the line.

On the 21st of January, 1867, the Baltimore and Ohio Company entered into an agreement with the North German Lloyd, (limited,) of Bremen, for the establishment of a permanent line of first-class steamers between Baltimore and Bremen.

The agreement required the immediate construction of two splendid first-class iron steamships, and embraced provisions for the future enlargement of the line, as the advantages and business of the route developed. It was the conviction of the Board that the subscription made of one-half the capital required for this line was fully justified, especially in view of the increase and impetus that would result to the commerce and growth of the Port of Baltimore, and the consequent reactive effects upon the business of the road.

Rome, Watertown and Ogdensburg R. R.

The following is the verdict of the Coroner's Jury in the case of the person killed by the accident which recently occurred on the Rome, Watertown and Ogdensburg Railroad:

That the deceased, J. Henry Taylor, of New York, came to his death on the morning of January 24th, 1870, by being crushed by the falling of the smoking car, at the accident on the R., W. & O. Railroad, near the station of the village of Philadelphia, and that they see no reason to censure the Company or its employes, it not appearing in the evidence, that they omitted the proper precautions to prevent accidents of this character.

☞ On the 12th inst. the royalties on Bessemer steel, fell from £1 to 2s. 6d. per ton on rails, and from £2 to 2s. 6d. per ton on all other descriptions of Bessemer steel manufacture. It is expected that Bessemer steel rails will therefore be sensibly cheaper in future.

☞ The South Eastern Counties (Ca.) Railway has been definitely located from West Farnham to Nelsonville.

☞ The Frederick and Pennsylvania Line Railroad will be graded to the Monococy by the 1st of April
